

**Neehar Pathare**  
MD, CEO & CIO  
63SATS Cybertech

On behalf of 63SATS Cybertech, I would like to express our sincere congratulations to Dun & Bradstreet for their "Business Enterprises of Tomorrow 2025" event and the unveiling of the 2025 editions of "Leading SMEs of India" and "Leading Mid-Corporates of India." This initiative highlights the vital role these organizations play in shaping the future of our national economy.

The theme, "Building Mighty Enterprises: Navigating the Next Frontiers of Growth," resonates deeply with the foundational vision of 63SATS Cybertech. Guided by the strategic foresight of our Founder, Mentor, and Teacher, Mr. Jignesh Shah, 63SATS Cybertech stands committed as a steadfast partner in this journey. As enterprises harness technology to fuel innovation and scale, they must also navigate a complex and dynamic cyber threat landscape. In today's hyperconnected world, the pursuit of building a mighty enterprise is intrinsically tied to fortifying digital assets and cultivating strong cyber resilience. Meaningful growth, after all, rests on a secure and resilient foundation.

At 63SATS Cybertech, a forward-thinking subsidiary of 63 Moons Technologies Ltd., our mission is clear: to engage organizations to explore the complexities of the advanced age successfully. We are steadfastly dedicated to delivering top-tier, universally accessible cybersecurity solutions. Our goal is to enable and maintain the potential of

every organization, ranging from small, medium, and large enterprises to government bodies, to realize and maintain their complete potential, secure in their operations. Our methodology hinges on proactive defense. The Threat Intelligence Monitoring & Response Command Centre (TiM&RC) is central to this as it is fundamentally transforming our approach from passive observation to active, real-time threat neutralization. Furthermore, we are dedicated to simplifying the complexities of cybersecurity. We provide a complete suite of services to achieve this goal. We offer tailored technical solutions, comprehensive security assessments—including ransomware simulations and Red Team exercises—and strategic direction in Governance, Risk, and Compliance.

As we become more aware of the businesses that will exist in the future, it is of the utmost importance to realize that the advancement of these businesses will be inextricably linked to their ability to both predict and respond to new cyber threats. We enable businesses to not only endure but to thrive with assurance, cultivating a safe digital environment where innovation can prosper without apprehension. We are privileged to take part in this esteemed event and eagerly anticipate collaborating with India's foremost companies to create a secure and prosperous future for everyone.
