POWERING INDIA WITH GREEN TECHNOLOGIES FOR SUSTAINABLE FUTURE

Aquapharm Pvt. Ltd is a speciality chemicals company, creating value for customers by maximizing the productivity and efficiency of customers' formulations. Our four-decade journey has helped us understand the need to provide quality products along with technical assistance and consultation. We specialize in Performance Additives that make a significant contribution in manufacturing sustainable products across industries and meeting the ever changing lifestyle demands of the consumers today. Our product brands include - **AQUACID- Phosphonates, Maxinol- Polymers and Biodegradable Chelants.** **Aquapharm** leads the way in manufacturing speciality chemicals through innovative leadership, best- in -class infrastructure and continuous process improvement.

Established in 1974, Aquapharm's success has been fuelled by a strong focus on quality and service and has resulted in **ISO 9001:2015, ISO 14001:2015, and ISO 45001: 2018 certifications.** The company has grown manifold in manufacturing and export of fine and speciality chemicals for industries like Detergents, Oil & Gas, Water Treatment, Textiles and few others across

the globe. Our products are NSF, REACh and Kosher Certified.

As a progressive, future focussed organization, we aspire to be leaders in environmental stewardship and social responsibility across our business – from procurement and product selection to energy use and effluent treatment. As result of this vision, Aquapharm Innovation Centre located in Pune is a hi-tech "Zero discharge" facility recognized by the Dept. of Science & Technology, Government of India. The Innovation Centre is committed to developing "Green Technologies" important for creating sustainable products.

Profitable growth, sustained increase in value of the company and trusted corporate culture are at the heart of Aquapharm's corporate strategy. **Aquapharm services 40+ countries**, has **warehouses in India, US, Europe & Canada**, **manufacturing plants in India and US** and an Innovation Centre in India; all powered by 250+ employees and top of the line infrastructure.
