**Avinash Gupta**

Managing Director & CEO - India  
Dun & Bradstreet

Globally, the corporate world is undergoing significant transformation in the wake of rising focus on ESG and sustainability practices. With business stakeholders such as investors, customers, suppliers, employees and partners increasingly looking beyond financial parameters to gauge a company's performance, sustainability has become a trending topic of interest in boardroom discussions and corporate strategies. It is also becoming clear that sustainability does not merely mean regulatory compliances. It is, in fact, an opportunity to create greater business value, achieve competitive advantage, and unleash innovation.

In this context, Dun & Bradstreet India is pleased to announce the release of its premier report, **'ESG Champions of India'**. The report highlights the ESG initiatives undertaken by the recipients of the **'ESG Awards 2023'** and recognizes their contribution towards sustainability. Being an inaugural

edition, the Awards are the first of their kind in the industry, but have been able to garner an overwhelming response of more than 250 ESG initiatives from businesses across the country. The report also includes a listing of India's leading ESG Entities, as well as an encapsulation of the pulse and dynamics of ESG in the current scenario, along with the perspectives of various business leaders.

Sustainability no longer remains a disconnected function within an organization that used to be typically built around health/safety practises or PR or communication issues having no place in critical business decisions and strategies. Today, as we are moving towards a world where mere financial numbers no longer define corporate success, sustainability is emerging as a priority for stakeholders. The pressure on businesses to adopt sustainable practices is mounting each day, with more governments around the world committing to net-zero emissions, regulators tightening up compliances, investors flocking to companies with stronger ESG profiles, and customers and employees showing strong affinity for ESG-compliant companies. The growing focus on sustainability issues is compelling businesses to transform into social citizens and live up to the expectations, both in the letter and spirit of the mandate.

However, many companies still continue to view ESG as a compliance tool to check the right boxes, rather than

adopting that ESG as a process that can help create value, spur innovation, gain competitive advantage, and help the company make a difference not just for its businesses and stakeholders but also for the environment in which it operates.

While it may seem to be a daunting task over the short-run, ESG can also prove to be a hotbed of opportunities to refurbish a company's image in line with stakeholder expectations. Across the world, companies are inventing ways to improve their processes with a view to contribute to more pressing issues such as climate change, carbon footprint, biodiversity, human rights, gender inclusion etc. Companies such as Neste, a Finland based oil refiner, are working with other business players to build circular economies. Neste, in collaboration with fast-food chain McDonald's, converts the latter's used cooking oil into renewable diesel, which is, in turn, utilized by supply chain company, HAVI to deliver goods back to McDonald's. The oil refiner also collaborates with local businesses to convert cooking oil, grease and other residue/waste materials into renewable diesel to fuel the city's fleet. That is a win-win for all - plus Neste has been able to re-position itself as a sustainable player and innovator converting food waste into renewable energy.

ESG, thus, offers immense opportunities, but turning them into reality necessitates a change in mindset - right from what the company stands for and

what its core business values are; how the company aligns with the social needs, be it waste reduction, diversity, zero emissions, circular economy, etc. This would then help in defining other strategic decisions such as investments and partnerships while setting the direction on the ESG roadmap, and to create an overall narrative that the company intends to communicate to its various stakeholders.

In that context, implementing a successful ESG strategy necessitates collaborative efforts from multiple departments, and the role of corporate leaders becomes extremely important from that point of view. According to a survey conducted by Forrester for Dun & Bradstreet, **71% companies said that sustainability teams are the most important partners** leading the adoption of ESG Goals. Inevitably, those in charge face the crucial and urgent task of accelerating the sustainability journey amidst rising shareholder, consumer, and regulatory pressures.

There is no doubt among business leaders that sustainability ought to be on the agenda, and MSMEs are no exception. For India to achieve its sustainability goals, it is crucial for MSMEs to embrace sustainable actions. However, a pertinent question is whether MSMEs understand the factors involved in the adoption of sustainable practices and have a clear perception of the way forward. Are they aware of the opportunities and benefits

associated with sustainability measures, and how are they bringing sustainability into practice?

With a view to answer these raging questions, Dun and Bradstreet in collaboration with SIDBI has introduced a quarterly Sustainability Perception Index (SPeX), which is a Green Pulse Indicator to track the awareness, willingness and implementation levels of Indian MSMEs towards sustainability. The index score for October – December of 2022 is at 46, which is far less than ideal. In terms of awareness and implementation, the survey shows that there are distinct areas where MSMEs are excelling as well as lagging.

As for challenges, the biggest impediment to achieving these goals is lack of accurate, up-to-date, and transparent actionable data. According to Forrester Research, 90% of companies anticipate that ESG data will be very important to their business by 2025. These companies clearly see ESG data playing a game-changing role in an increasing number of business contexts.

However, when it comes to consistent, trustworthy, and accurate ESG data, 47% of companies do not have access to enough reliable data, and 46% believe that inconsistency or poor quality of ESG data is one of the key challenges. As a result, access to high-quality data and analysis of ESG initiatives will be the biggest competitive advantage for companies in the days to come. Dun & Bradstreet,

as a knowledge partner, can help companies supercharge their transformation and achieve ESG-related goals overall.

Dun & Bradstreet provides sustainability (ESG) ratings for companies globally based on a range of ESG indicators. We provide comprehensive coverage across industries and geographies i.e., 130 countries. Country ESG Rating assigns a composite rank for each country, using ~100 indicators, as well as a rank for each dimension – Environment, Social, and Governance. For companies conducting business across borders, D&B country-level ESG ratings help them assess sustainability of countries and risk associated with operating overseas.

Our latest publication on the domestic turf, 'ESG Champions of India' would serve as a ready reckoner on ESG and sustainability practices and an insightful resource for CXOs of leading corporate houses as well as industrial bodies and government ministries. The profiles and narratives of the Award Winners would prove to be a valuable source of inspiration for businesses across the country, and it also provides the participants a platform to showcase their initiatives and achievements in the field of ESG.

I hope you find the "ESG Champions of India" report an interesting and insightful one. We eagerly look forward to your feedback and suggestions.

**Mr. Shailesh Haribhakti**

Chairman

Shailesh Haribhakti & Associates

Visuals of a flooded and dry Venice canals just two consecutive years apart, show the intensity and vagaries of changing weather patterns. With our planets' temperature on a steep rise, expectations from the resource owners and policy makers are fast-changing. Stakeholders are increasing accountability on corporates and governments.

According to the Edelman Trust Barometer, business is the most trusted institution in society. With this faith, comes the responsibility to drive societal shifts. Through the length of our day, the scale of our interactions with businesses only keeps growing. More often than we realise, we trust enterprises to enable our daily lives!

Now, who is to doubt - that we would not trust them with a better tomorrow! A tomorrow, which is more inclusive, green, clean, and ethical. There exists an implicit understanding between

## “ ESG AND ITS RELEVANCE IN THE CURRENT SCENARIO ”

businesses, governments, and citizens. This cohesive relationship could break due to climate change, social unrest, and failed governance systems.

### TRANSFORMING PROFITABLY

ESG, a simple yet comprehensive acronym has never been more relevant. ESG stands for Environment, Social, and Governance. Being environmental stewards, socially responsible and purposefully governed.

ESG is a mindset, a tool or framework to deliver on the promise of “Conscious Capitalism.” An attempt to refocus on stakeholder primacy over shareholder value, to think long-term value over short-term profits, to drive equitable distribution of opportunities and to restore the ecological balance.

We believe, that the most important for companies is to STOP seeing ESG as an additional burden or cost. It is an opportunity to rethink supply chains, business models, and processes, to make them more eco-friendly and future proof.

According to the World Business Council for Sustainable Development (WBCSD), the sustainable economy has the potential to unlock USD\$ 12 trillion in economic value and

380 million jobs by 2030. What we need is, collaboration, change in mindsets, technology, and innovation.

### CLOSING THE AMBITION GAP

Sustainability no longer sits in an organisation silo but touches all aspects of business. Action was initially driven by regulation, but now it rides on ambition. Since 2021, more than 3,000 organisations have worked with the SBTi (Science-based Targets Initiative). As per a report by Strategy& (unit of PricewaterhouseCoopers), companies appointed as many Chief Sustainability Officers (CSOs) in 2021 as they did in the previous 8 years.

Sustainability has taken centre stage, and a “Net Positive” transformation is driving innovation, talent retention, communication, and growth. Focus has moved from strategy to execution. Organisations not only want to push ESG action, but also capture real-time data, and report transparently.

A new era of corporate reporting, with a focus on 6 capitals: Financial, Environmental, Human, Physical, Relationship, and Innovation has emerged! What follows, is a world where we can do well, while doing good for our planet and people.

**Ms. Jayanti Shukla**  
Chief Executive Officer  
United Way of India

The social horizon has widened as the commercial landscape of the twenty-first century changed and globalisation produced businesses and marketplaces that are more integrated and dependent on one another. Social issues affect every stakeholder in a company and addressing them provides a long-term competitive edge. The quantitative and qualitative aspects of social commitments have compelled corporates to focus on ESG. While CSR continues to encourage corporations to create and carry out socially conscious initiatives in society, ESG evaluates and measures the impact of the corporate's social responsibility efforts, often in partnership with non-profits. Corporate and non-profit leaders initially saw ESG as a tool to improve the standing of their organisations among stakeholders. Since then, the focus has shifted to ESG being the tool to gauge the overall performance of a business on multiple parameters,

## “ UNITED FOR ESG: A GAMECHANGER FOR NON-PROFITS ”

going beyond mere financial performance.

**Understanding ESG in a Non-profit Organization:** CEOs, investors, corporations, and the social development organizations do not change overnight. But the road ahead is long and full of detours, the *farsighted non-profits have already picked up on the ESG rumblings and are positioning themselves to thrive in the new environment.* The first step for most is to take a long, hard look to see how they rate on a set of parameters that, admittedly, can sometimes seem nebulous.

ESG reporting gives non-profits organisations a framework for openly discussing their work in sustainability practices. It promotes openness and enables those who support their cause and fund them to assess if the non-profit is governed well and outlines its functioning. *What charities do naturally is the “S” in ESG* - how non-profits deal with their constituents, including their staff, volunteers, clients, vendors, which is more inward focused.

**ESG today is an imperative for non-profits to examine their operating lifecycle and work in communities.** A lot of new age non-profit organisations have actively begun utilising the

ESG philosophy to guarantee ongoing access to funding, as well as to increase the impact of their social objectives. And in the current context, donor retention and programmatic success will depend heavily on the incorporation of environmental and social sustainability concepts into any non-profit organisations' operating lifecycle as well as work in the community.

**Non-profits are now increasingly adopting ESG for community development.** Using ESG framework to further a non-profits mission through existing and new projects will be a prerequisite. United Way in India, as a global philanthropy network, contributes to the advancement of ESG principles as an observer, proponent and practitioner. All community development projects under environment, education, health, livelihood is designed with ESG as the key focus.

An ESG lens for social development organizations to build in their community projects is a necessity now. It is not just a critical factor for funders; all stakeholders now demand changes in the way enterprises are operated and *corporates and non-profits working with a united front on ESG framework can only make this happen.*

# Community based security of Wind Turbine Generators – An inclusive development model

## A Suzlon Case Study

Suzlon Wind Turbines are located in remote areas across different terrains and states, making them vulnerable to security breaches, which lead to significant losses in customer revenue and power generation. To ensure the sustainability of its CSR initiatives beyond project life, Suzlon has been building Village Development Committees (VDCs) and nurturing them over the years to become true representatives of the village with a deep interest and sense of service in village development.

**The Challenge:** In 2013 and 2014, the wind farms in Jaisalmer, Rajasthan, faced a unique challenge of theft of expensive parts of the wind turbines, particularly copper cables. Nearly INR 1.5 billion worth of material across wind farms in that area was stolen, resulting in the shutdown of nearly all wind turbines and the loss of generation and revenue thereby negatively impacting potential investment opportunities for wind energy in the state.

To address this issue, a cross-functional think-tank at Suzlon devised multiple solutions, including increasing site security with local police and border security forces while installing CCTV cameras. However, the issue required a more inclusive and sustainable approach. An initiative of replacing copper cables with aluminium was undertaken but partnering with local communities was crucial for an immediate and permanent

solution.

**The Solution:** This led to the creation of 'Project SURaksha', a community-based security solution implemented for 137 wind turbines across four villages in Rajasthan. A robust process was established, including selecting the village, conducting a partnership feasibility study, defining the scope of work and commercials, documentation and licensing as per the PSARA (Private Security Agency Regulation Act), and training and working with the Suzlon security teams. The impact was immediate, and the Suzlon-VDC partnership flourished since the maturity of the VDC was used as a fundamental criterion for village selection.

**The Outcome:** Suzlon effectively utilized the native intelligence and terrain knowledge of local villagers to combat the issue. There was a heightened sense of ownership once the villagers took charge, leading to a significant impact. VDC-based security resulted in a drastic reduction in number of thefts, early recovery of stolen materials, and less material being stolen due to early detection and response. When compared to before the implementation of VDC-based security, theft activity in VDC villages decreased by 76%.

**Sustainable Impact:** The agreement between the VDC and the villagers included a clause stating that a pre-decided fixed amount from their earnings

per turbine would go towards village CSR activities. Activities included providing furniture, water connections to schools, and livelihood support to widows. In Rajasthan, where water is scarce, undertaking pond deepening projects to increase water storage capacity was a priority. This initiative encouraged village women and children to contribute to the "intelligence network" by proactively reporting suspicious movements to VDCs. The VDCs in Rajasthan have invested INR 2 million in social village projects to date while significantly bringing down the incidents of theft and resultant losses.

This program aligns with SDG 8 and SDG 9, strengthening Suzlon's commitment to ESG principles. The model is being studied by various agencies as a replicable case study.

---

## ESG AND ITS RELEVANCE IN THE CURRENT SCENARIO

---

# ESG AND ITS RELEVANCE IN THE CURRENT SCENARIO

The principles of ESG (Environmental, Social, and Governance) have become extremely relevant in today's world, which is grappling with a slew of pressing social and environmental challenges. ESG considerations have become important for businesses, investors, and policymakers to ensure that growth is equitable for all people and is sustainable.

The reasons for the increasing focus on ESG are many, the most crucial one being the urgent need to address climate change. With the world getting warmer at an alarming rate, there needs to be a consensus on keeping tabs on human activities such as deforestation, burning of fossil fuels and greenhouse gas emissions. There needs to be accountability for the environmental impact of such activities and investments in clean energy and low-carbon solutions. ESG is also relevant

because of the need for social justice and inclusivity in a world where masses still live in poverty and lack access to basic rights and services despite rapid economic growth. To ensure that growth is inclusive and benefits all people; businesses, investors, and policymakers need to consider the social impact of their activities in terms of labour rights, engagement with local communities and other issues. ESG is also critical from the standpoint of ensuring good governance, sustainable and equitable growth, and preventing corruption and other forms of abuse of power at the cost of public welfare.

## THE LURE OF ESG INVESTING

In recent years, ESG investing has caught the attention of many investors, to the result that the market has been flooded with an array of ESG-focused investment products, such as exchange-traded funds (ETFs) and mutual

funds. This has made it easier for investors to incorporate ESG considerations into their portfolios.

Additionally, increased investor focus on ESG has also compelled companies to adopt sustainable practices and disclose information on ESG parameters, creating, thereby, a conducive ecosystem in which investors handpick companies with strong ESG performance while companies find it rewarding to enhance their ESG performance.

With investors rising up to the trend across the globe, it has spurred regulators into formulating international ESG Standards and Guidelines, which has made it easier for investors to compare the ESG performance of different companies.

Overall, growing investor interest in environmental, social, and governance factors has, to a large

extent, propelled the emergence and evolution of ESG-based investing. As more investors likely to join the bandwagon amid rising awareness, putting ESG performance of companies under the scanner, ESG as a principle is likely to gain further push.

### THE ESG TIMELINE: EMERGENCE AND EVOLUTION OF ESG

While the spirit underlying the concept of Environmental, Social, and Governance investing has been around for decades, the term has gained mainstream attention only in recent times. During the initial stages of the industrial revolution, very little attention was given to environmental and social issues. The seeds of environmental awareness and affirmative action were first sown in April 1970, when US Senator Gaylord Nelson created Earth Day to push for the inclusion of environment protection into the national agenda. The movement eventually led to the creation of the US Environmental Protection Agency (EPA) to tackle environment-related issues.

The term "ESG" was first used in 2004, in a landmark whitepaper titled "Who Cares Wins" published by the United Nations Global Compact. The whitepaper led to the 2006 UN Principles for Responsible Investing, which laid the foundations of the ESG criteria and made a case for such criteria to be incorporated in the financial evaluation of companies. The effort was

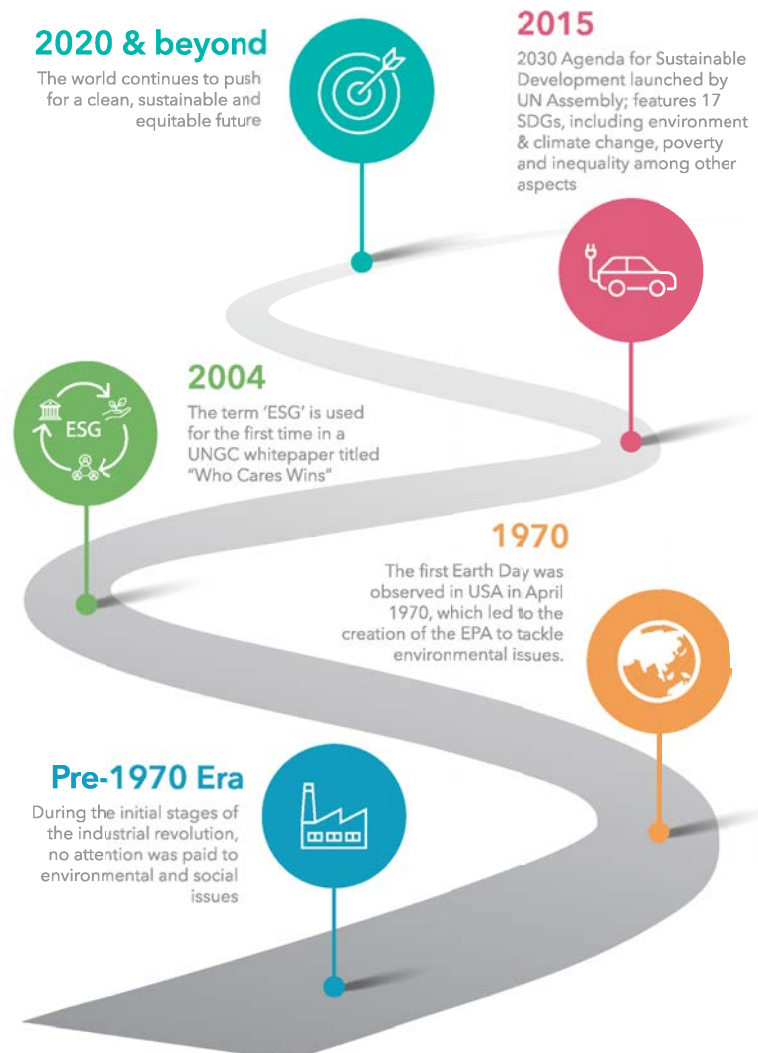

aimed at developing sustainable investments. At that point in time, around 63 investment companies signed up with US\$ 6.5 trillion in assets under management (AUM). As of today, there are more than 4,900 signatories with AUM to the tune of around US\$ 121.3 trillion.

Later, in September 2015, the 2030 Agenda for Sustainable Development, featuring 17 Sustainable Development Goals (SDGs), was launched by a UN Summit and adopted by all

member nations. These SDGs, which provided the blueprint to achieve a better and sustainable future, included climate change, poverty, inequality, and environmental degradation as some of the key action points.

The outbreak of the COVID-19 pandemic towards the end of FY20 brought on the greatest recession since World War II. Furthermore, investors dubbed it the 21st century's first sustainability crisis, a wakeup call on climate change and

### THE ESG TIMELINE

a turning point in terms of a more sustainable approach to investment. The crisis gradually led to a renewed focus on ESG, by bringing to the fore the linkages of social and environmental risks and the importance of strong governance in addressing such risks. Additionally, the economic downturn caused by the pandemic led to increased scrutiny of companies' financial and operational resilience, which is closely tied to their ESG performance. The pandemic also accelerated trends towards remote work and digitalization, which have increased the importance of data privacy and cybersecurity, both of which are ESG-related issues.

Across the globe, rising corporate disclosure and investor uptake have been mainly responsible for the trend towards ESG data. According to Dun & Bradstreet ESG Ranking Report, 90% of companies on the S&P 500 published sustainability reports in 2020 compared with only 20% in 2011, while 96% of the world's largest 250 companies reported on their sustainability performance during 2020. On the investors' side, inflows of ESG assets have increased significantly, bringing in more than \$21 billion in the first quarter of 2021 alone, on track to beat the previous record of \$51 billion in 2020. Going forward, these trends are likely to accelerate given the regulatory push and overall concerns about environment and climate change.

### THE INDIAN ESG ECOSYSTEM

The ESG landscape in India is complex and multifaceted, with an array of ESG challenges that need to be addressed.

These challenges include: -

**Environmental concerns:** India faces significant environmental challenges, including air and water pollution, deforestation, and the impacts of climate change. Addressing these issues is critical for the health and well-being of the population, and for preserving natural resources for future generations. While the Indian government has taken steps to address these issues (including the implementation of stricter emission norms, investing in renewable energy resources, etc.), a lot more needs to be done to ensure that the country is on a sustainable path for the future.

**Social concerns:** India has a large population of people living below the poverty line, and a significant portion of the population also lacks access to basic rights and utilities. Over the years, the Indian government has implemented a number of welfare schemes and programs aimed at poverty alleviation and reduction in inequality, such as the Mahatma Gandhi National Rural Employment Guarantee Act (MNREGA) and the Pradhan Mantri Jan Dhan Yojana (PMJDY). Yet there's a long way ahead to achieve inclusive growth and benefits for all people.

**Governance concerns:** Good governance entails processes and checks and balances to ensure prevention, detection, and action on acts of corruption and other forms of abuse of power. This is crucial in terms of ensuring growth that is sustainable and equitable. Initiatives such as the Goods and Services Tax and the Insolvency and Bankruptcy Code were introduced as steps in this direction. However, more needs to be done to ensure transparency and accountability in the public and private sectors.

### Investment opportunities:

With Indian companies now becoming more aware of the importance of ESG and incorporating these principles into their strategies, ESG investing is gaining significance in India. Investing on lines of ESG performance not only helps in identifying companies that are well-managed and have strong growth prospects but can also mitigate risks and capture opportunities in areas such as clean energy, water management and sustainable transportation.

India's journey in terms of business responsibility and sustainability can be traced back to a circular dated December 20, 2007, issued by the RBI, with guidelines on Corporate Social Responsibility (CSR), sustainable development and non-financial reporting and the role of banks in this regard. A couple of years later, the Ministry of Corporate Affairs (MCA) published voluntary

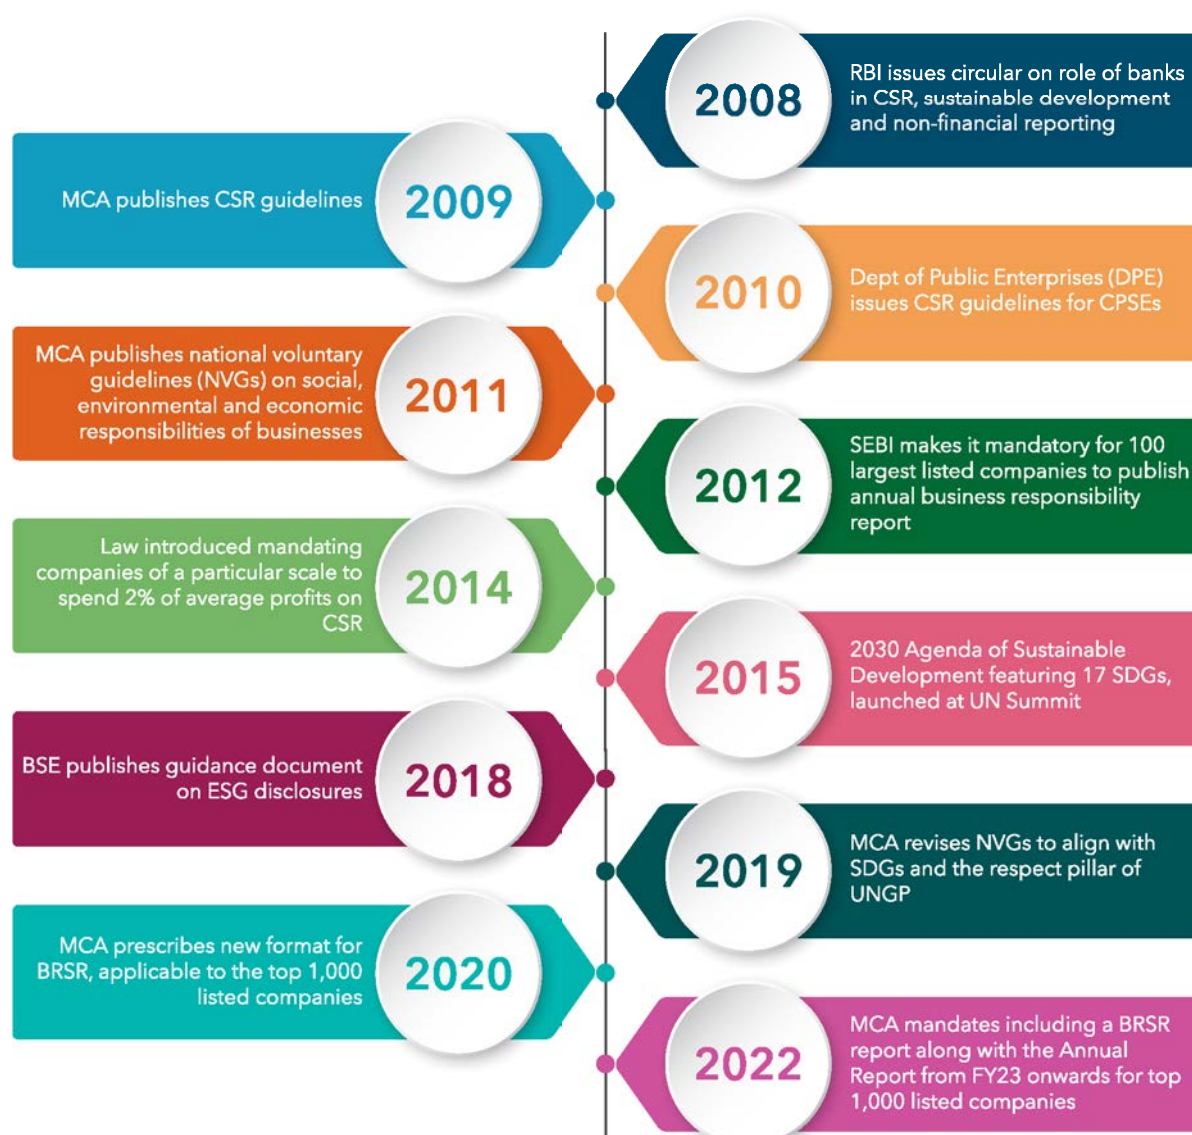

guidelines on CSR in 2009, which was eventually made a mandate in terms of reporting in 2012 and in terms of actual CSR spending in 2014. While the 2030 Agenda for Sustainable Development was launched at the UN Summit in 2015, the MCA revised its National Voluntary Guidelines (NVGs) to National Guidelines on Responsible Business Conduct (NGRBCs) in

alignment with the SDGs and the 'respect' pillar of UNGP between 2019 and 2021. In 2018, the BSE published a Guidance Document on ESG Disclosures. In 2020, this was followed up by the MCA prescribing a new format for Business Responsibility and Sustainability Report (BRSR), applicable to the top 1,000 listed companies by market capitalization, which in

2022, became a mandate for companies from FY23 onwards.

The ESG landscape in India is still developing and the standards and regulations are not yet as mature as in other countries. However, according to KPMG report released in August 2022, while all top 100 companies had furnished a business responsibility report

### KEY MILESTONES IN INDIA'S ESG JOURNEY

(BRR) as mandated by SEBI, as many as 79 also voluntarily published a standalone ESG report (with almost 90% of the companies preferring to use terminology such as sustainability report or annual integrated report). Interestingly, due to the emergence of several corporate reporting frameworks, guidance, and protocols for the purpose of ESG reporting, companies have been referring to multiple standards. Of the 79 companies that chose to voluntarily publish standalone ESG reports, about 70 referred to SDGs for the purpose of their reporting. Global Reporting Initiative (GRI), International Integrated Reporting Council (IIRC) and Task Force on Climate Related Disclosures (TCFD) frameworks were also extensively used by these companies.

However, this is about to change soon, with SEBI having made it mandatory for top 1,000 listed companies to include a Business Responsibility and Sustainability report as a part of their Annual Reports for FY23 onwards. This is not only likely to lead to a huge thrust on ESG reporting but might also lead to a shift towards the BRSR framework for the purpose of ESG reporting. Coupled with the fact that India is one of the few countries in the world to have a corporate social responsibility (CSR) mandate, this also makes India a major market for sustainability solutions and green finance, and critical to the evolution of the ESG ecosystem worldwide.

### KEY ASPECTS OF ESG REPORTING

#### Environmental Impact:

Companies are required to provide detailed information about their environmental impact of their business activities, including greenhouse gas emissions, energy use, and waste management practices. This information can help stakeholders understand the company's impact on environment and identify areas for improvement.

**Social Initiatives:** Companies should also disclose information about their social initiatives, including their efforts to promote diversity, equity, and inclusion in the workplace, as well as their community engagement and acts of charity. This information can help stakeholders understand the company's commitment to social responsibility.

**Governance Practices:** ESG reporting also includes information about a company's governance practices, including information about its board of directors, compensation of key executives, and any potential conflicts of interest. This information can help stakeholders assess the company's commitment to transparency and ethical business practices.

**Standardization:** ESG reporting is a relatively new trend and there is no one single standard for reporting ESG information. Different companies may use

different metrics and reporting frameworks, making it difficult to compare performance across different companies. However, more companies are moving towards standardization, using frameworks such as the Sustainability Accounting Standards Board or the Global Reporting Initiative to report on their ESG performance.

**Assurance:** Assurance is the process of having independent third parties review and provide a level of assurance on the reported ESG information, which increases the credibility and reliability of the information. The assurance process is done by professional assurance providers that have the knowledge and experience to evaluate the information and provide assurance on its accuracy and completeness.

#### Integration with Business

**Strategy:** ESG reporting is not only about providing information to stakeholders, but also about integrating ESG considerations into the company's business strategy. Companies should use information provided in their ESG reports to identify opportunities for improvement, set goals, and track progress over time.

### DECODING THE BENEFITS OF ESG REPORTING

The rising momentum of ESG is encouraging companies to increase their focus on tracking, measuring, and communicating their ESG performance.

In a study conducted by Dun & Bradstreet in collaboration with Forrester Consulting in March 2022, to evaluate the current state of ESG Data and the benefits of mature ESG strategies, it was found that the benefits of investing in ESG go well beyond avoiding fines for not complying with regulations and is a growing force driving profits through innovation and improved risk management. 81% of the 268 respondents in the survey stated their firms experienced negative consequences by failing to meet their ESG goals, with the two most common consequences being increased operational risk and increased financial risk.

Some of the benefits of ESG Reporting are enumerated below -

**Improved risk management:** The identification and disclosure of information on ESG risks can help companies better manage and mitigate such risks, which in turn

can help them safeguard their reputation and bottom line in the long run.

**Increased access to capital:** ESG reporting can help companies attract investments from socially responsible investors and other stakeholders who are looking for companies that align with their values and priorities.

**Better decision-making:** Monitoring of their ESG performance can help companies gain a better understanding of their operations and identify areas for improvement. This can lead to more informed decision-making.

**Cost savings and value creation:** The implementation of sustainable practices can help companies reduce their environmental impact, optimize their energy consumption and save on costs overall. This, in turn, can lead to renewed confidence among investors.

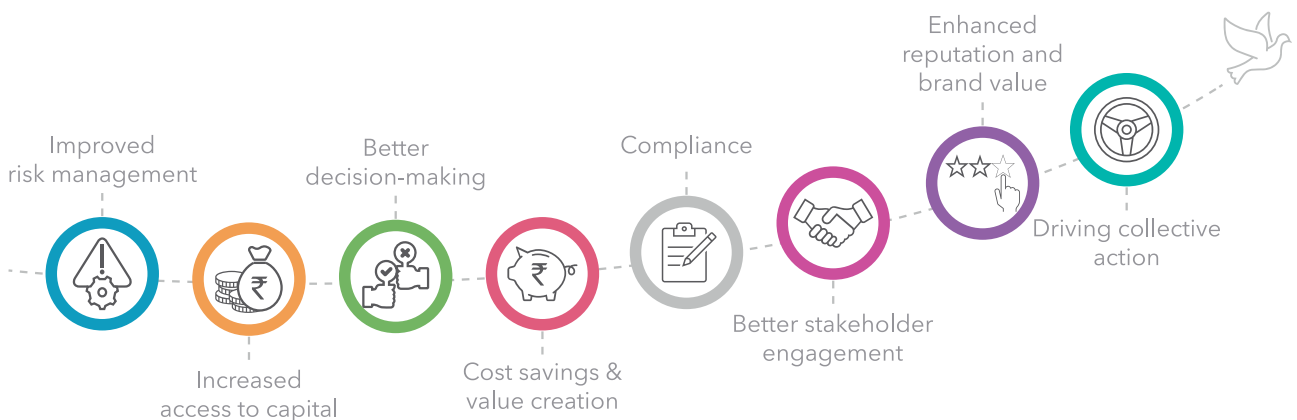

**Compliance:** ESG reporting can help companies to comply with environmental and social regulations, and to demonstrate their commitment to responsible business practices. This can lead to greater freedom from regulatory pressures and less adverse risk due to government action.

**Better stakeholder engagement:** Engagement on ESG issues can help build trust, understanding and better relationship with stakeholders.

**Enhanced reputation and brand value:** Companies that generate strong track record on ESG performance can build a positive reputation and brand value, which can help to attract and retain customers, employees, and investors.

**Driving collective action:** At a broad level, setting ESG targets, tracking performance and disclosure thereof can

## ADVANTAGES OF ESG REPORTING

enhance the value proposition of corporates and lead to a concerted effort towards achieving global climate goals.

### **DRAWBACKS AND LIMITATIONS OF ESG REPORTING**

While ESG reporting has become increasingly important in recent years, there are several drawbacks and limitations to consider. Some of these are -

**Existence of multiple ESG frameworks:** Multiple standards for ESG reporting exist. In order to meet investor demand, adequately showcase an organization's sustainability in a comparable way, and meet the criteria for ESG credit scoring, companies are forced to choose one or more frameworks to adhere to. In fact, a study by Financial Executives International, 85% of companies are currently using multiple ESG reporting frameworks.

**Lack of standardization:** One of the main limitations of ESG reporting is the lack of standardization in terms of what companies are expected to disclose and how they ought to disclose it. Different organizations have different reporting frameworks, guidelines, and metrics, making it difficult for companies to compare their own ESG performance with that of their peers and for investors to make meaningful comparisons between companies.

**Lack of consistency:** Even when companies do report on ESG issues, there can be significant variations in the type and level of information disclosed. This lack of consistency can make it difficult to compare performances across companies and sectors, making it hard for investors to make informed decisions.

**Greenwashing:** Some companies may use ESG reporting as a way to enhance their reputation without actually addressing the underlying issues, this is commonly known as "greenwashing". This can lead to a lack of trust in ESG reporting and make it difficult for investors to identify companies that are truly committed to sustainability.

**Reliability of data and complex ESG data management:** ESG data is often self-reported by companies, which means that it may not be fully reliable or accurate. This lack of independent verification can limit the value of ESG reporting for investors and other stakeholders. Also, the fact that sustainability is hard to quantify makes data collection a challenge. Furthermore, since ESG data is often divided in siloes, a global, integrated view is hard to generate. The lack of a centralized source of financial and sustainability data makes it impossible to establish a link between ESG action and financial outcomes.

**Limited comparability:** Even when companies disclose similar data, it may be difficult to compare due to the lack of standardization and the use of different metrics.

### **FACTORS HINDERING ESG ADOPTION IN INDIA**

There are several factors that are hindering ESG and sustainable development in India, including -

**Lack of government regulation:** Although the CSR policy and BRSR norms are in place, these apply to a select set of companies only. India therefore lacks a comprehensive framework for ESG and sustainable development, and there is little government regulation in place to encourage the larger universe of companies to adopt sustainable practices.

**Limited awareness and understanding:** Many companies in India lack awareness and understanding of ESG and sustainable development issues, which makes it difficult for them to take action to address these issues.

**Limited financial resources:** Small and medium-sized enterprises in particular have limited financial resources at their disposal, which severely constrains their ability to invest in sustainable practices and technologies.

**Limited access to capital and technology:** Limited access to capital and technology (which is a

reality for most MSMEs) can make it difficult for companies to scale up their operations and grow their businesses, thereby placing ESG under their lowest priorities.

**Limited access to information and expertise:** Many companies in India lack access to information and expertise on sustainable practices and technologies, which can make it difficult for them to take action to address ESG and sustainable development issues.

All of these factors combined, make it difficult for companies in India to adopt sustainable practices and technologies, and to make meaningful progress on ESG and sustainable development issues. However, with increasing awareness and understanding of ESG and sustainable development, and growing pressure from investors, customers, and other stakeholders, it is likely that we will see more companies in India begin to act on these issues in the future.

## ROADMAP TO ENHANCE ESG REPORTING

ESG reporting can be improved through the following action points -

**Standardization of ESG reporting frameworks:** At present, there exist multiple reporting frameworks, having varying reporting guidelines and metrics. Standardizing ESG reporting frameworks can help ensure

that companies are consistently reporting on their ESG performance and sustainability efforts in a way that is meaningful and easily comparable with other companies.

**Improved data quality and transparency:** Enhancing the quality and transparency of ESG data can help ensure that companies are accurately reporting on their ESG performance and sustainability efforts, and build trust in ESG reporting among investors, customers, and other stakeholders. In fact, 90% of the 268 respondents in the aforementioned survey conducted by D&B and Forrester Consulting said that they expect ESG data to be a critical asset to their companies by 2025.

**Integration of ESG data into financial reporting:** The integration of ESG data into financial reporting can help ensure that companies are taking ESG and sustainability considerations into account in their business operations and decision-making processes and can lead to more alignment between ESG and financial performance, which is certainly the need of the hour.

**Increased stakeholder engagement:** Encouraging companies to engage more actively with their stakeholders on ESG and sustainability issues will not only ensure that companies take these issues into account in their business

operations and decision-making processes but will also help build trust in ESG reporting.

## Increased investment in ESG and sustainability technologies:

Encouraging companies to invest in ESG and sustainability technologies can help to ensure that they are adopting sustainable practices and technologies and can help to ensure that they are making meaningful progress on ESG and sustainability issues.

## Stringent government regulations and incentives:

While ESG reporting and regulations pertaining to the same is currently voluntary for the larger universe of companies (except for top 1,000 companies), stringent and elaborate government regulation and incentives can lead to better compliance by businesses at large and encourage the adoption of sustainable practices and technologies..

## Sun Life India Service Centre Private Limited

**Chandan Barve**

Vice President and Chief Administrative Officer,  
Sun Life Asia Service Centres

### HOW DOES SUN LIFE ASIA SERVICE CENTRE INDIA (ASCI) INCORPORATE ESG PRACTICE INTO ITS STRATEGY AND OPERATIONS?

Anchored to Sun Life Purpose, our sustainability plan focuses on our areas of expertise where we can have the most positive social and environmental impact: increasing financial security, fostering healthier lives, and advancing sustainable investing. These efforts build from our foundation of operating as a trusted and responsible business.

Over the last couple of years, we have identified various programs linking to the 17 Sustainable Development Goals. To mention a few:

- Initiated shift to renewable energy source by installing solar panels on office building which provides 6% of electricity needs of ASCI .
- 5~10% reduction in Carbon Emission through the introduction of EV cars in the transportation fleet for employees.
- Installed EV charging stations in office parking

for promoting sustainable transport adoption by employees

- More than 500 Kwh of demand reduction was achieved through distribution of 400+ solar lamps to underprivileged students.
- Approximately 7,000 tonnes of CO2 reduction will be achieved through a plantation drive around the ASCI office complex.
- Reduction of more than 100 KL of water through recycling wastewater inhouse.
- Installation of "Smart Chemical Dispensers" resulting in a 30% reduction in housekeeping chemical consumption.

### HOW DOES SUN LIFE ASIA SERVICE CENTRE INDIA ENGAGE WITH ITS STAKEHOLDERS (I.E., CLIENT, EMPLOYEES) TO IMPLEMENT ESG INTO PRACTICE?

At ASCI, our belief is that with effective engagement of stakeholders we can influence the entire organization and eco-system for ESG performance while promoting employee morale or end user satisfaction.

- We leverage the People Connect framework to cover various themes ranging from analysing employee sentiments, leadership connects, open houses to elevate function specific working knowledge of the organization, Skip level meetings, etc.
- A diverse, equitable and inclusive environment has been key to having innovative results at ASCI. We launched a Great Green Challenge 2023 with an ASC Sustainable quiz and slogan contest for employees and families to increase ESG awareness
- We engage in dialogue with our employees and other stakeholders to apprise them of our ESG goals.
- Our employees helped plant 3000+ saplings around the office. We also handed over 1000+ indoor plants to our employees as part of go-green initiative.
- Zumba, Aerobics, doctor sessions, self-defence training, and health information programs are in place to spread awareness about the

importance of health and safety.

- f. To prevent greenhouse gas (GHG) emissions from food waste, we installed a compost system. ~2000kgs of food waste has been converted to compost to date, which is used in our on-site green gardens/green walls and open green spaces.
- g. With a focus on the 3R principle and promoting awareness regarding recycling and sustainability, we installed a Reverse vending machine (RVM). ~90kgs of plastic waste has been recycled till date.
- h. ASC Launched employee verse in 2023 which is a digital platform to ideate, collaborate, engage and convert ideas into innovation through PoC's.
- i. We prioritize employee wellbeing and mental wellness initiatives.
- j. DE&I is a strategic pillar of our strategy, and we are

committed to elevate diversity in leadership roles.

### HOW DOES SUN LIFE ASIA SERVICE CENTRE INDIA PLAN TO CONTINUE TO ACHIEVE ITS ESG GROWTH OBJECTIVES?

We will continue to collaborate with the Enterprise on defining the priorities at global as well as local level. For us, increased data centre efficiency, enhanced data security, cloud computing, green IT, data and equipment life cycle management, talent attraction and retention, and diverse supplier spend are some of the key strategic focus areas. The key actions and KPIs have been defined at the organization level around these priorities.

ASCI has adopted a holistic approach in developing a supplier diversity life cycle to ensure we are consistently engaging with Diverse businesses. Promoting suppliers

from marginalized society or interior parts of India, our vendor partners comprise of woman-owned enterprises, Small-business enterprises (SBEs) and Disabled veteran business enterprises (DVBEs).

Some of the business levers identified to accelerate the pace are fostering an understanding of sustainability. We are also applying technology to sustainability in assessment of new digital reporting tools.

The data provided in ESG disclosures for reporting purposes is of utmost importance and hence the industry's prescribed best practices are adopted.

Last but not the least, we link our ESG performance to core business goals, which will push us to further achieve the ESG objectives.

## GE HealthCare

**Mr. Mahesh Kapri**

Managing Director, GE BEL and GM, India Supply chain - South Asia, GE HealthCare

### WHAT DOES ESG MEAN IN THE CURRENT SCENARIO, AND WHAT ESG INITIATIVES YOUR COMPANY HAS TAKEN IN PAST 2 YEARS?

ESG is one of the pivotal and forward-looking initiative run by GE HealthCare to reduce Greenhouse Gas (GHG) and make an impact on society through Corporate Social Responsibility (CSR) driving purpose behind this priority.

With the growing threat of climate change, systemic inequality, and global health disparities, we recognize that fulfilling our purpose, and following through on our commitments, has never been more essential. We are making operational investments in energy efficient equipment, reducing emissions from the grid through smart green power sourcing and using lean practices to eliminate energy waste. We set out on this journey in 2019, with goal of net zero by 2050. GE BEL has been leading the efforts on ESG through a string of focused efforts.

- 98% of GE BEL's 20GWh annual power consumption is solar, reducing 10,453 tCO<sub>2</sub>e through solar PPA, along a complete inhouse solar power driving savings 60MWh/ Month.

- Value stream map (VSM) is a lean methodology used to analyze flow of material and design a future state. At our factory, we have leveraged this to create Green-VSM and identified projects focusing on energy, material, water and garbage reduction along with Air to Ocean(A20) shipment, Packing Boxes optimization, Parts Harvesting - CAN (Certified as New) program. All this has helped achieve electricity reduction by 18%, and waste elimination of 1.9 Ton/Year.

### HOW DOES GE HEALTHCARE ENGAGE WITH ITS STAKEHOLDERS (I.E., CUSTOMER, EMPLOYEES) TO IMPLEMENT ESG INTO PRACTICE?

At GE HealthCare, sustainability goals are driven at the grassroots by our passionate colleagues who are empowered to drive change. We also have a strong priority flow down within the organization, making a visible leadership commitment and driving accountability. We engage in employee involved programs throughout the year enabling heightened awareness & sensitivity with programs such Green Kaizen activity driven by our shopfloor team, Over 35,000 sapling plantation & maintenance as a CSR initiative in the metro

piers. In addition, we celebrate Earth Day with handmade 10,000 seedballs distributing to local parks, and ran a 30 acre Kundalahalli lake restoration program in partnership with United Way and BBMP - the local government body as part of CSR.

GE HealthCare's is commitment to cut 50% of scope-1 direct emissions and scope2 energy emissions by 2030 has set actions in motion to reduce and reach the goal of net zero by 2050.

### HOW DOES GE HEALTHCARE PLANS TO CONTINUE TO ACHIEVE ITS ESG GROWTH OBJECTIVES?

We believe culturally engraining the purpose of ESG is very critical to continue and sustain this vision. We leverage people ideas, kaizens and lean methodologies of waste elimination to add speed and direction. Sustainability is also part of our EHS framework helping us keep up to regulations and standards making us pivot to dynamic needs. We bring focus through active trending of KPI in daily management systems, also have shark tank funded projects, enabling ESG ideas become reality. Engaged colleagues and focused strategies to reduce GHG releases is helping us provide ecofriendly and environmental conscious design and technical solutions.

---

## ESG CHAMPIONS OF INDIA

---

Dun & Bradstreet recently launched the “ESG Awards” which recognized organisations who are champions in implementing ESG. A jury panel comprising of industry experts selected the “D&B ESG Champions” based on multiple excellence factors.

Here is an overview of the ESG initiatives undertaken by the D&B ESG Champions submitted as part of their nomination to these awards.

## ESG Champions of India 2023 Award Winners List

Segment	Categories	Winners
 Environment	Natural Resources Conservation	TATA Consultancy Services Limited
	Climate Impact	Hari Krishna Exports Private Limited
	Environmental Risk and Opportunities	Tech Mahindra Limited
 Social	Human Capital Development	Eicher Motors Limited
	Product Quality Management	The Karur Vysya Bank Limited
	Customer & Supplier Engagement	Britannia Industries Limited
	Community Engagement	ICICI Securities Limited
 Governance	Corporate Governance	ICICI Prudential Life Insurance Company Limited
	Corporate Behaviors	Schaeffler India Limited
	Business Sustainability	L&T Finance Holdings Limited
 Overall ESG	Overall ESG Excellence	Bharti Airtel Limited

## TATA Consultancy Services Limited

Dun & Bradstreet D-U-N-S® No 91-615-2424

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Technology & Communications	Natural Resources Conservation	167,827

### Company's ESG initiatives and its impact:

- **Energy & Carbon:** The company has added more green buildings, installed roof top solar PVs across campuses. The company has reduced the scope 1 + 2 emissions by 66% in FY22 against base year FY16. Total on-site roof top solar capacity across owned campuses is 10.2 MWp and the total electricity generated from in-house solar plants is 11.3 million units which contributed to 3.76% of total electricity use in the reporting year.
- **Water:** The company consumed 1.44 bn liters of fresh water in FY22. Whereas 5.2% of water from RWH, 86.4 % from third party sources and the remaining 8.4% from ground water.
- **Waste:** Potentially hazardous and regulated wastes such as e-waste, lead-acid batteries and waste lube oil are disposed of through government approved recyclers as per regulations. TCS has recycled 100% of paper, packing and plastic wastes. Further, TCS campuses have provision of organic waste treatment technologies - biodigesters, organic waste converter (OWC) & vermicomposting to handle food and garden waste.
- **Biodiversity:** The company has effectively implemented TCS Biodiversity Program, which resulted in supporting 593 species of flora and 183 species of fauna as well as 39,276 well grown trees within the TCS campuses.
- **Certification:** ISO 9001:2015 (Quality Management), ISO 20000:2018 (IT Service Management), ISO 22301:2019 (Business Continuity Management), ISO 27001:2013 (Information Security Management) and compliance to ISO 27017:2015 (Information Security Controls for Cloud Services), ISO 27018:2019 (Protection of PII in Public Clouds as PII Processors) and ISO 27701:2019 (Privacy Information Management Systems).

## Hari Krishna Exports Private Limited

Dun & Bradstreet D-U-N-S® No 92-108-9103

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Consumer Goods	Climate Impact	10,698

### Company's ESG initiatives and its impact:

- **Climate Initiative:** The Dholakia Foundation has committed to conserve and improve the natural resources with an ambitious goal and a noble effort of over 25 lakh tree plantations, including raising them and developing 109 lakes (Sarovar) under Mission100 Sarovar in various parts of Gujarat and in different regions of India. The company foundation has created 110 lakes (Sarovars) under our #Mission100Sarovar in Saurashtra, Southern Gujarat, and different regions of India starting in 2008. The surface water bodies constructed under the mission100sarovar have aided in increased groundwater recharge, which was evident from the high water table from 15 -20 wells within the 500m range and 10-20 wells within the 500-1000m range of water resource structures.
- **Biodiversity Initiative:** The company has increased green cover in the areas surrounding it by up to 18 km and introduced new varieties of plants. It has also improved soil quality with a significant reduction in salinity. Furthermore, the initiative has resulted in a 50% increase in groundnut and cotton crop productivity, as well as a more than 50% increase in Kharif Pearl Millet productivity.
- **Water Initiative:** Water is available around the year, not only for domestic use but also for irrigation. Water quality improved from 1500 TDS to 450-500 TDS and continues to improve year after year. The groundwater level has improved significantly and is now at 30 feet, compared to 500 feet a few years ago. In villages like Vandlia, Akala, and Shekh Pipaliya, there has been a 30-40% reduction in TDS from 1100-1800 ppm to 900-1300 ppm during winters due to water retaining structures. There has been a drastic fall in TDS in wells in Dudhala and Devaliya villages from 3500 ppm to 2200-2500 ppm.

## Tech Mahindra Limited

Dun & Bradstreet D-U-N-S® No 65-007-9572

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Technology & Communications	Environmental Risk and Opportunities	36,249

### Company's ESG initiatives and its impact:

- **Climate & Energy Initiative:** Strategies and initiatives related to transition to low carbon operations and resource efficiency has helped Tech Mahindra to reduce operational (Power and fuel, maintenance etc.) costs by 4.31%. Further, the company scope 1+2 reduced by 10.09% against FY21 and 41.52% against base year FY16.
- **Energy Initiative:** GHG emission reduction of 17965 MTCO<sub>2</sub>e. The increased renewable energy from 1.8% in FY16 to 22.9% in FY22. Energy intensity reduced by 26.62% against last year FY21 against employee headcount. During the year, the company have saved 22.99 Mn units of electricity consumption through Renewable Energy and 6.42 Mn units through LED and 1.82 Mn units through motion sensors.
- **Water Initiative:** Tech Mahindra conducts regular pollution and other water quality tests for the safety and hygiene of incoming water supply to avoid disruption in operations. Recycled more than 235.40 mn litres of water through treatment plants across

locations making the locations zero discharge. 1.3 million liters of ground water level Recharged through Rainwater Harvesting Plants in FY22. Water Management company address water stress by recycling and reusing wastewater through STPs, investing in rainwater harvesting plants to recharge groundwater levels and installing water sensors and restrictors to manage water consumption. Further, in-house water recycling systems are installed at campuses which recycle 40% of total water consumption. Additionally, the company has partnered with Smart Energy Water (SEW) to accelerate digital transformation for the energy and water utility industry.

- **Certificates:** ISO 14001: 2015 (Environmental Management System), ISO 22301: 2019 (Societal Security and Business Continuity Management System), ISO 45001- Hyderabad & Bangalore, LEED certified (Pune, Chennai & Bangalore), ZWL certified (Hyderabad & Bangalore).

## Eicher Motors Limited

Dun & Bradstreet D-U-N-S® No 65-012-6683

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Transportation	Human Capital Development	10,577

### Company's ESG initiatives and its impact:

- **Training & Development:** The company's learning and development function draws up and executes an annual calendar offering customized and open format external nominations. Few programmes include - Emerging leaders programme, Campus talent program, REFresh, new classic product launch training session. Internal and External course for skill development conducted 38,311 hours training and a total of 2,319 employees received a career development review. Zero fatalities and recorded work-related injuries and no health issues related to identified health hazards in 2022.
- **Health & Safety:** The Company implements a robust Occupational Health and Safety (OHS) management system based on ISO 45001 to continually ensure that its people work in safe conditions. They also have an Integrated Management System (IMS) and incorporates suitable tools like Hazard Identification & Risk Assessment (HIRA).

- **Human Rights:** Has a Human Rights Policy in line with international standards such as the United Nations Guiding Principles on Business and Human Rights and the International Labour Organization's Declaration on Fundamental Principles and Rights at Work. The Company continues to train employees and the contract workforce on human rights, non-discrimination, and sexual harassment at the workplace. It also has a Supplier Code of Conduct which requires suppliers to uphold human rights in their businesses and any instances of violations can be raised and addressed via a grievance redressal mechanism as well as the Company's whistle blower policy.
- **Diversity & Inclusion:** The Company is an Equal Opportunities Employer and invites participation of women and encourages gender-based inclusion and diversity at all levels of the organization. In 2022, EML has one woman on its Board as an Independent Director. Women employees are 993 and constitute around 7.6% of EML workforce.

## The Karur Vysya Bank Limited

Dun & Bradstreet D-U-N-S® No 91-535-5189

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Financials	Product Quality Management	6,357

### Company's ESG initiatives and its impact:

- **Digital Initiative:** The bank continues to pursue its strategy of energy conservation, extending the scope of green lending products, and making inroads into digitisation of processes. Further, the bank has digitized its entire range of products in the Loan Portfolio viz. Retail Loans, Commercial Advances and Corporate Borrowings along with incorporation of new functionalities in Internet Banking, Mobile Banking and Digital Lending System.
- **Green Initiative:** The bank is practicing strategy to enhance its offerings in line with larger sustainable goals, such as green lending, financial inclusion, community development and thrust on digitisation of products. Furthermore, all the E-waste are disposed as per the E-Waste management policy of the bank at the end of life period.
- **Data security:** The bank implemented Network Behaviour Analyser (NBA) and Deception Technology to restrict cyber-

attacks and theft detection. NBA Interrupts the cyber-attacks based on behavior analysis which overcomes the impact on regular business operations. Whereas Deception Technology detect the suspicious activity at the early stage of attack. Further, the bank has implemented next generation firewalls to enhance the network security to the next level.

- **Certification & Rating:** The bank is ISO 27001:2013 certified. The bank holds credit rating of A1+ by CRISIL, ICRA and A+ by India Ratings & Research.

## Britannia Industries Limited

Dun & Bradstreet D-U-N-S® No 91-533-1594

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Food & Beverage	Customer & Supplier Engagement	13,731

### Company's ESG initiatives and its impact:

- **Supplier Assessment Initiative:** Britannia has developed a Supplier Assessment Tool 'Paryavaran' (score-based) to assess new and existing suppliers in line with its suppliers' code of conduct. This enables reviews key supplier scorecards quarterly and drives quality improvements that provide lasting value to suppliers. The company performs exhaustive suppliers' quality audits and maintains strict control to ensure reliability and traceability. Britannia has also implemented Vendor Quality Assurance Program (VQAP) across the supply chain to integrate, monitor and control quality at all stages.
- **Aligning ESG parameter:** The company has a robust quality inspection system in place to ensure that best quality raw materials and packaging essentials are procured at its factories. In FY22, 85% of the procurement budget was spent on sourcing within India. Currently share of palm oil procurement from RSPO members stands at 73%, which ensures that the production of palm oil, a key ingredient in the company's products, adheres to established environmental and social criteria.

- **Customer Safety:** The company's Consumer Care Cell is compliant to the 'Global Standards on Quality Management for complaints handling in organizations'. To address Iron Deficiency Anaemia (IDA), company's R&D team developed a tasty and affordable Iron & Folic Acid fortified biscuit delivering 50-75% Recommended Dietary Allowance (RDA) of these nutrients to the adolescent girls and women.

- **Production:** All existing manufacturing units of the company are ISO -22000, 'Hazard Analysis Critical Control Points' (HACCP) certified and operate in compliance with stringent food safety and quality standards. In FY22, the company resumed the audits conducted by American Institute of Baking (AIB) in January 2022 and received certification for 14 of its manufacturing units for compliance to Global Food Safety Standards.

- **Green Certification:** All the Britannia's sites are ISO: 45001 (Occupational Health and Safety Management Systems) certified.

## ICICI Securities Limited

Dun & Bradstreet D-U-N-S® No 86-219-8033

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Financials	Community Engagement	2,585

### Company's ESG initiatives and its impact:

- **Skill Development Initiative:** ICICI Foundation set up the "ICICI Academy for Skills" that provides free skill development training to the lesser privileged youth. Under this initiative around 7,700 youth got trained during the year, out of which 89.6% got job placement.
- **Health Care Initiative:** The company have promoted physical and mental well-being via this initiative. Under this initiative ICICI extended critical support to 200+ needy cancer patient with TATA Memorial Centre. Offered medicines, medical equipment for treatment support of COVID patients at the Government hospitals in Mumbai through collaboration with THE EKAM FOUNDATION where around 3000+ patients benefited. Further, 60 oxygen concentrators and 16 oxygen plants were developed and installed at different government hospitals including 5 different Border Security forces hospitals under Mission Bharat O2.
- **Clean Water Initiatives:** ICICI Securities had supported a start-

up of SINE-IIT BOMBAY, to install two water treatment units at Kishore and Edvan village, each filtering 2.5 lakh Lt/day.

- **Social Initiatives:** ICICI Securities supported SINE incubate start-ups that focused on R&D to find new solutions for health conditions that include cancer, Parkinson's disease, rapid testing of mosquito-borne diseases, prosthetic limbs with senses, metabolomics data analysis, etc. with the potential to create a large and beneficial social impact in the health sector. Further, through project Hameri, ICICI Securities empowered 500+ women living in the Corbett landscape in Uttarakhand by assisting them in generating income through their skill of turning locally available grass into useful, environmentally friendly, and durable objects.
- **Environmental Conservation:** ICICI securities supported in planting a total of 15,000 trees in Tamil Nadu's Villupuram district, the plantation area included 30 villages with 850 households, more than 2,600 individuals were involved of which about 51% are women.

## ICICI Prudential Life Insurance Company Limited

Dun & Bradstreet D-U-N-S® No 91-534-1275

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Services	Corporate Governance	645,781

### Company's ESG initiatives and its impact:

- **Business Ethics:** The company's Code of Conduct ("Code") defines the professional and ethical standards that employees and Directors need to adhere to. Further, ICICI Prudential have framed policies against Sexual Harassment at Workplace, Anti-Bribery & Anti-Corruption Policy, Anti-Money Laundering Policy, Compliance Policy, Framework for Managing Conflict of Interest, Insider Trading Code, Whistle Blower Policy (WB Policy), Information and Cyber Security Policy and Fraud Risk Management Policy. Additionally, the company has spent INR 68.2 million for FY22 towards CSR programs as against INR 67.6 million required to be spent.
- **Board Accountability:** The Board comprises five non-executive independent Directors, three non-executive Directors, representing promoter shareholders and the Managing Director & CEO. Except the Managing Director & CEO, all other Directors including the Chairman of the Board are non-executive Directors. The Chairman of the Company is an

Independent Director. The Internal Audit Department (IAD) of the company acts as an independent entity and reports to the Audit Committee of the Board. Further, the company's corporate governance philosophy is founded on an effective independent board, including the separation of Board's supervisory role from the executive management.

- **Business Transparency:** Detailed and transparent information flow from the senior management to the Board and Board Committees, through well documented agenda notes, to effectively monitor the operations of the company. The company's framework for managing Conflict of Interest that clarifies the principles and the measures to manage potential conflicts of interest at the individual and the organization level, to conduct its activities in an ethical and transparent manner.
- **Green Certification:** The company has been accredited with ISO 22301:2019 certification for business continuity management processes and ISO 27001:2013 for Information Security management systems.

## Schaeffler India Limited

Dun & Bradstreet D-U-N-S® No 65-072-6904

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Transportation	Corporate Behaviors	5,633

### Company's ESG initiatives and its impact:

- **Governance Structure:** The company's board of directors and senior management are responsible for establishing measures of corporate governance and ensuring compliance. Schaeffler India's compliance management, risk management, and internal control systems serve to identify and manage risks, and internal audits are conducted to ensure an independent check on their effectiveness.

The company has spent INR 20.2 million on healthcare and impacted the lives of 80,000 people; INR 18.8 million has been spent on occupational skills for better employability, and the lives of 854 youths have been impacted. Further, for the preservation of national heritage, art, and culture, the company has spent INR 1.6 million; for society empowerment, INR 47.7 million has been spent, and 10,500 lives have been impacted.
- **Training and Development:** The company has provided safety & skill up-gradation training to all the employees. 100% of the employees were trained in ethical practices. Further, the company is engaging with suppliers to help with the onboarding process on two platforms, 'SupplyOn' and 'Coupa'. The company has 354 direct material suppliers and has imparted 175 hours of training to various suppliers.
- **Certification:** The company is IATF 16949, ISO 9001:2015, and ISO 45001:2018 certified.
- **Awards:** The company has been awarded Gold Award at Excellence in Supply Chain 2020, Zero-Defect Supplies Award, Runner Up for Energy Efficiency and Conservation.

## L&T Finance Holdings Limited

Dun & Bradstreet D-U-N-S® No 85-966-0500

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Financials	Business Sustainability	350

### Company's ESG initiatives and its impact:

- **Natural Conservation:** L&T Finance Holdings Limited (LTFH) has been actively working to bridge India's funding gap for climate action. During FY22, the Company financed 2,909 MW of wind and 3,024 MW of solar projects, which resulted in 22.62 Lakh tCO<sub>2</sub>e emissions being avoided. The company has financed 5,450 EVs and 5,933 MW of green energy and helped avoid ~2 million tCO<sub>2</sub>e emissions. The company has reduced ~20% of its carbon emissions based on estimated footprint and ~47% YoY reduction in desktop paper consumption.
- **Energy Management:** The Company has entered into an agreement to replace fossil fuel-based electricity with green power from a leading electricity utility company. This shift has helped LTFH avoid 228.44 tCO<sub>2</sub>e emissions. The corporate office has also been certified as a LEED Gold-certified building.
- **Product Sustainability:** The company focuses primarily on financing long term sustainable projects in renewable energy, roads, transmission, airports, and city gas. All the finance activities funded through proceeds from AIIB and IFC, LTFH conducts due diligence for the investment/project to ensure compliance with applicable environmental, health, safety and social laws, regulations, and standards as well as ratified international conventions.
- **Green Certification and Awards:** The company's is ISO 27001 certified. In FY22, the company won various awards and ESG Ratings such as, SAP ACE Awards 2021-The Disruptor Best Finance Transformation, Quantics BFSI Excellence Awards-Technology Leader Infra finance, Socio CSR Film Festival 2022- Best Social Community Project Film, Asia Sustainability Reporting Awards by CSR Works, The Company's management regularly reviews a comprehensive compliance report.

## Bharti Airtel Limited

Dun & Bradstreet D-U-N-S® No 65-032-7992

SASB Major Industry Category	Award Category	Total Income (₹ Cr.)
Technology & Communications	Overall ESG Excellence	72,065

### Company's ESG initiatives and its impact:

- Environment Initiative:** Bharti Airtel has deployed 9,823 lean towers in FY21 and 12,460 in FY22. These towers do not operate on diesel, thereby reducing emissions by 69%. Over 98,773 sites, including owned and partner sites, have been tagged as green sites till FY22, consuming less than 100 litres of diesel per quarter. The company installed 1911 advanced Valve-Regulated Lead Acid (VRLA) batteries and lithium-ion batteries in FY22 to optimize energy consumption and reduce reliance on diesel. A total of 43,373 VRLA and Li-ion batteries installed by March 2022. Additionally, Airtel converted 2,247 indoor BTS sites to outdoor sites in FY21 and 3,911 sites in FY22, reducing BTS energy consumption by 25%. Installed 31 rooftop solar plants at data centers and main switching centres with a total installed capacity of 1.78 MWp. Rooftop solar plants have resulted in estimated savings of 1,354 tonnes of CO<sub>2</sub> emissions in FY22. The company signed open access contracts or power wheeling agreements for procuring 91,261 MWh of green energy in Main Switching Centres and data centres leading to a reduction in carbon emissions.
- Social Initiatives:** Airtel promotes local procurement from India-based suppliers, which constituted 96.15% of total suppliers in FY22, accounting for approximately 93% of procurement spent. The flagship initiative to provide quality education to underprivileged children, completely free of cost, supported 39,000+ students and employed 1,393 teachers. Under the cleanliness and sanitation drives, the company supported 217,129 beneficiaries, and 32,149 toilets were constructed.
- Governance Initiatives:** Airtel has spent INR 95 Mn on all training programs. Around 95% of employees are covered in health & safety training. Highest standards of corporate, financial, and operational disclosures the company has been rated GVC Level 1 by CRISIL for corporate governance practices and value creation.

## Elcom International Private Limited

**Dr Girish Vaze**

Managing Director – Elcom International Pvt Ltd.

### WHAT DOES ESG MEAN IN THE CURRENT SCENARIO, AND WHAT ESG INITIATIVES HAS YOUR COMPANY TAKEN IN THE PAST 2 YEARS?

At Elcom, we are dedicated to incorporating ESG principles into our business practices. We provide products for solar, electric vehicles, data center power usage efficiency, and other environmentally-friendly applications. Our manufacturing plant has a solar rooftop, which saves at least 40% of our energy costs and mitigates carbon dioxide emissions up to 12,977 tonnes. We use treated sewage and effluent to irrigate our gardens and conserve water. In terms of social initiatives, we support blue-collar workers and their families, differently-abled children through "Helpers of the Handicapped" in Kolhapur, orphans of military personnel, HIV patients, and education of underprivileged children through "Vanasthali Rural Development Centre" in Pune.

### HOW DOES ELCOM INTERNATIONAL PRIVATE LIMITED ENGAGE WITH ITS STAKEHOLDERS (I.E., CUSTOMERS, EMPLOYEES) TO IMPLEMENT ESG INTO PRACTICE?

Elcom engages with its stakeholders to implement ESG practices and demonstrate its commitment to sustainability and responsible business practices. We provide RoHS and REACH compliant products to customers to ensure that our products have no negative impact on the environment or society. Our products are designed using environmentally-friendly raw materials, and our engineers and employees are trained to select ESG-compliant raw materials.

### HOW DOES ELCOM INTERNATIONAL PRIVATE LIMITED PLAN TO CONTINUE IMPROVING ITS ESG PERFORMANCE IN THE FUTURE?

Elcom plans to conduct an ESG audit to evaluate the impact of its operations on the environment and society, identify areas of improvement,

and set measurable goals for the company to achieve. We will engage with our customers to understand their expectations and concerns regarding ESG practices and develop products and services that align with ESG principles. We will educate our employees on ESG practices and encourage them to incorporate these practices into their daily work through training programs. We will collaborate with our suppliers to ensure they also adhere to ESG practices. We plan to report our ESG performance to stakeholders, including customers, investors, and employees, using reporting frameworks such as the Global Reporting Initiative (GRI) or the Sustainability Accounting Standards Board (SASB) to provide transparent and consistent information about our ESG performance.

## Highway Industries Limited

**Umesh Munjal**

Chairman cum Managing Director

### HOW WOULD YOU DESCRIBE THE JOURNEY OF YOUR COMPANY SINCE ITS INCEPTION? WHAT ARE SOME OF THE KEY MILESTONES OF THE COMPANY IN RECENT YEARS?

I, Umesh Munjal, founder of Highway Industries, with a vision and passion to forge ahead, steer the group like a true Industry Captain. I lead with a futuristic strategy to scale global heights, all the while, maintaining the competitive edge with investments in technological advancements, perfectly tuned for tomorrow.

At present we have four expansive well designed manufacturing plants that are located in the industrial Hub of Ludhiana and Pune Each one of our plants is spread over a large sprawling area creating the perfect space and ambience for a positive work atmosphere. This leads to a healthy and progressive workforce, that finally results in greater productivity.

Highway Industries is a leading supplier of forged components in the automotive industry. Spanning the global market Highway specializes in hot, cold and warm forging of precision engineered machine automotive parts for the domestic and overseas markets.

### WHAT HAS BEEN THE SUCCESS MANTRA OF YOUR COMPANY?

The Highway Industries group philosophy is characterized by its futuristic vision. Investing in advanced technologies and staying ahead with the latest expertise and skill sets in the industry.

Precision engineering at Highway leads to high quality standards. The use of latest equipment and technology helps to maintain a high level of operative excellence.

Highway Industries follows a high standard of professionalism with a zero tolerance for error. It improves on its own benchmark, all structured on perfection, leading towards excellence.

### WHAT IS YOUR COMPANY'S GROWTH STRATEGY FOR NEXT 3-5 YEARS?

Highway is a global supplier of automotive high precision steel forging component. Highway's customers include 2-wheeler, 4-wheeler, tractor, off Road Vehicle Manufacturers, White Good Manufacturers and Tier 1 supplier to OEMs like Hero MotoCorp, Escorts, Maruti, LG, Samsung and domestic and International Tier-1 Suppliers to OEMs. The company is the one of the India's largest forging Exporter Company. To move from ₹ 5032 million Annual revenue in 2017-18 to ₹ 10,000 million in 2022-23, it was required to expand the talent pool, develop leaders and put up a new manufacturing plant at new geographic location. Further the company has targeted to achieve ₹ 20,000 million annual revenue by 2027-28. With this commitment the company is expected to become a key pillar in Forging Industry's growth in India across the Globe.

# Dun & Bradstreet Knowledge Platforms and Learning Solutions

Dun & Bradstreet India has been tracking the Indian economy for more than two decades. Through our knowledge platforms and publications, we place the success stories of Indian Companies on a global platform. Our platforms are designed to help you position your brand in front of potential customers, investors, suppliers, government bodies, regulators and other stakeholders. We also provide a suite of professional training, educational courses and innovative knowledge forums & conferences.

## ESG WARRIORS OF INDIA

---

Dun & Bradstreet recently launched the “ESG Awards” which recognized organisations who are champions in implementing ESG. A jury panel comprising of industry experts selected the “D&B ESG Champions” based on multiple excellence factors.

Every initiative counts. Therefore, we also consider those who did not become D&B ESG Champions, as important contributors to sustainable development. These companies have been listed in this section.
