A BANK YOU CAN CALL YOUR 'OWN'

Vishwavir Ahuja
Managing Director & CEO

I would like to congratulate Dun & Bradstreet for successfully entering into the 10th year of the SME Business Excellence Awards. We, at RBL Bank, are delighted to share this platform with Dun & Bradstreet for the 4th consecutive year, to acknowledge and reward the accomplishments of the Micro, Small and Medium Enterprises (MSME) sector.

The MSME sector has been the backbone of the Indian economy. It has undoubtedly emerged as the most vibrant and dynamic sector in the past few years. It contributes to 29% of India's Gross Domestic Product and has created 11 crore jobs till now, taking their total contribution to the workforce to 45%. By facilitating the development of rural and backward areas, it is ensuring equal distribution of national wealth.

## Message

Having said that, low access to finance, shortage of skilled workforce, lack of technology, inadequate availability of infrastructure are some of the key challenges faced by the sector. The Government has started taking steps to mitigate them and announced various initiatives.

To start with, our Hon'ble Prime Minister's vision of India becoming a \$5 trillion economy by 2024-2025 will prove to be a vital starting step towards the reforms. A key part of the vision is to increase the MSME sector's contribution from 29% to 50% of the GDP. The vision also plans to create 5 crore additional jobs in the next 5 years. The Finance Minister has already introduced some of the reforms like decreased tax rates, accelerated GST refunds, additional credit expansion through PSBs. The Government is not only focusing on enhancing the credit flow but also providing aids to upgrade the technology. It is equipping the MSMEs sector digitally to leverage technology, to compete effectively with their global counterparts and play a crucial role in the 'Make in India' campaign.

As a financial institution, we also feel responsible to address the challenges to the extent possible and provide an enabling environment for the growth of this sector.

We, at RBL Bank, feel more connected with this segment. MSMEs would be able to relate themselves with our journey from being a small regional bank to a Pan-India innovation driven bank. Our journey began with offering simple lending solutions but we have widened our spread to forex management, digital banking platforms along with financial advisory solutions.

As a part of our contribution in achieving the \$5 trillion economy goal and supporting the MSME segment, we continue to provide effective lending rates to customers, provide easy and faster access to finance and come up with innovative and need based solutions like Vendor Payable Finance as well as new product offerings such as RFX an online forex platform. Being the pioneers of digital banking an exclusive 'Banking As A Service' team, we offer customised digital solutions like digital wallet, virtual prepaid cards etc.

Pushing the sector to act as a catalyst to bring socio-economic growth, will definitely help us achieve the goal of a \$5 trillion economy and RBL Bank will continue extending its support towards it.

Make smart credit decisions faster, keep a watchful eye on accounts and monitor portfolio trends

GROWING RELATIONSHIPS THROUGH DATA

Manish Sinha
Managing Director – India
Dun & Bradstreet

Dun & Bradstreet India (D&B) is pleased to announce the 10th edition of its publication 'Leading SMEs of India' jointly with RBL Bank Limited. The publication provides insights on Micro, Small and Medium Enterprises (MSMEs) in India.

The government has set a target for India to become a US\$ 5 trillion economy by FY25. It is envisaged that of this US\$ 5 trillion, MSMEs will contribute 50% of GDP; the current contribution is 30%. To achieve this, MSMEs will have to contribute 75% of the incremental GDP between FY19 and FY25 (US\$ 1.9 trillion). When we look at the universe of economic entities in India, MSMEs account for more than 99% of the 'commercially visible' economic entities while contributing only 30% of the GDP. Large companies, which make up 1% of the count of entities in the country, also contribute around 30% of the GDP. This shows that the

## Preface

contribution of MSMEs to overall growth is low. To realize their potential, MSMEs should be provided with an enabling eco-system to accelerate their growth. D&B has been engaged with MSMEs over the years, and our studies repeatedly indicate an MSME need for three growth accelerators. Access to finance emerged as the single largest accelerator for growth followed by cluster development and access to markets.

demand for MSMEs First, finance is approximately ₹88 lakh crores, which is met by formal and informal sources of finance. However, this is only the "evidenced need". There is an additional borrowing need that is not being addressed as yet. Only 12% of the evidenced need comes from formal sources. Of the formal sources, 50% is contributed by the government: that is only 6% of the evidenced need. This provides a great opportunity to the private sector to increase their share in the formal supply of finances. We have found that the average Return on Capital for micro enterprises that are able to access formal credit is around 19%, while the micro enterprises that do not have access to formal credit generate an average Return on Capital of 2%.

The second important accelerator for their growth is cluster development, 'Clusters' are geographic agglomerations of companies, suppliers, service and associated providers, institutions which form an ecosystem for firms to exist and grow. The World bank measures the cluster development of countries through an index 'State of Cluster Development'. Interestingly, it has a very high correlation with the Global Competitiveness Index. cluster development index improves, competitiveness of a country improves, and this will certainly support GDP growth.

The third important accelerator is access to markets. There are barriers to access to markets, the government and various private players are working towards resolving some of these barriers like find business partners, securing export finance or sell online. Further, a good digital outreach platform can also help even a small company to reach out to a wider market. Unfortunately, about 2/3rd of MSMEs are still digitally offline.

I hope you will enjoy reading 'Leading SMEs of India 2019', and I look forward to receiving your valuable feedback and suggestions.

## Learning & Economic Insights Group

Enhancing customer experience through knowledge, research and insights

Dun & Bradstreet's Learning & Economic Insights Group (L&EIG) conducts high-end business research and analysis. L&EIG has been tracking the economic scenario and business landscape closely for over a decade. It has been our constant endeavour to showcase the success stories of Indian companies at a global level. We develop customised platforms for organisations to showcase their products, services, strengths and capabilities. Our offerings include:

- Awards
- Conferences

- Trainings

GROWING RELATIONSHIPS THROUGH DATA

Pankaj Khanna
Head – Learning & Economic
Insights Group
Dun & Bradstreet India

Dun & Bradstreet has always believed in the power of small and medium enterprises (SMEs) for the socio-economic development of the country. For the fourth time in a row. Dun & Bradstreet and RBL Bank Limited have come together to reinforce their commitment towards the development of SMEs. As a sign of this commitment, we are launching the tenth edition of the publication 'Leading SMEs of India 2019'.

The publication profiles 34 award winners who were felicitated at the 'SME Business Excellence Awards 2019'. It also features 208 high performing businesses that have shown strong growth potential. These businesses belong to various manufacturing and services sectors namely Auto Chemicals. components. Digital & Fintech Solutions, Education & Health Services,

# **Executive Summary**

Electrical & Electronic Goods. Engineering & Machinery, Food Processing & Agro Products, IT & IT Enabled Services. Plastic & Plastic Products. Pharmaceuticals, Professional & Business Services. Renewable Energy, Textiles & Garments, Transportation & Logistics, Travel, Tourism & Hospitality. Continuing the legacy from the previous editions, in addition to the sector awards, winners were also selected for the theme-based awards such as 'Best Global Business', 'Most Innovative Company', 'Best Woman Entrepreneur', 'Most Socially Responsible Company', 'Best Employment Initiatives' and 'Best Green Initiatives'. This year we also introduced three new categories 'Tech Company of the Year', 'Best Start-up Initiative' and 'Make in India Initiative'.

These awards and the publication have been conceptualized keeping mind the Government's vision of making India a US \$5 trillion economy by 2024. MSMEs form the key component of this vision because of their ability to generate employment, skill people, contribute to the exports and help India substitute its imports. Keeping in mind the pivotal role of SMEs in national development, the government is taking several

initiatives to strengthen the SME sector. Some of these include setting up of TReDS exchange platform which is expected to solve the SMEs' working capital issues. They plan to, introduce a rating system to enable these enterprises to avail credit easily. In addition, the launch of a new e-Commerce website 'Bharat Craft' is envisaged to enable MSMEs to sell their products in the local as well as in the international markets. Multiple other initiatives are also planned alongside to provide hands-on training to these enterprises on the latest technologies and create awareness amongst them on the Government's schemes and policies to ensure that SMEs become more competitive.

& Bradstreet Dun India will continue to track the development of the SME sector through our future endeavours. We are confident that this publication will serve as a reliable source of reference to the stakeholders of the SME ecosystem. Dun & Bradstreet's global footprint will ensure that the success stories of high performing SMEs and Mid-Corporate businesses reach all relevant stakeholders across the globe. We look forward to receiving your feedback and suggestions.

# Methodology

'SME **Business** Excellence Awards 2019' is a joint initiative by Dun & Bradstreet and RBL Bank Limited for recognizing and felicitating the leading small and medium enterprises (SMEs) and Mid-Corporates in India. This edition of awards has recognized 34 winners across various sectors and theme-based categories. The various sectors include Auto Components, Chemicals. Digital & Fintech Solutions, Education & Health Services, Electrical & Electronic goods, Engineering & Machinery, Food Processing & Agro products, IT & IT enabled services, Pharmaceuticals, Professional & Business Services, Renewable Energy, Textiles & Garments and Transportation & Logistics. Further, the initiative also recognizes success stories in the theme-based categories such as Best Global Business, Most Innovative Company, Best Woman Entrepreneur, Most Socially Responsible Company, Best Employment Initiatives, Best Green Initiatives, Tech Company of the Year, Best

Start-up Initiative and Make in India Initiative.

The Awards, in conjunction with the publication 'Leading SMEs of India 2019', acknowledges and highlights the achievements of leading Indian SMEs and Mid Corporates in their respective categories.

#### **Eligibility Criteria**

Small and medium enterprises are defined as companies with FY19 annual turnover between ₹ 50 mn - 2,500 mn. This is based on the revised definition for MSMEs (micro, small and medium enterprises) proposed by the new government. The Mid-Corporate category defined as companies with FY19 annual turnover between ₹ 2,500.01 mn – 10,000 mn. The companies that are purely into trading activity are not eligible.

#### **Shortlisting Process**

 Dun & Bradstreet has reached out to SMEs and Mid-Corporates across the country through multiple

- channels such as email campaign, online medium, industry associations and councils, Dun & Bradstreet's internal database, etc.
- Through this process. we have sought financial details of SMEs and Mid-Corporates for FY19. FY18 and FY17 through annual reports, audited statements, etc. In addition to financial information. companies were requested to provide qualitative information in the form of presentations, certifications. client testimonials and other documents to "Make their Own Case" for excellence.
- Dun & Bradstreet used a proprietary model (employing a combination of quantitative and qualitative parameters) to analyze various detailed submissions by companies and to shortlist probable winners across various award categories.

#### **Selection of Award Winners**

The shortlisted probable winners were duly evaluated by a very eminent panel of industry leaders and experts at a jury meeting. The final award winners were selected by the jury panel on the basis of multiple factors of excellence, during their discussion, and were agreed upon by mutual consensus.

The publication. **'Leading** SMEs of India 2019' profiles 34 award winners of 'SME **Business Excellence Awards** 2019' who have demonstrated exemplary performance their respective fields. Profiles of the award winners comprise their business operations and notable achievements that will serve as an inspiration to other entrepreneurs. In aspiring addition to the award winners. the publication features 208 companies that participated in the awards process and that have shown strong performance and potential for future. These companies are featured in a section titled "Featured SMEs".

A standardized format has been used for reporting information

received by the companies. Each company featured in the publication has been allotted a unique identification number (D-U-N-S ® - Data Universal Numbering System). This will help readers locate and obtain full-fledged information reports on these companies from the Dun & Bradstreet database.

'SME Business Excellence
Awards 2019' and 'Leading
SMEs of India 2019' is a
tribute to the SME sector
acknowledging the resilient
performance of the SME sector
in today's volatile economy.
This, we believe, will encourage
other emerging SMEs to
showcase their contribution by
their active participation in our
future editions.

We would be pleased to receive your invaluable feedback and suggestions, which we can incorporate in the next edition. Your satisfaction remains our major goal in Dun & Bradstreet's journey towards excellence.

The Indian School of Business (ISB), is a global business school offering worldclass management education across its two campuses -Hyderabad and Mohali. The School has grown at a rapid pace since its inception and already has several notable accomplishments to its credit - it is the youngest business school ever to consistently rank among the top Global MBA programmes, the first institution in South Asia to receive the prestigious AACSB accreditation, one of the largest providers of Executive Education in Asia, and the most research productive Indian management institution. A vibrant pool of researchoriented resident faculty, strong academic associations leading global B-schools and the backing of an influential Board, have helped the ISB fast emerge as a premier global Business school in the emerging markets.

ISB was established with a vision to be an internationally top-ranked, research-driven and independent management institution that grooms future leaders for India and the world. The School evolved from the need for a world-class business school in Asia. The founders, some of the best minds from the corporate and academic worlds. anticipated the leadership needs of the emerging Asian economies. They recognised that the rapidly changing business landscape would require young leaders who not only understand developing economies but also present a global perspective. ISB is committed to creating such leaders through its innovative campus by Perkins Eastman. programmes, outstanding faculty and thought leadership

The ISB brand is now represented by a network of 10,700+ accomplished PGP, PGPMAX, PGPMFAB, and **PGPpro** alumni and more than 60,000 from the Executive Education Programmes, working leading companies, government and non-profits spread across 41 countries and upwards of 500 alumni running their own ventures.

The School's rapidly-growing resident faculty, currently sixty plus in number, are PhDs from universities across world who have been steadily publishing their research in toptier journals in every field of management. Not surprisingly,

ISB has been acknowledged as the most research productive institution from India by several independent studies.

Both campuses at Hyderabad and Mohali have been designed to meet global standards of infrastructure and facilities. The Hyderabad campus has been designed by John Portman and Associates and the Mohali The buildings adhere to the international building and educational-facility-operating standards. The Mohali campus and the new additions at the Hyderabad campus are designed to meet the LEEDS Gold sustainability criteria, with energy-efficient mechanical and electrical fixtures, solar energy usage, rain water harvesting, maximised day lighting and passive environmental controls. The campuses are equipped state-of-the-art learning infrastructure - lecture theatres, auditorium, high definition video conferencing facilities to enable collaboration across locations, telepresence in the classrooms, seamless access to digital and online library resource and more.

## Overview of MSMEs in India

#### **I.Introduction**

The Micro, Small and Medium Enterprises (MSME) sector is globally recognised as the major contributor for the overall socio-economic development of a nation. In India as well, the sector has gained significance due to its substantial share in exports, Gross Domestic Product (GDP) and employment generation. MSMEs have also contributed immensely in terms of entrepreneurship development particularly in the semi-urban and rural areas of the country.

Considering the critical role that MSMEs are playing in achieving the goal of making India a US\$ 5 trillion economy, the government has taken numerous measures to further strengthen the MSME ecosystem. For example, India moved up by 14 places to the 63<sup>rd</sup> position in the World Bank's Ease of Doing Business 2020 survey. It performed better in six of the ten parameters with starting a business being one of them and the other five being - dealing with construction permits, trading across borders, resolving insolvency, paying taxes and getting electricity. Moreover, through its flagship initiatives like Make in India and Start-up India, the government has made an attempt to promote entrepreneurship, particularly in the MSME sector. At this backdrop, Dun & Bradstreet India has identified five key accelerators that will help in fostering growth of Indian MSMEs in a sustainable manner. The overview section of the report seeks to assess the current status of the MSME sector in India. It also elaborates on the five key accelerators that will play a crucial role in the sustainable growth of the sector.

Source: PIB Press Releases, Ministry of Micro, Small and Medium Enterprises, Gol

#### **Definition of MSMEs**

Micro, Small and Medium Enterprises Development (MSMED) Act, 2006 defined MSMEs based on their investment in plant & machinery for manufacturing enterprises and/ or equipment for service enterprises. In July 2018, the government introduced new criteria for classification of MSMEs through 'The Micro, Small and

Medium Enterprises Development (Amendment) Bill, 2018' on the basis of their annual turnover. Although, the MSME Bill was approved by the cabinet, it is yet to be passed in the parliament.

Criteria for classification of MSMEs as per the existing definition

|        | Micro, Small and Medium Enterprises Development (MSMED) Act, 2006 |                               |
|--------|---|-------------------------------|
|        | Manufacturing Services  |                               |
|        | Investment in plant & machinery                                   | Investment in equipment       |
| Micro  | Up to ₹ 2.5 mn  | Up to ₹1 mn                   |
| Small  | Above ₹ 2.5 mn & up to ₹ 50 mn                                    | Above ₹ 1 mn & up to ₹ 20 mn  |
| Medium | Above ₹ 50 mn & up to ₹ 100 mn                                    | Above ₹ 20 mn & up to ₹ 50 mn |

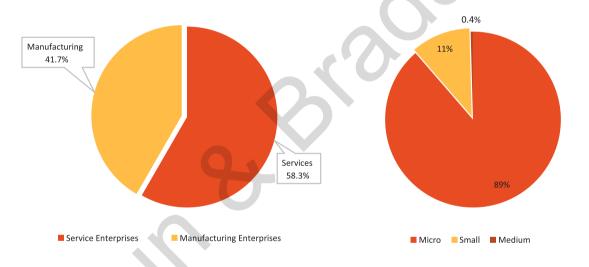

Source: Ministry of Micro, Small and Medium Enterprises, GoI and PIB Release

#### II. Overview of the MSME Sector

The data on opening of new MSMEs under Udyog Aadhaar Memorandum (UAM) reveals the recent growth trends in MSMEs segment. Since adoption of UAM in September 2015 till date, a total of 7.87 mn MSMEs have been registered in India. The classification of MSMEs based on the activity and size is as given below.

Service sector MSMEs dominate in total MSME registrations under UAM

Micro Enterprises grab the largest share in total MSME registrations under UAM

Source: Ministry of Micro, Small and Medium Enterprises

#### Five states account for nearly 60% of the UAM registrations

The state-wise distribution reveals that Maharashtra, Tamil Nadu, Bihar, Uttar Pradesh and Madhya Pradesh are the top five states which collectively accounted for 60% of total UAM registrations.

| Top five states on the basis of MSMEs registered under UAM |                     |         |
|--|---------------------|---------|
|  | No of MSMEs (in mn) | % share |
| Maharashtra  | 1.4                 | 17.7    |
| Tamil Nadu   | 0.9                 | 11.4    |
| Bihar  | 0.9                 | 10.9    |
| Uttar Pradesh  | 0.8                 | 9.9     |
| Madhya Pradesh   | 0.8                 | 9.7     |
| Total  | 4.7                 | 59.7    |

Source: Ministry of Micro, Small and Medium Enterprises

#### **Economic slowdown impacted MSME registrations under UAM**

In FY19, the number of MSME registrations under UAM witnessed substantial decline of almost 36% as compared to a slight increase of 1.5% y-o-y in FY18, pointing towards the slowing overall economic activity. While all top five states mentioned above, reported substantial decline in MSME registrations, the plunge in registrations was particularly prominent in Bihar and Madhya Pradesh which reported a decline of 52% and 49% respectively in registration of MSMEs under UAM in 2019 as compared to the previous year.

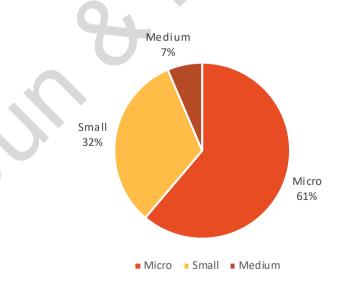

No. of UAM registered MSMEs declined in 2019

Source: Ministry of Micro, Small and Medium Enterprises

## Micro enterprises account for nearly two thirds of employment generation but small enterprises lead in investment

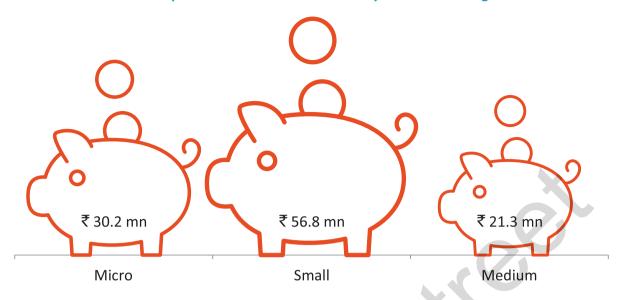

On employment generation front, 44.3 mn jobs have been generated by MSMEs registered under UAM till date. Micro enterprises which provide employment to over 27 mn people are the key employment generator within MSMSE segment.

Source: Ministry of Micro, Small and Medium Enterprises

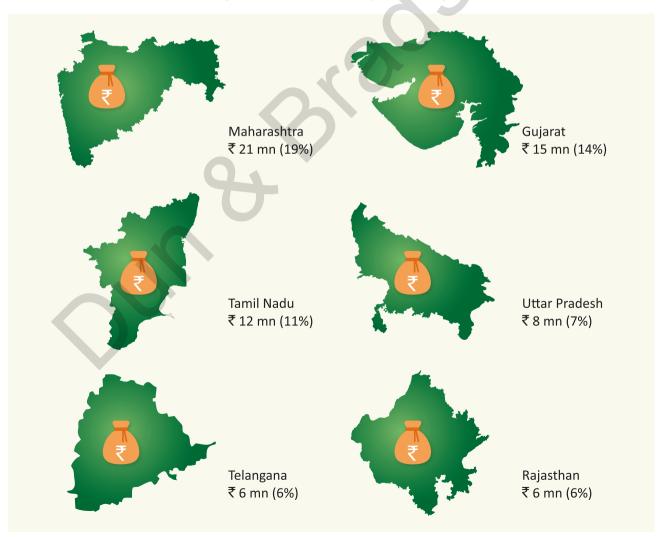

The MSME sector has reported an investment of ₹ 108 mn under UAM till date. The Small enterprises capture the highest share of (52%) investment followed by Micro (27.8%) and Medium (19.6%) enterprises. Amongst states, Maharashtra accounts for the highest share of almost 19% of total investment made by MSMEs registered under UAM till date.

#### Small Enterprises lead the investment activity within MSME segment

Source: Ministry of Micro, Small and Medium Enterprises

#### Maharashtra receives the largest investment made by MSMEs registered under UAM till date

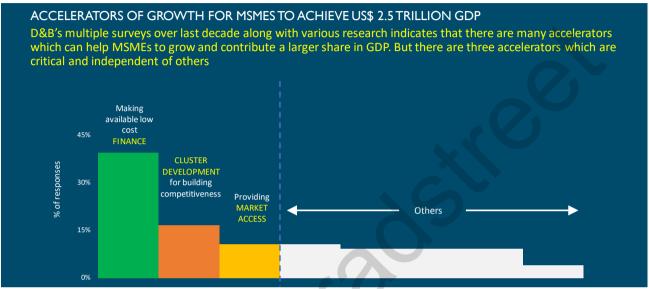

Source: Ministry of Micro, Small and Medium Enterprises

#### III. SME Accelerators – Fostering growth of MSMEs to new heights

To understand what MSMEs need to grow, Dun & Bradstreet has been conducting various surveys over the last decade to identify the key accelerators which can help MSMEs to grow and contribute a larger share in GDP. While there were many accelerators, which are critical and independent of others. These are: Availability of finance, which is single largest accelerators followed by Cluster development and Access to markets.

Fig: Key Accelerators of Growth for MSMEs

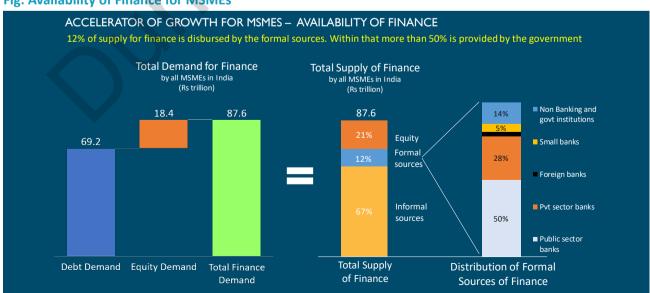

Source: Various Research, D&B survey and Research

#### 1. Making available low-cost finance for MSMEs to grow and develop

Access to easy and low-cost finance is critical requirement for the growth of MSMEs. As per a study by International Finance Corporation (IFC), the overall demand for both debt and equity finance by MSMEs was estimated to be  $\stackrel{?}{\underset{?}{$\sim}}$  87.6 trillion, which comprised  $\stackrel{?}{\underset{?}{$\sim}}$  69.2 trillion of debt demand and  $\stackrel{?}{\underset{?}{$\sim}}$  18.4 trillion of equity demand. The study further reveals that mere 16% of funding requirement is financed through formal sources, particularly scheduled commercial banks.

Fig: Availability of Finance for MSMEs

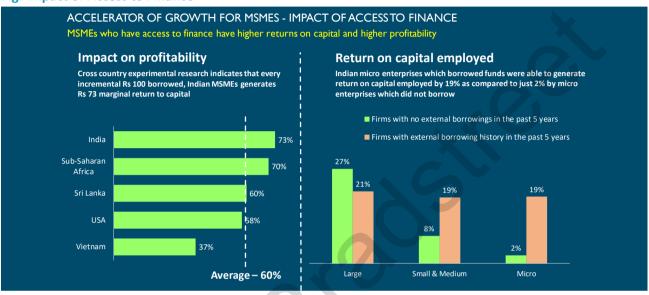

Source: IFC, World bank, D&B Research

As per the RBI data, as of March 31, 2019, the banking sector credit outstanding to MSMEs stood at ₹ 17.4 trillion. The share of Scheduled Commercial Banks in outstanding credit to MSMEs was around 90%, while that of NBFCs was 9.3% as of March 2019.

Despite increase in credit flow to MSME segment, the credit gap in the MSME sector was estimated to be ₹ 25.8 trillion. Closing this gap can unlock huge potential for the Indian MSMEs. The study conducted by Dun & Bradstreet identifies that the Indian micro enterprises that do have access to external finance reported 19% Return on Capital Employed compared to only 2% for micro enterprises that do not have access.

Fig: Impact of Access to Finance

Source: Various research, CMIE, D&B Research

Considering this, the government has taken various initiatives in the area of access to credit to close this financing gap. Moreover, measures have also been taken in the area of working capital cycle of MSMEs as almost 70% of financing demand by the MSMEs is for working capital.

| Measures   | Performance  |
|--|--|
| 2% interest subvention for all GST registered MSMEs, on fresh and incremental loans  | An allocation of ₹ 3.5 bn for FY20 as proposed by the Union Budget for 2019-20   |

| Registration of SMEs on stock exchange   | Currently 200 SMEs are registered on stock exchange   |

#### Other policy initiatives for facilitating low-cost finance and working capital management to MSMEs

- The Union Budget for 2019-20 proposed to create a payment platform for MSMEs to enable filing of bills and payment on the platform itself to eliminate delays in government payments.
- The government is in discussion with Asian Development Bank, KfW Bankengruppe (Germany) and World Bank to get their credit line for MSME finance.

#### 2. Cluster development for building competitiveness

The second important accelerator for the growth of MSMEs is cluster development. A comparison between global competitiveness index and cluster development of countries indicates a very high correlation. As cluster development improves, competitiveness of a country also improves. India ranks higher on the state of cluster development.

ACCELERATOR OF GROWTH FOR MSMES – CLUSTER DEVELOPMENT

Cluster development drives competitiveness of firms. Countries in which clusters are deep and well-developed have high national competitiveness in certain segments of industry and vice versa. The focus has to be on cluster development along with developing human capital and providing enabling environment for firms to grow

Switzspina (Switzspina (Switzspina

Fig: Country wise comparison of Global Competitiveness Index vs State of Cluster Development

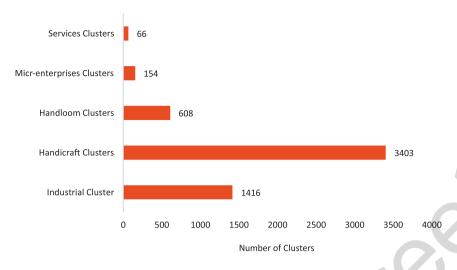

Source: World Economic Forum, D&B Research

Since the last two decades, the government is focusing on the cluster development approach in order to improve the productivity and competitiveness of MSMEs.

MSME Cluster is defined as a group of enterprises located within an identifiable contiguous area and producing same/similar products/complementary products/ services, which can be linked together by common physical infrastructure facilities that help address their common challenges.

Source: Development Commissioner, Ministry of Micro, Small and Medium Enterprises

#### **MSME Clusters in India**

Source: Foundation of MSME Clusters

To facilitate growth of MSME clusters, the government has taken various measures that mainly focus on development of infrastructure and labour (skills) for the cluster as well as ease of doing business.

The key government initiatives for Cluster Development Programme are as follows:

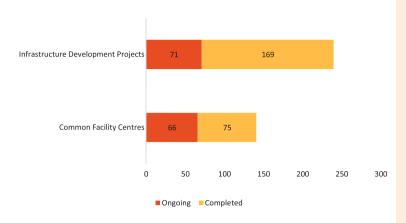

| Common Facility Centres (CFC)                                      | <ul> <li>GoI grant of 70% of the cost of project of maximum ₹ 200 mn and 90% of the cost of project for CFCs in north east areas and hilly states, island territories, aspirational districts and Left-Wing Extremism (LWE) affected area.</li> <li>The cost of project includes cost of land, building, pre-operative expenses, preliminary expenses, machinery &amp; equipment, miscellaneous fixed assets and support infrastructure like water supply, electricity and margin money for working capital.</li> </ul> |  |
|--|---|--|
| Infrastructure Development (ID)                                    | Gol grant of 60% of the cost of project (₹ 100 mn for industrial estate & ₹ 150 mn for flatted factory complex). 80% of the grant will be contributed by the Gol for projects in north east & hilly states, island territories, aspirational districts and LWE affected areas.  |  |
| Marketing Hubs/ Exhibition Centres by Associations                 | Gol grant of 60% of the cost of project to a maximum ₹ 100 mn for Product Specific Associations with SMO rating of Gold Category and above from National Accreditation Board for Education & training (NABET) and 80% for Associations of Women Entrepreneurs.  |  |
| Thematic Interventions   | Gol grant of 50% of total cost of maximum five Thematic Interventions not exceeding ₹ 0.2 mn for each in approved / completed CFC for activities like training programmes and exposure visits.  |  |
| Support to State Innovative Cluster<br>Development Programme       | The Gol financial support to state government is on matching share basis or ₹ 50 mn whichever is lower.   |  |
| Scheme of Fund for Regeneration of Traditional Industries (SFURTI) | SFURTI, a cluster-based scheme, provides assistance to khadi, village industries and coir clusters in term of improved equipment, CFCs, business development services, training, capacity building and design and marketing support.  In FY19, a total of 34,791 artisans have been benefited with an assistance of ₹ 1.4 bn.   |  |

Source: Development Commissioner, Ministry of Micro, Small and Medium Enterprises

#### **Other Policy Announcements for Cluster Development**

- The Union Budget for 2019-20 proposed to set up **100 new clusters** under the Scheme of Fund for Upgradation and Regeneration of Traditional Industries (SFURTI) during FY20. Under SFURTI, Common Facility Centres will be set up to facilitate cluster-based development particularly for Bamboo, Honey and Khadi clusters, which will enable **around 50,000 artisans to join economic value chain** while generating employment opportunities.
- The Union Budget for 2019-20 proposed to focus on skill development in the areas like artificial intelligence, Internet of Things, Big Data, 3D printing, virtual reality and robotics.
- In November 2018, the government announced to bear 70% of the cost for establishing Pharma clusters.

#### The physical performance of Cluster Development Programme

#### **Key Highlights**

- In FY20 (upto October 15, 2019), 20 CFCs and 23 ID projects were approved.
- In FY20 (upto October 15, 2019), 7 CFCs and 7 ID projects were completed.
- Till date, amongst states, Tamil Nadu has reported the highest number of 24 CFCs completed, followed by Maharashtra (12 CFCs) and Kerala (10 CFCs).
- Till date, amongst states, Tamil Nadu reported the highest number of 31 ID projects completed, followed by Haryana (28) and Rajasthan (15).

Note: Data as of October 2019

#### **Ease of Doing Business Initiatives for MSMEs**

In last few years, India has witnessed substantial improvement in World Bank's Ease of Doing Business Ranking. It has jumped from 142nd rank in 2015 to 77th rank in 2019. The government has introduced numerous reform measures under various parameters such as starting a business, dealing with construction permits, getting electricity, getting credit and paying taxes which are expected to result in conducive business environment in the country. Similar such reform measures for MSME segment are crucial for fostering growth and competitiveness of Indian MSMEs.

The table gives some major ease of doing business reform measures and their impact on MSMEs.

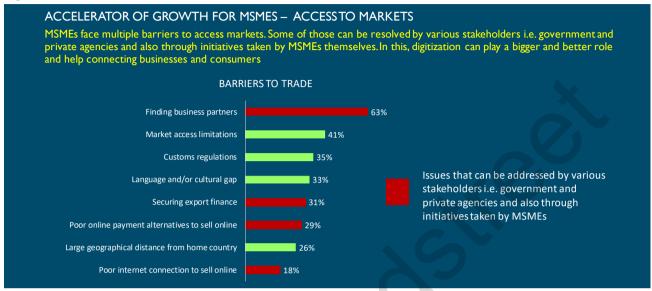

| Ease of Doing Business Parameters         | Ease of Doing Business measures  | Impact on MSMEs  |
|---|--|--|
| Access to credit                          | Launch of 59-minute loan portal named www.psbloansin59minutes.com to facilitate in-principle approval to loans upto ₹ 10 mn in 59 minutes  | As of March 31, 2019, over 50,706 proposals received in-principle approval and 27,893 proposals were sanctioned through 59-minute loan portal. |
| Ease of starting business/ doing business | Only one annual return to be filed for 8 labour laws and 10 union regulations to simplify government procedures  | Reduced harassment and time in completing government procedures  |
|   | Considering the seasonal nature of business of some MSMEs engaged in textile sector (particularly apparel segment), the requirement of 240 days of employment has been relaxed to 150 days for deductions in lieu of employment generation under section 80JJAA. |  |
|   | Single consent under air and water pollution laws. Returns will be accepted through self-certification and only 10% MSME units to be inspected.  |  |
| Paying taxes                              | All pending GST refund due to MSMEs to<br>be paid within 30 days and in future all<br>GST refunds shall be paid within 60 days<br>from the date of application   | Ease in working capital requirements   |
|   | The threshold limit for applicability of presumptive taxation of business income has been increased to ₹ 20 mn from ₹ 10 mn earlier.   |  |
|   | The Union Budget for 2019-20 proposed to allow interchangeability of PAN and Aadhar to file tax returns.   |  |

Source: Development Commissioner, Ministry of Micro, Small and Medium Enterprises, PIB Press Releases

#### 3. Providing 'Market Access' and promoting digitization

For MSMEs to become more competitive, they need access to markets for which they face several barriers. The government and private institutions are helping the MSMEs to resolve the barriers by finding business partners, helping them secure export finance or helping them sell online.

Fig: Barriers to Access to Markets

Note: The target population consists of SMEs that have an active social business Page and include both newer and longer-standing businesses, spanning across a variety of sectors. Period of survey for March-May 2017.

Source: World Bank, OECD, D&B Research

The government is encouraging adoption of digital technologies amongst MSMEs. The adoption of digital technologies by MSMEs can enable them to access market-relevant information, thereby opening up numerous growth opportunities. Using these technologies will enable these enterprises access wider markets i.e. secure more global customers and generate more revenue than those who are not connected. While few MSMEs are capitalizing on the digital opportunity presented by ecommerce platforms such as Amazon, Flipkart etc. about 2/3rd of MSMEs are still digitally offline.

Fig: Impact of Adoption of Digital Technologies

Source: World Economic Forum, Google and KPMG, D&B Research

Such platforms have particularly benefited traditional handicraft clusters, independent artisans, micro enterprises and women entrepreneurs who cannot afford large marketing expenditures. The e-commerce platforms have enabled them to enter the global value chain. In view of the crucial role digital technologies can play in providing market access as well as improving competitiveness for MSMEs, the government has undertaken various initiatives.

| Measures   | Impact  |
|--|---|
| Introduction of Government e-Marketplace platform  | As of October 1, 2019, 54,061 MSME sellers & service providers are availing service of Government e-Marketplace platform.               |
| Zero Defect Zero Effect (ZED) certification scheme | As of July 2019, over 22,288 MSMEs have registered themselves under ZED certification scheme in order to improve their competitiveness. |
| 25% mandatory public procurement through MSMEs     | As of October 2019, 60,790 MSE have been benefited with procurement amount of ₹ 162 bn through public procurement initiative.           |

#### Other policy initiatives

- A proposal to launch a new E-commerce website Bharat Mart/ Bharat Craft which will enable MSMEs to sell their products in local as well as international markets.
- Launch of MSME Global Mart by National Small Industries Corporation Ltd for Indian MSMEs as an e-market place to boost their exports.
- Increase in interest rebate from 3% to 5% for exporters who receive loans in the pre-shipment and post-shipment period.
- The launch of Udyam Sakhi portal for women entrepreneurs which is expected to benefit around 0.8 mn women entrepreneurs in India. The portal provides assistance in term of entrepreneurship learning tools, incubation facility, training programs for fund raising, one-on-one investor meet as well as provides market survey facility and technical assistance.

#### **Concluding Remarks**

The government has envisioned doubling the size of Indian economy to US\$ 5 trillion in five years. However, this goal cannot be realised in true sense without creating enough employment opportunities for the young population of India. It is estimated that the country needs to create almost 10 mn new jobs every year to employ its young population entering the workforce. In light of this, accelerating growth of MSME sector holds significance as MSMEs have the potential to serve as the key employment generator. Recognizing this, the government has taken up promoting growth of MSMEs as a mission mode project in order to create 50 mn new jobs in the sector. Further, the government aims to enhance MSME's share in exports to 60% and it's contribution to GDP to 50% in the next five years.

In view of these targets, MSMEs need to focus on adopting new age digital technologies and connecting & collaborating with foreign players in order to enhance their competitiveness and integrate themselves in the global value chain. While these initiatives would go a long way in taking Indian MSMEs to new heights, their long-standing concern related to adequate, timely and low-cost funding also needs to be addressed. The fact that almost 84% of the funding requirements of MSMEs are met through informal channels is alarming and calls for immediate intervention. With the government and the RBI stepping up their efforts to ease credit constraints and Fintech companies also entering the MSME lending space at the same time, credit gap for MSMEs is expected to reduce going forward. This coupled with other policy measures in the area of ease of doing business will help MSME sector emerge as the growth engine for Indian economy in the coming years.

## Learning & Economic Insights Group

Enhancing customer experience through knowledge, research and insights

Vishwavir Ahuja Managing Director & CEO

Indian Government is taking various measures to boost Indian MSMEs. According to you, what are the key growth accelerators for these companies?

MSMEs have been recognized as the productive drivers of inclusive economic growth. They play a catalytic role in the development process of our economy. Despite its significant contribution to the socio-economic growth of India, most of the MSMEs face a lot of challenges, like:

- · Lack of capital due to inadequate access to finance
- Poor infrastructure and utilities causing reduced production capacity
- Need for technological upgradation
- · Shortage of skilled workforce

Due to these issues, MSMEs are not able to scale to their full potential and have not been able to compete with their global counterparts. However, on the other side, these challenges should be looked upon as the untapped opportunities and the growth accelerators to strengthen the foundation.

#### **RBL Bank Limited**

The Indian Government has been putting in a lot of efforts to empower the MSMEs to address these challenges. The MSME sector has always been the central driving force behind India's firm vision of being a \$5 trillion economy by 2025. SMEs have been the growth pillars of the Indian ecosystem and exist in a highly competitive environment. A well rounded fiscal support, strong policy framework and incentives promoting innovations by financial institutions will enable a sustainable growth to the MSME sector.

With the new boosters announced by finance ministry like releasing ₹ 70,000 crore liquidity to PSBs, linking the loans to external benchmarks by making them cheaper, accelerated GST refunds to MSMEs, increasing the Interest Equalization Scheme rate from 3% to 5% for SME exporters will definitely help this sector flourish.

RBL Bank has come a long way – from a small localized bank in Kolhapur to one of the most promising companies in India. What are the key learnings which MSMEs can adopt from the Bank's transformation?

RBL Bank's journey from being a legacy bank with rural presence in a constrained location to a new-age, multiple service provider and innovation driven bank, began with a single-minded vision to be a Bank of Choice for all its stakeholders.

With a change in the top leadership team in 2010, RBL Bank undertook a major transformation journey, encompassing a governance structure with a highly independent and professional Board, revamped risk management framework and adopted a new and modern brand identity. Our aim was to build a 'Best in Class' institution with high standards of risk management and corporate governance.

The transformation journey of RBL Bank may inspire MSMEs to take-up difficult challenges in their organisation's life cycle and move it to the next level.

### Has the Bank recently launched new products for MSMEs/ start-ups? What are its features?

Keeping in mind the very important factor required for sustainable growth of the MSME segment i.e. digitization, RBL Bank has designed a crucial product RFX – built on the principles of transparency and convenience. RFX is RBL Bank's new online exchange rate booking system.

This innovative product provides various features like FX deal booking without manual intervention, cash, tom, spot deal booking functionalities and access to multiple dealers from same organizations. This product will also help increase transparency and provide superior security levels to maintain user confidentiality.

RFX will ensure that the Bank strengthens its relationship with its clients by providing them with an enhanced experience of doing cross border business and becoming their primary choice for any forex and trade related transactions.

# The current slowdown in the economy has put stress on several businesses, many of them struggling to survive. How is it impacting the Indian banking sector? What measures is RBL Bank taking to mitigate this impact?

The GDP growth rate of the Indian economy has slowed down in FY'20. The Indian banking sector has been impacted due to sluggish demand which has led to a slower growth of new credit portfolio. The government has recognized the challenges and is making efforts to address the same by announcing various measures.

We, as a Bank, plan to continue to provide efficient customer service and keep creating shareholder value relentlessly. Digital innovation as always has been our forte and we plan on building on it. The launch of products like RFX which lend expediency and accessibility to our customers is one of the steps taken towards that direction. We have built a scalable architecture which will allow us to capitalise on the next phase of growth.

**Dibyendu Bose**Director of Admissions & Financial Aid (AFA)

# How has ISB evolved in the past couple of years to keep in line with the changing times of academics, employment and skillsets?

ISB has grown leaps and bounds since inception and is now the only Indian B-school in the top 25 of the Financial Times Global MBA Rankings. ISB's research-driven curriculum brings the best faculty members from across the world and bright minds together to create a fulcrum of growth and opportunities for its students. With over 10,600 accomplished alumni in 40+ countries and more than 500 alumni running their own ventures along with 530+ alumni at CXO level and top leadership roles, ISB serves as a real example of business school success.

ISB was the first B-school in South Asia to get the Association for Advancement of Collegiate Schools of Business (AACSB) accreditation in 2011 and is also accredited by the EFMD Quality Improvement System (EQUIS). It is one among the select 100+ business schools worldwide that have both AACSB and EQUIS accreditations. The International Student Exchange Programmes with the world's best business schools such as Kellogg and Wharton are testimony to our global standards in education.

The quality of our programmes is evidenced by the fact that ISB's PGP in Management is ranked the number one in Asia and number seven in the world among one-year programmes in the Forbes Best Business School Rankings 2019 as well as being ranked number two globally in the

### **Indian School of Business**

Wall Street Journal – Times Higher Education Rankings. Our executive education programmes are also acknowledged as being the best in the country and among the best in Asia.

ISB's research too is globally recognised with the School being ranked number 2 in per capita research productivity outside the US in the University of Colorado Boulder Per Capita Business Journal Rankings.

ISB believes in regular reviews of its programme curricula to match step with the market and to impart the most relevant management practices and knowledge to its students. ISB students come from top-notch educational institutions such as IITs, BITS, NITs, etc., from all over the country which in turn facilitates peer knowledge exchange.

# How can Indian SMEs safeguard themselves against financially volatile situations related to credit, exports etc.?

Indian SMEs are in an exciting phase of growth and economic empowerment. Not only can they avail easy credit facilities for their growth and expansion, but thanks to new government initiatives, the export trade has witnessed phenomenal growth. Sectors like Agriculture, Pharma, Metals and IT have witnessed a huge growth in the demand and supply cycle. This is reflected in the fact that India has now moved up 14 places to be ranked 63rd among 190 nations in the World Bank's ease of doing business ranking. This fast-paced growth however comes with its cons as well, the biggest being the exposure of the SME sector to financial volatility. A few measures that can help them insulate themselves from this would be developing products and services with barriers to entry and creating new benchmarks in quality and services.

### What are some of the best practices that start-ups need to follow diligently to build a sustainable business model?

Startups need to follow basic rules of thumb to stay sustainable. They need to be innovative, must solve a business problem with simple solutions and must be scalable over time and geographies. The new digital age offers humongous opportunities for growth and expansion. Keeping an eye on market forces to see how they can affect their business well ahead of time is advised. The initial phase of any startup should be about trying to cut down on extra costs in setup and infrastructure and maximising resource utilisation. By focusing on last mile value addition and not get carried away with steep success which comes automatically if the product or service is well received, startups can look at creating and sustaining their business models over time.

What are the differentiating factors for the courses/ programmes offered by **ISB** for entrepreneurship?

ISB's approach and methodology towards entrepreneurship oriented programmes is that of helping its students learn and practice globally tested and proven and accelerators in the form of DLabs at Hyderabad and the Atal Incubation Centre at Mohali that help entrepreneurs in developing their ideas from concept to execution and in connecting with the larger business ecosystem. Our curriculum also borrows from insights developed through real life case simulations and research carried out globally to equip entrepreneurs with the latest practices in entrepreneurship. Entrepreneurship is also a specialization/elective in ISB's flagship Post Graduate Programme in Management. The Post Graduate Programme in Management for Family Business (PGP MFAB) is a comprehensive management programme for the next generation of family business owners that is designed to help them take their family-run business forward in the face of today's business challenges.

Erik Oliver Illig
Managing Director

# Kindly share with us in brief the history of Wilhelm Textiles in India.

WILHELM Textiles India Private Ltd is a subsidiary of Werner Wilhelm GmbH, Germany and is an Indo-German joint venture. The company is operational in India since 1995. The company manufactures one of the finest qualities of technical textiles with specialization in footwear textiles. The company is headquartered in Gurgaon and has its regional sales office, warehouse and distribution center in Chennai, and Agra. Wilhelm Textiles India is further operating local distribution centers in Hong Kong and Vietnam and sales offices in Bangladesh. In addition to India, the company operates in Germany and Portugal through its own local offices and serves over 750 customers across the globe. Since 2013, the turnover of the company has grown from ₹ 0.43 billion to ₹ 1.3 billion. The company's primary export countries include Vietnam, Bangladesh, Germany, Slovakia, Thailand, Taiwan, China and Israel. The company's exports grew more than 15% in 2019 as compared to the previous year.

Our focus is on high quality technical textiles, produced in a highly sustainable and ecological way.

### What are the views on Gol's US \$5 trillion Economy? How can textile sector contribute to this vision?

Compared to the size of India and its population, the total textiles and shoes export of India are still at very low rate. Low salaries are not enough to achieve and sustain the government's plan. Logistics need to be more reliable; ports and customs need to work faster. Industry needs to invest in skilling labor in order to achieve higher and more

# WILHELM Textiles India Private Limited

reliable quality standards. A good example is Vietnam, where besides far higher salaries production of shoes and textiles is fast growing. Other examples are Myanmar and Bangladesh. Though India has more raw materials available, it lacks flexibility. For India to grow faster, it needs to capitalize on its raw materials and focus constantly on quality and speed.

# Kindly elaborate on the new product initiatives undertaken by your company in the last one year.

We at have focused our development in sustainable fabrics, produced out of Innovative raw materials and in the most ecological way. This means, for example, shoe lining made out of organic cotton, Bamboo or Coffee. For some highend brands even rose petal fabrics have been developed. Many of our synthetic materials are also available with a high content of recycled Polyester, made from PET bottles.

### What are the green initiatives taken by your company?

During the last year we invested considerably in sustainability and ambience protection.

Traditionally, dyeing houses need a huge amount of freshwater every day. Thanks to modern state-of-theart micro-filtration, reverse osmosis, and other water purification systems, we have managed to reduce its freshwater consumption by 98%. This was achieved by using wastewater from public STP for processing, after due filtration and cleaning. Of course, after using the water, the same is cleaned again in our in-house ETP and released to public sewer cleaner than received.

Other initiatives are: the installation of new gas fired machines, installation of wet-scrubbers for stack cleaning, controlled by a state of the art online monitoring system, upgrade of all the lights including production to LED, installation of modern electric controlled compressors, installation of heat recovery units at the stenters and the upgrade of machines with online automatic process controllers.

Yatindra Sharma Managing Director

KHS Machinery Pvt. Ltd. was established as 60/40 joint venture between KHS AG, Mamata Group and Yatindra Sharma.

Envisioned to provide cutting edge technology solutions for Indian Beverage industry and world market at affordable prices. It has successfully lived to meet expectations of the industry in providing value for money high technology solutions for turnkey projects. It has excelled in efficient project management and after sales services. The company always strives to provide world class quality solutions. It is ISO 9001:2015; ISO 14001:2004; OSHAS 18001:2007 certified company by TUV also ISO 50001 Energy Management Standard by TUV – 2016.

KHS is the market leader in India and provides their solutions in more than 25 countries through their global sales network.

Coca Cola, Pepsico, Carlsberg, UB Group, Nestle, Parle, Mega Beverages, ITC, Davao, Monsanto, Mondelez are some of our customers.

We have been accorded many awards for manufacturing, quality, strategy by leading organizations in India.

### What has been the success mantra of KHS Machinery?

Deliver what you promise is the mantra that we follow. Customer is at the center of our world. As Mahatma Gandhi

# KHS Machinery Private Limited

said 'Service with smile. Always learn from your customers for developing next level of technology', we try stick to the basics and do our best to achieve them with KHS Credo of Imagination, Perseverance, Focus, Action and Joy..!!

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

KHS has been in the forefront of developing and executing some of the innovative solutions first time in India by local development as well as manufacturing. We have successfully introduced following innovative projects for various customers in India:

- We have introduced first high speed packaging line for cans to process and fill various high quality juices with fruit pieces, soft drink and energy drinks for Coca Cola products.
- We have manufactured and delivered multiple labeling machines for Carlsberg India with camera orientation for providing attractive labeling opportunities on beer bottles.
- For the first time in the world, unique joint innovation project was carried out by Coca Cola, KHS GmbH, Germany and KHS India. It has been a successful development and commercialization of glass coated PET bottles to give lightweight bottle for ultimate freshness of soft drinks for more than 150 days.

# What are the company's growth plans for the next 3-5 years?

KHS Machinery plans to introduce state of art technology for milk and wellness products in a big way. We plan to do sales of ₹ 800 crores by expanding our export and local customer base.

**Suresh Kuppuswamy** Chief Executive Officer

### Please provide a brief background of the company and the business it is engaged in.

Sterling Software Pvt. Ltd. is a specialist technology solutions and services organization providing industry defining products to the BFSI segment, particularly to Capital Markets. The company is a wholly owned subsidiary of CAMS (Computer Age Management Services Limited) - India's largest Mutual Fund Registrar and Transfer agency (RTA) which serves over 69% of the \$370 Billion Asset under Management of Indian Mutual Fund space.

Sterling Software, over the last 2 decades, has carved a niche for itself with solutions that have significantly influenced the growth of the Mutual Fund industry.

Our flagship RTA platform Investrak and surround applications enable CAMS to process and keep records of over 300 million transactions / year of 16 Mutual Fund houses. Over the years. Sterling has developed solutions to power several allied service layers such as Business intelligence, AML, CRM, Distribution portal, Investor portals and mobile app, Chatbot etc. Sterling Software's technology stack serves 3 stakeholders viz. Mutual Funds, Investors and Distributors and a multitude of market participants of the ecosystem such as Banks, Payment gateways, KYC Registration Agencies, Stock Exchanges, Depositories and Communication service providers.

# **Sterling Software Private Limited**

A wholly owned subsidiary of CAMS (Computer Age Management Services Limited)

### What has been the success mantra of Sterling Software?

Sterling's success can be attributed to its culture of innovation and continuous improvement focus.

The company's success can be attributed to the committed leadership team and a vast pool of talent with many of them staying on for over 2 decades. This has helped us build deep, domain expertise and experience. Our success in providing a stable platform that has stood the test of time, disruptive yet frugal innovations and deep domain consulting capability makes us the first port of call for our clientele who operate in a highly regulated environment.

Our belief in innovation is key to long term success has helped us and our parent company CAMS introduce many industry first solutions and provide world class services to Indian investors at Indian costs.

# What are the key Digital & Fintech products and the services provided by your company? What are their features?

As the technology arm of the country's leading Mutual Fund service partner CAMS, Sterling has been investing in technology infrastructure and digital capabilities to transform the experience of MF investor and catalyze the growth of Mutual funds. With the onset of the digital mega trend in 2014-15, we have sharpened our focus on Digital and FinTech and have been influencing the digitalization of the industry delivering market impacting digital and fintech products.

### Some of our key Digital and FinTech solutions

 myCAMS – mobile app and online portal for individual investors to view portfolio and transact across 16

Mutual Funds. Combining cool features and powerful aggregation benefit of one gateway to multiple funds has made 29 lakh investors register and use myCAMS. The app has won several fintech awards and recognitions.

- GoCorp is an online transaction portal customized for Institutional investors to manage their Mutual Fund portfolio across multiple Mutual funds. The portal enables transactions for over ₹ 3 trillion / month, making GoCORP the industry's leading platform for corporate investors.
- CAMServ is a chatbot hosted on camsonline.com to enhance customer experience for self- managing investors. Several Mutual Funds have opted for the chatbot as a white label service on their website.
- edge360 a comprehensive solution to enable distributors to transact, monitor brokerage revenue, serve their investors statements and reports, have better business visibility for sales planning and campaign management and augment their business growth.
- CAMSPay payment platform provides end-to-end secure payment services to businesses and financial institutions
- Digital KYC a video based KYC verification application assisting client organizations to perform KYC process as per Indian regulatory guidelines
- DiCE A back office solution for Mutual Funds to onboard distributors digitally and provide commission structures across products based on multiple performance parameters.
- mfCRM Mobile solution for Mutual Fund's Relationship Managers to efficiently organize and manage their day and track their business performance vs. peer group.
- Online Loan against Mutual Funds This solution has been initially launched for HDFC Bank customers who seamlessly navigate from the Bank's website to myCAMS to set-up a loan against their MF holdings.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

Sterling's strategy has always been to stay ahead of the curve by undertaking regular assessments of technology stack to stay in the path towards future readiness. Our Digital and FinTech productization approach has a unique quality of proactively understanding the users' needs, pain points and designing a solution combining our deep domain knowledge and technology prowess. As we serve in a regulated environment, we have to balance compliance and ease.

Adoption and usage is a good measure of success and we are encouraged by the positive acceptance of the various digital initiatives. This helps us and our parent company CAMS continue to offer differentiation to our clients and their customers.

# What are the company's growth plans for the next 3-5 years?

In the Mutual Fund space, we will continue to assist our clients with our thought leadership and products that would enable them with deeper penetration strategies and contribute towards the growth of Indian Mutual fund industry. From a technology perspective, Sterling has ventured into machine learning/artificial intelligence, predictive behavioral analytics, and data-driven marketing and have identified ways to engage with users to make their decisions/transactions automatic. We are doing experiments / PoC using IoT and blockchain to bring greater rigor to operations.

A strategic decision of Sterling for the coming years is to expand its technology solution offerings from primarily Mutual funds domain to other adjacencies within the BFSI vertical. Our focus would be to build domain agnostic digital products that would fit across organizations and bring in operational excellence through automation and ease of use.

We will continue to assist & facilitate our clients, innovators, and regulators to offer contemporary technology and enable better and simpler consumer experience.

Karan Daftary Director

Akshay Daftary Director

Incorporated in 1996 by Dr. Gautam Daftary, SIRO Clinpharm Private Limited is a Clinical Research Organization supporting trials from Phase II to Phase IV and beyond post-launch of products. SIRO has successfully conducted over 250 clinical trials across various therapeutic areas and complex indications, in compliance with international standards. SIRO has been an industry pioneer over two decades, sharing an incontestable record of excellence in the pharmaceutical, FMCG and medical device industry. Its global delivery center in Mumbai has a seasoned team of 200+ professionals hailing from science and medical backgrounds.

### Services:

- Clinical Operations
- Medical writing Clinical Data Management
- Biostatistics Clinical trial supplies management
- Regulatory liaison & consulting

### What has been the success mantra of SIRO Clinpharm?

In order to achieve our mission of "Helping lifesavers save lives", we act as a strategic partner to our clients. The success mantra has been the teamwork that has been shown by the various departments within SIRO, which enables providing end to end clinical trial services. These specialized departments play a pivotal role in different parts of the trial (start-up, study conduct, close-out), and together help in generating the final results based on

# Sil'O

# SIRO Clinpharm Private Limited

our trial conduct, which leads the drug developers a step closer to getting their medicines to patients in need. The teamwork is essential for the smooth conduct of a study within stringent timelines while maintaining the highest levels of quality and regulatory compliance.

# Kindly elaborate on the initiatives that have had the most impact on the company in recent years and led to its growth.

SIRO has continually evolved over the last few years to adapt to the ever changing regulatory environment. Few initiatives which we have taken include: addition of new verticals based on client requirements and industry trends, addition of a service called Health Economics and Outcomes Research (HEOR) in the recent years which involves collecting real world data and analyzing it, to understand trends and results, process optimization through innovative automation initiatives and increase in training and cross training of teams to widen core expertise of resources.

### What are your growth plans for the next 3-5 years?

SIRO has had long standing strategic partnerships with some of the top global biotechnology and pharmaceutical companies with long-term contracts for over 5 years. Having solidified our clients over the past few years, we decided to bifurcate our approach. In India, our primary focus remains on conducting clinical trials across various therapeutic area. This is the core of our purpose and the basis for growing as a clinical research organization. In the US and other countries (European countries, Japan, China, Singapore etc.) our focus is on Medical Writing and Biometrics (Biostatistics and Data Management). In this ambitious geographical expansion, we are looking to hire 3-4 specialist operational resources in the US in the first quarter of 2020. We would continue to expand in the coming years.

Chirag A Parekh
Chairman & Managing Director

Acrysil Ltd incorporated in 1987 is promoted by the Parekh Family. Acrysil Limited, part of Acrysil Group, is one of the world leaders in manufacturing and marketing of Composite Quartz Kitchen Sinks, engineered with German technology. Acrysil marketing the products under the brand name "CARYSIL". Our Quartz Sinks are sold to discerning customers in over 50 countries worldwide such as USA, UK, Germany, France, Canada, China, Far East and Gulf Countries etc. Acrysil has successfully acquired marketing and distribution Company "Homestyle Products Ltd" in UK to cater the UK market. Acrysil has also set-up a wholly owned subsidiary, Acrysil GmbH, in Germany in order to further strengthen its presence and penetration in the demanding European markets. Acrysil's PAN India presence includes more than 1,500 dealers, 80 Galleries, 82 Distributors. The product segment includes Kitchen Sink, Kitchen built-in appliances, Premium Sanitary products, faucets & other Bathroom fittings.

### What has been the success mantra of Acrysil Limited?

Acrysil believes in innovation, expansion, globalization, and diversification. We have developed unique, quality products which is ahead of its time and enrich the lives of

### **Acrysil Limited**

homes and give our customers luxury sense of living with our Premium kitchen sinks & appliances. Our Bathroom suite/products are intricately crafted, unique and luxurious design to give lifetime experience to customers. We deal in value added niche products which has differentiation factors.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

Acrysil is only company in India and Asia to manufacture Quartz Sink using German Technology. Acrysil has introduced more than 100 different type of models of Quartz sink which is unique, having aesthetic look and feel and enhance overall kitchen outlook. The company has also introduced handmade Quadro steel sink in premium steel sink category. In our built-in kitchen appliances category we have introduced motion censored chimney fitted with visual screen to make cooking experience enjoyable. All our products are loaded with modern features which pave the path for our upcoming endeavors. We have also introduced 3D composite tiles which is unique to the Asian market. It is a matter of pride for Acrysil as we are only 2nd Company in the world to offer such products. Our bathroom products are sold under "Sternhagen" brand, which are ultra-luxuries and are best in category, at par or even better than top global brands.

Jitendra B Divgi
Managing Director

### What has been the success mantra of Divgi?

We realized a very long time ago that, if we positioned ourselves as a technology-led company, the chances of success to move up the value chain in the "dog-eat-dog" world of the automotive industry were much higher. Since the '60's, we have been getting technology into India and exporting components based on the technologies to markets outside India. Our JV with BorgWarner provided us precisely that. It has led us, as an Indian company, to achieving several "firsts" in our domain area of drivetrain components and systems – supply of transfer case system to China & Thailand, design, develop & supply transfer case system to a global auto OEM (FORD), introduce cutting-edge carbon-lined steel synchronizer full system solutions to OEMs in India. We also were the 1st Asian unit of BorgWarner to have won the Chairman's Product Innovation Award. All of these products are being supplied to top Indian OEMs Tata Motors and Mahindra for over 20 years on most of their applications.

# Kindly elaborate on the innovative initiatives and the impact that it had on the company in the recent years

Our 6-pronged strategy of becoming a products leader, built with a view to realizing our vision "To be recognized

# Divgi TorqTransfer Systems Private Limited

as a world-class Indian brand in automotive drivetrain components and systems", has created a culture of continual innovations. This involved innovations in the two founding aspects of our business i.e. Product Innovations and Manufacturing Process Innovations. While product innovations on the 4WD and transmission products were respectively driven through our collaborations with BorgWarner, and more recently, with top of the rung engineering houses in Germany, Manufacturing Process Innovations have been acquired from process ideas exchanged with our European, Chinese and Taiwanese equipment supplier partners. A combination of manufacturing depth, diverse products portfolio, geographic diversity, speed and agility in our execution and new learnings from our partners has resulted in new businesses from several Indian and international premier OEMs - UAZ Russia, Mahindra North America, Toyota and USA's mayerick electric vehicle manufacturer.

# What are the company's growth plans for the next 3-5 years?

We see growth across our entire product portfolio – 4WD products, manual, electric and dual-clutch transmissions. Currently, we are being driven by our strong engagements with OEMs across the world; USA, Europe (Sweden, Germany, France), Russia, India, China, Thailand, Malaysia and Korea. The mood is very upbeat. We are looking towards becoming an INR 1000 crore company by 2025.

Siladitya Chaudhuri National Sales Manager SME

What are the key reasons for under penetration of insurance amongst SMEs? What initiatives is SBI General undertaking to create more awareness?

### **Reasons for Under Penetration of SME Insurance:**

A lack of awareness, coupled with thin margins, makes insurance a low priority and so it is often neglected by SMEs. Resultant Insurance is often neglected or there is partial cover, which finally ends up in poor claims experience.

### Initiatives by SBI General to create more awareness:

SBI GIC is continuously working on spreading awareness about various covers/policies which are available with us and offer the same to new as well as to the existing clients with adequate coverages at the optimum pricing. We are focusing on increasing SME penetration levels of our channel partners (Bank/Broker/Agency). We are also educating clients about the benefits of insuring the BMA with RIV clause and also ensuring that the Assets are adequately covered, with No Under-Insurance. We are sensitizing the customers about the essential need for Insurance in Small and Medium enterprises, since their profit margins are thin, and they are generally not well equipped to face a situation where they can suffer a loss. Our Risk engineering team conducts a detailed survey of the units and suggest necessary loss minimization measures. We also create awareness amongst the employees and staffs of the units

as to how they can prevent a fire in the unit. This way we carry out safety audits and Thermographic study as loss prevention measures.

# What are the key products that SBI General Insurance has launched recently for the Indian SMEs? What are their benefits?

Key Products that SBI General Insurance has launched recently for SMEs:

- Business Package Policy: Package Policy which gives the flexibility to choose the set of covers in a single policy. We offer multiple coverages in a single policy including: Fire, Burglary, Money Insurance, Plate & Glass, Public Liability, Breakdown Covers like MBD, EEI. All the basic covers needed for SME can be covered under single policy with optimum pricing.
- Cyber Defence Insurance: Cyber Defence Insurance is designed to protect your business against a number of cyber exposures – from hacking attacks and viruses to privacy breaches and theft of data.
- SME Tiny Sector a comprehensive product offering Fire, Burglary, Earthquake and terrorism at a flat rate irrespective of the activities carried out by the unit for an asset value of ₹ 25 Lacs.

### What initiatives is SBI General Insurance taking to drive insurance products using advanced digital and mobile applications?

SBI GIC has tie-up with few digital insurance channel partners to spread awareness and increase penetrations using digital/mobile applications. Further, we have formed an alliance with Mobikwik app to offer digital insurance solutions to new generation entrepreneurs.

**Ajay Anand**Managing Director

### What are your views on Indian Textile industry?

Textiles have gone through severe consolidation in India in this decade. Also fewer new players have entered the space. The Companies who have survived & with Infrastructure in place will greatly benefit in coming decade as India will strengthen further as a Textile hub especially for made ups and value-added products. Also regardless of the outcome of trade war between US-China, there has been a tectonic shift in mindset of companies in the west leading to sizeable opportunity already moving out of China, this will benefit India and all incumbents in South East Asia.

### Please provide a brief background of the Company.

The Company was founded for manufacture and export of Home Textile products in 1985 by Myself and Mr. Sanjay Anand, who joined as Director in 1992. The Company went public in 1995 on BSE and ventured into Technical Textiles (Automotive fabrics) in 1997.

# What are the key products manufactured by your Company and the markets they cater to?

The product offering under Home Textiles are complete range of Bathmats, Accent Rugs/ Top of the bed along with Cushions, Curtains etc. The Home textile Customers are top retailers in USA led by Costco, Walmart Stores, Target etc. and in UK / EUR led by Sainsbury's, ASDA, Marks and

### **Faze Three Limited**

Spencer, LIDL, etc. The group ventured into Technical Textiles in 1997 (known as Faze Three Autofab Limited), mainly Automotive fabrics i.e. Passenger Car Seat Fabric and is a leading supplier to all major OEM's with over 40% market share in the segment. The Group has 7 integrated manufacturing facilities in India, 3 in Silvassa, 3 at Panipat and 1 at Vapi. The Company is actively exploring inorganic growth opportunities including acquiring existing Home textile companies or Joint venture for manufacturing in India to add new range of products of Home Textile.

### What has been the success mantra of Faze Three group?

Continuous Innovation, Absolute Commitment to Quality, Reliability (timely deliveries), Long serving Customer Relationships and Global Standard Infrastructure are at the heart of success at the group. We have always invested into infrastructure and products ahead of time which has put the Company as preferred partner supplier from India. The Customer is at the heart of every decision at the Company, we visualize the Retail of our products in our customer stores for the Home Textiles. Under Technical Textiles, we focus on performance factors and other technical factors. Another critical aspect is the cost competitiveness, at Faze Three group we have never engaged in pricing war / undercutting to gain market share over competitors which leads to overall loss for all suppliers in the ecosystem, instead have made efforts to educate customers on the costs and demonstrate value of offerings. Also we have a strong inclination to only work with AAA rated customers / global companies owing to their appreciation for Innovation and Quality. The Home textiles Business is 90% Exports and for Technical Textiles the sale is 80% Domestic which provides a good hedge at the group level. Also, as a policy we try and ensure that single customer exposure is below 15% of Total Revenue and on the raw

material side our dependence on imports is almost zero. On the financial side, the Company invests for long term from internal accruals therefore Company's repayable Debt is NIL over last 2 years now with overall debt/equity ratio of ~0.3. Our Management team and key people are passionate and the Company promotes younger people to take challenging roles.

# Kindly elaborate on the innovation initiatives and its impact in the recent years.

The Company has in-house Research, Design & Development department. There are continuous efforts to innovate new technology. The Company has registered various trademarks and Brands which are directly used in various products manufactured and supplied to customers. The Company has received Best Innovation Award from Sainsbury's UK and also an Outstanding Partnership Award from Williams-Sonoma Inc.

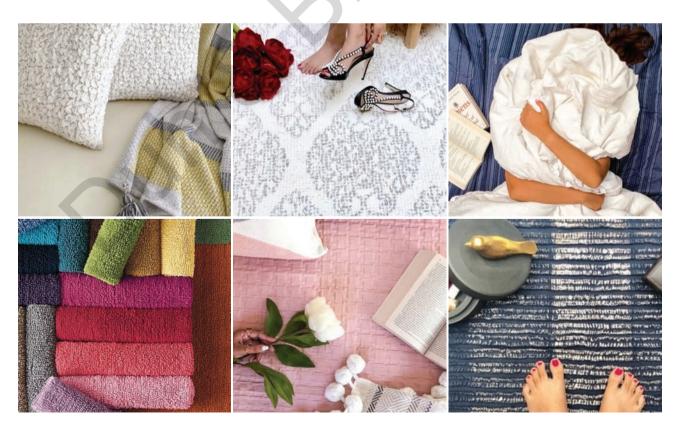

# What are the kind of Assets / Infrastructure does the Company has or plans to invest to achieve group growth plans over the next 3-5 years?

At group level, we have Assets block of over ₹ 3 billion

which includes land, building, plant and machinery. In terms of overall capacity utilization, we are ~65% with a room to add more capacities with marginal increase in capex. The Company has incurred a capex of over ₹ 350 million in last 3 years predominantly for new products and progressive capex rather than brick and mortar. The current group Revenue is around ₹ 4.6 billion which we aim and endeavor to double within 3 years since all ingredients required to do so within the same product line, same business, same customers are in place now. This growth is expected to come with nominal capex of ₹ 300 million the similar period which would be adequately funded from internal accruals.

# What are the efforts made towards sustainability and green initiatives?

The Company has invested into water processing plant and reduced fresh water consumption in one of its processing plant upto 30%. It is working on zero discharge by 2020 and way forward. We are also currently shipping complete range of Home products in organic cotton and recycled polyester. Further, the Company has also initiated usage of clean & renewable energy for running all its plants.

Arun Kumar Patil

Managing Director and Chief Executive Officer

CADMAXX Solutions is an engineering organization with "Intelligence by Inheritance" & "Born with Experience", having strong knowledge of "What to Do" & "How to Do" in the engineering community. We have a proven track record in providing multi-dimensional solutions through our multiple spectrum of services including — Engineering Services, Staffing, Training, and New product development for many OEM's and Engineering service providers in the Aerospace, Automotive, and General engineering verticals.

CADMAXX has built up a strong team of Technical and Project Management professionals to take up challenges of the ever-growing industry requirements in terms of providing technical solutions, project management solutions and flexible business models in contrast to conventional practices.

# How has Cadmaxx evolved keep in-line with the changing times of academics, employment and skillsets?

Based on our competence in comprehensive & flexible services, we have been awarded as strategic partners for premium OEM's like GE, ABB, Bosch, Delphi, Mahindra, Autoliv, Alstom, Grupo Faurecia, Adient, etc., and service-based companies like HCL & Tech Mahindra.

We have the credit of having bagged 100 SME Award winner for the year 2019 and national award for consecutive 2 years (2014 & 2015) from the Government of India in the services sector. We have become one of the preferred partners in an automotive embedded domain for some of

# **C**ADMAXX

# Cadmaxx Solutions Private Limited

the top OEM's and Tier 1's. In the last 2 years, our staffing in this segment has reached 200+ headcount. 1,00,000+ man-hours of experience in Data Annotation/Labelling.

CADMAXX offers industry-specific skill development courses in design and analysis of parts or systems of parts for industries in Automotive/Aerospace/Locomotives/SPM/Heavy engineering/tooling etc. It also offers domain-specific courses to professionals seeking upskilling through targeted learning to take up higher responsibilities in an organization. These programs concentrate more on the quick adaption of advanced engineering software tools in the design-to-manufacture environment for better results.

# What kind of Solutions and Products do you offer and the competitive edge that CADMAXX have in the market?

We provide support across the industries on following mentioned business verticals: Engineering Services; Training; Staffing - Permanent, Contract, RPO models; New product Development

### Kindly elaborate on the innovation initiatives taken and the impact that it had on the company.

A new division has been started to contribute to the "Make in India" Campaign. Around 18 new product development has been completed inhouse and 10 products have been supplied to the clients.

- We are one of the preferred partners in the Automotive Embedded domain for some of the top OEM's and Tier 1 companies. In last 2 years, our staffing in this segment has reached 200+ headcount and we have 1,00,000+ man-hours of experience in Data Annotation/Labelling.
- Inhouse software named "Cadmaxx Connect" was developed which supports onboarding employees, HR Queries, Supply chain management, and billing. It has eased the operations with accuracy by avoiding manual errors.

**Dhruv Khaitan**Founder and Chairman

### NEOGROWTH Lending simplified. Growth amplified.

### NeoGrowth Credit Private Limited

**Piyush Khaitan**Founder and Managing Director

### Kindly share with us the brief of NeoGrowth's business.

NeoGrowth Credit Pvt. Ltd is a Systemically Important, Non-Deposit taking NBFC and a pioneer in SME lending based on the underwriting of digital payments data. NeoGrowth provides finance to small business owners to drive business growth that matches their ambitions. Our hassle-free loans are powered by technology innovations and leverage the digital payments ecosystem. We provide financing to retailers, restaurants, apparel shops, kirana stores, petrol pumps, groceries, pharmacies and other MSMEs with flexible repayment options and customized products addressing multiple business needs.

### What has been the success mantra for NeoGrowth?

NeoGrowth has pioneered an innovative lending model in India which operates at the convergence of three ecosystems - lending, urban retail and digital payments. Our product design is centred around the business model of the retailers as card swipes give a good sense of the business potential, seasonality changes and customer footfalls for underwriting. Another differentiating factor is that this product has a daily recovery model and is digitally driven. Essentially, our product design coupled with the 'tech and touch' model and customer centric business philosophy has been our mantra for success over the years. This has helped us emerge as market leaders touching customers across all industry segments.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

NeoGrowth is amongst very few fintech NBFCs to have objectively measured and presented the direct and indirect social impact that they have created. It is an undeniable fact that the traditional underwriting methods in India

have been excluding more than 50% of SMEs and MSMEs that are creditworthy. This is where NeoGrowth steps in by leveraging digital payments data to underwrite and provide business loans to the underserved MSMEs. Having disbursed over 25,000 loans amounting to more than INR 4,550 crores (USD 650 million), NeoGrowth has been funding and enabling merchants to grow and sustain their businesses while continuing to tread on its initial journey of achieving inclusive growth.

NeoGrowth continues to drive financial inclusion in an impactful manner for the sixth year in a row. During FY19, this impact measurement was conducted for 159 NeoGrowth customers across 7 cities. Few key highlights from Social Impact Report 2019 are:

- 80% and 35% of NeoGrowth's customers surveyed are first generation entrepreneurs and first time borrowers respectively.
- 12% of disbursals in FY19 were towards businesses run by women either as sole proprietors, partners or directors.
- NeoGrowth has indirectly created 2 to 3 new jobs per MSME customer.

### What are your growth plans for the next 3-5 years?

Presently, we operate in 21 cities where we will continue to deepen our reach and expand in newer Tier-II cities. At NeoGrowth, we aim to build a billion-dollar balance sheet in the next 5 years. Our strategy for the next years is 'Deeper, Wider, Newer'. With this strategy, we will continue to deepen our reach in existing cities and product categories, widen by expanding to newer markets and focus on leveraging newer technologies like AI, ML and Deep Analytics with a strong emphasis on new product innovations and variants.

Kiran Jadhav Chairman & MD

From its humble beginnings in 1993 engineering control systems, Accurate today is a Group of five companies, each with independent vertical. The core of my company is electronics but today we manufacture Industrial Refrigerators, provide innovative customized solutions to Indian Defense and the Telecom Sector besides doing Automation Products and manufacturing IoT enabled Embedded Electronic Products. I am a first-generation industrialist and did face usual hick-ups in the beginning but thanks to my dedicated, hard-working and qualified team, we have gained a respectful name in the areas we operate in.

### What has been the success mantra of Accurate?

"Innovation for Progress" has been the mantra of Accurate right from its inception. I realized, right at the initial stage of my career that if we had to survive and grow, new innovative products were the only option. Today, we have two well equipped R&D Centers, a well-qualified and motivated team of development engineers from different disciplines each willing to think "out of the box". My team has several new products to its credit, some of them even patented.

# ACCURATE INDUSTRIAL CONTROLS PVT. LTD. ॲक्युरेट इंडस्ट्रीयल कंद्रोल्स् प्रा. लि. An ISO 9001 : 2015 Company

# Accurate Industrial Controls Private Limited

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

We spend over 35% of our salary bill towards innovation and R&D. My vision is to reverse this and make it 60% in the coming years. In every aspect of our operations, we have tried to add value and improvise and innovate. Some of our innovations that I am really proud of, are our light and compact Power Systems for launchers and radars, centralized ATM Kiosk Monitoring Systems, our Smart Poles (Telecom Towers), newly developed Intelligent Vehicle Tracking System, ADAS capable DVRs (Digital Video Recorders), import substitute products like DC\_DC Converters... Most of our embedded products are IoT enabled. We are also working towards incorporating AI into our products.

# What are the company's growth plans for the next 3-5 years?

Our roadmap for the next five years is ready, and we are diligently working towards it. Besides the current businesses achieving reasonable growth, I envisage that our growth will be fueled by the Indian Defense, with Make in India playing a substantive role, Fuel Cell and other innovative products in the Embedded Electronics Domain. We are geared up to take up a large battle tank refurbishment order and other integrated solutions for the Indian Defense. Similarly, we are working very aggressively on increasing our export share from the present 30% to over 50% of the total revenue. In about 5-6 years, I reckon that our turnover will get multiplied by 3-4 times.

**Gursharan Singh**Chairman and Managing Director

RACL is an auto component manufacturer listed on Bombay Stock Exchange (BSE) supplying Engine, Transmission & Chassis components to diverse clients across the globe since 1989. RACL manufactures drive train parts for motorcycles & scooters, three wheelers, cargo vehicles, light and heavy commercial vehicles, tractors, electric cars & has its presence in industrial sector, as well, for very critical applications. The company exports its products to Global Brands like BMW, KTM, Kubota, BRP ROTAX, Piaggio, Yamaha, General Electric, Schneider Electric and a host of other major domestic & overseas clients.

### What has been the success mantra of RACL?

Since its inception RACL always focused on three major aspects, which are very crucial for a business entity. First and foremost are the people. We created a team of workmen, engineers and managers with strong process design & manufacturing skills. We created a healthy work environment & nurtured or a resource in a manner that the people enjoy working in RACL. Second most important aspect for a successful venture is the business strategy, which must be futuristic, flexible & robust enough to withstand the headwinds of fluctuations, which any of the business has to face from time to time. RACL had a strong vision to take care of this aspect by creating a diverse customer base ranging from two wheelers to Heavy Commercial vehicles, a 100 CC commuter bike to a 1200 CC Sports Motorcycle, a 150 cc Premium Scooter to a 1500

### **RACL Geartech Limited**

CC Snow Scooter, from a 20 HP Tractor to 150 HP Tractor. Third most important is the technology. No business can be sustainable, until and unless, there is a thrust on creating the advanced technology based manufacturing capabilities. RACL has created a manufacturing plant, which can be proudly classified as a technology hub, which is highly flexible & adaptable to global needs of customers.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

RACL had always believed in innovations and applied these ideas much ahead of the competition. For example, when whole of Indian Component manufacturers were growing along with double digit growth of Indian two-wheeler OEMs, RACL had charted out a plan to focus on European Two wheeler OEMs, as RACL believed that Indian Two wheeler industry shall face stagnation sooner or later. During FY20, the entire industry is witnessing a decline of sales, in certain cases and segments the decline is over 30 percent, our vision and effective implementation of our strategies has helped RACL to sustain growth of over 25 percent on YOY basis, even in current financial year, and, we shall be able to sustain our growth trajectory in coming years as well.

### What are your growth plans for the next 3-5 years?

RACL has set its firm foot forward in E- mobility solutions and has already tied up firm contracts with leading players in the field. RACL is in advance stage of discussions with some of its global customers for forward integration projects by offering them the complete solutions of Transmission aggregates, instead of the loose components or sub-assemblies. Similarly, RACL is in advanced discussions with Sub- system suppliers for Transmission and Chassis components for Fuel, Hybrids and Electric cars, the area, which has huge growth potential in coming years.

V D Sanghavi Managing Director

Aarvi Encon Limited (Aarvi) was founded in year 1987 with Head Office in Mumbai as Pvt. Ltd. Company. AARVI is converted into "Aarvi Encon Limited" with effect from July, 2017 and has presence in all the major locations in India. Aarvi is ISO 9001: 2015 certified Company with CRISIL SME-1 rating for the twelfth consecutive year in a row, from the year 2008, which indicates 'Highest Creditworthiness'.

The company is in the business of supplying technical manpower on contract basis. The company has more than 3,500 Technical Staff deputed to more than 145 Companies, major being Reliance, Cairn Energy, HPCL - Mittal Energy, HPCL, BPCL, Larsen & Toubro and Technip.

Aarvi offers capable manpower resources for Design, Inspection, Construction Supervision, and Plant Commissioning in the field of Oil & Gas, Solar, Cross Country Pipeline, Oil Terminals, Power and LNG Terminals, Aarvi helps Business houses to reduce their headaches of getting labour license, government compliances, transport, food, housing of resources and most important right person for right job..

Aarvi has subsidiary company in the name of 'Aarvi Encon (FZE) at Sharjah. The company provides Technical Manpower to various companies in Middle East.

### What has been the success mantra of Aarvi Encon?

For the financial year (2018-19) there has been growth of 19% in sales & 17% in profits as compared to previous year.

### **Aarvi Encon Limited**

The major reasons for the growth are:

- A. Focus on International business.
- B. Maintaining high standards of ethical conduct in the operations.
- C. Strict follow-up of compliances like PF, PT, ESIC and others.
- D. Experienced 300+ pool of engineers is ready for urgent Shutdown job of Refineries and Fertilizer plants.
- E. Most of the customers are associated with us for more than 10 years, which speaks about the quality of services a well as integrity.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

- A. One of the innovative initiatives the company undertook was to hire retired Mamlatdar and Tehsildars for ROU work since they are able to get farmers agree to lay underground pipelines for our client.
- B. Partnered with Saifee Hospital for CSR purpose to offer free medical services to OPD patients.
- C. Implementing AI based recruitment tool which will help the Company to locate right person for the assignment in the least time.
- D. Planning of training healthcare technicians at Saifee and sending them to Middle East Clients.

# What are the company's growth plans for the next 3-5 years?

The company is planning to grow in various other verticals like Power Plants, IT Industries, and Airports. Aarvi has entered in to agreement with local company Bon-Accord in Abu Dhabi to provide large number of Technicians to Oil, Gas and Solar plants. New offices in different states and in Middle East are being planned.

Manjusha Paithankar Managing Director

"Imperative Business Ventures Private Limited (www.Theimperative.in) is on the brink of collaborating with leading Indian & International BFSI & Corporate companies by offering an Innovative Clients Aggregation and Data Analytics Platform called FinBO+.

Imperative Business Ventures Private Limited (IBVPL), offers Consulting, Technology as well as Outsourcing Services such as IT, ITES and Back-Office/Credit Processing to leading BFSI, NBFC, Hospitality, Telecom & leading corporates. The company was founded by a team of **Women Entrepreneurs** in **2011**, with a vision to contribute for Women Empowerment, Create Employment Opportunities for differently abled & Technology Enablement.

# As a woman leading the business, kindly take us through your journey and the motivation to start IBPVL?

My source of inspiration is my family, which has boosted my confidence to explore, supported totally in terms of their time & obviously invested initial capital too. With the help of an ingenious team, Imperative Business Ventures continued scaling up the ladder with constant transformation by applying innovative business ideas.

# Imperative Business Ventures Private Limited

Being Dietician, my dream towards contributing in better Health of Young India has also encouraged me to venture into Foods & Nutraceutical products, convinced me to launch essential consumer Food Products brand called Sanman-Division of IBVPL.

Imperative started with 10 members and has scaled up to 350+ team members & associates, out of which more than 50% of the team members are women. We have 5-Offices in Mumbai and extended on-site support for more than 21 Locations. Ours is a 100% Scalable Business Environment with 80,00,000+ Customer's data being processed and moving on, with average 1,00,000+ new customers data being processed per month. We have Launched AI Enabled Credit Assessment Software tool called ImperaCAM.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

Imperative has invested in developing various **AI enabled software solutions**, complimented with RPA which is helpful for the BFSI, Telecom, Hospitality and leading corporate companies to automate their business processes and increase the customer satisfaction with quality services.

ImperaLabs Infotech Pvt Ltd, which is associate company of IBVPL. serves as R&D unit for Innovation and Automation.

### What are your growth plans for the next 3-5 years?

To achieve the target of becoming ₹ 100 Cr company in next 3-5 years and offer employment to 500+ Women:

- We are going Global.
- List the Company for IPO.
- Invite VC funding for growth.

Imperative's expansion plans include making inroads in diversified verticals like:

- Developing AI enabled BOTs.
- Surveillance Drones.
- Agro-Tourism.
- Foods & Beverages.
- Healthcare Solutions.

Anand Mahalunkar Managing Director

Sadguru Autocomponents Pvt Ltd, was incorporated in April 2010 in manufacturing of automobile parts to be supplied to OEM. Initially the company undertook doing job work for production of parts through High Pressure Die Casting. However, due to higher rejection levels from the buyer, the company faced huge losses during the first few years. With this experience, the company consciously started the production and supply of full finished parts. Using advanced machining techniques, we managed to reduce the rejection and also overcome the competition in supply of full finished parts. Today company has seven HPDC machines from 150 tons to 400 tons capacity, 25 CNC, 10 SPM which manufactures and supplies 3.5 lakh auto parts & 50 thousand LED Street Light/ Flood Light fixtures per month to different buyers. We are proud to say that we have arrested our rejection level to below 2000 ppm in die casting which is a huge achievement. During recession, the company diversified partly in to electrical parts which has helped us to sustain growth despite heavy drop in sales of automobile sector during the current year.

# What has been the success mantra of Sadguru Autocomponents Pvt Ltd?

Quick and timely decision of change over in business model and diversification in different fields other than auto parts has helped to sustain the difficult situation.

# Sadguru Autocomponents Private Limited

Continuous development, automation in production and operation to save time and reduce cost besides strong R&D to venture in to new business opportunities are the key factors to reach to a respectable level in a short span of time. Training & development of staff and workers for skill upgradation has helped to upgrade ourselves and to surpass the competition.

# Kindly elaborate on the innovation initiatives and the impact that it had on the company in the recent years.

While we were in to mass production strategy, we have used multi cavity dies for cost effective production. The interchangeability of these dies with other machines has reduced the break down time and ensured continuous and uninterrupted production and supply. We also have developed SPMs to take care of the volume and criticality. We have trained our manpower to avoid production loss and maintain production efficiency.

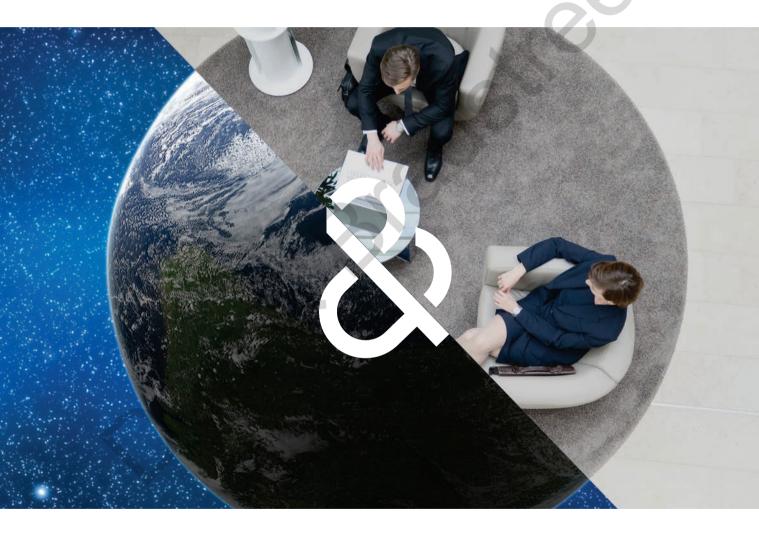

# What are the company's growth plans for the next 3-5 years?

- Today we are supplying full finished parts ready to use in assembly - we wish to enter in to semi/full assembly of parts as per the requirement of the clients.
- We also wish to launch our own brand in automobile parts as Sadguru Autoparts as well as in LED Street Light/ Flood Light as Sadguru Lights.
- We have plans to come out with single window solutions of making parts from raw materials to finished to semi assembly/ sub assembly/ full assembly.
- We have expansion plans of increasing die casting & machinery facilities in auto & electrical parts.

Enabling sales & marketing professionals to accelerate sales with precise targeting in the USA and UK markets

#### COMMERCIAL BANKING CLIENT TESTIMONIALS

1. Cogoport has had a notable association with RBL Bank. Over time, RBL Bank has emerged into becoming our primary banking partner through their structured financing solutions.

We value their team's capabilities and resources in catering to our digital banking needs. We're a highly growth-oriented company and the expectations with a banking partner involve more automated and efficient solutions in corporate finance while simultaneously fulfilling the objective to grow out of the traditional way of doing banking.

It is vital for any company to have a banking partner who understands their business and can extend the trust and support which is essential to operate in a dynamic business environment.

- Ruiya Tyaqi, Head of Finance, Cogoport Pvt Ltd.

2. Our relationship with RBL Bank strengthened once I experienced how convenient it was to get a loan sanctioned from the Bank. What makes us approach RBL Bank is their extraordinary customer service, prompt response and cordial interactions with the relationship manager. They have always come back to me with competitive interest rates which eases my decision-making process as well my organisations.

- Mahesh Tibrewala, Managing Director - Roha Dychem

3. Our relationship with RBL Bank is more than 3 years old now. Having dealt with the Bank for funding and working capital facility, we really appreciated the speed and approach of their team. In both cases, we were happy with the Bank's service, as our business model is unique and little difficult to understand. Our business scenario is dynamic, any delay in processing the proposal, would have resulted in serious implications on the business transactions. Even though there were some challenges that we faced along the way, seamless coordination at the Bank's end is what helped us come out of those challenges. We're extremely satisfied with the Forex transactions done with the Bank as well. We wish RBL Bank all the best.

- Rajesh Desai, CFO - Shreyas Shipping and Logistics Ltd.

4. We, at Jesons Industries Limited, are extremely delighted to have RBL Bank as our banking partner. We've been banking with RBL Bank since the last two years and have experienced great customer service since the first day.

Our Company is on a unique growth path and in this situation, we were looking for a bank that could provide us personalised service. RBL Bank understood our model and supported us within the prescribed timelines for all our business needs. Hence, with RBL Bank coming on board finding our path became easy.

We are sure that along with our growth, RBL Bank being our partner, will also grow exponentially.

We look forward to a long term banking relationship with RBL Bank.

- Rajesh Dangayach, Vice President Finance - Jesons Industries Ltd.

5. RBL Bank has been a dynamic partner in our growth story. Fast and flexible, a true banking partner for the start-up eco system. We are sure of a long-term relationship with RBL Bank.

- Ankit Fatehpuria, CFO - Zetwerks Manufacturing Business Private Limited

6. We have been banking with RBL Bank since the last 10 years, out of our experience of transacting with several banks, I wish to state that the product range and timely service offered by the experienced team at the Bank, is one of best as per the standard.

Many thanks to the continued support and cooperation extended by the Bank.

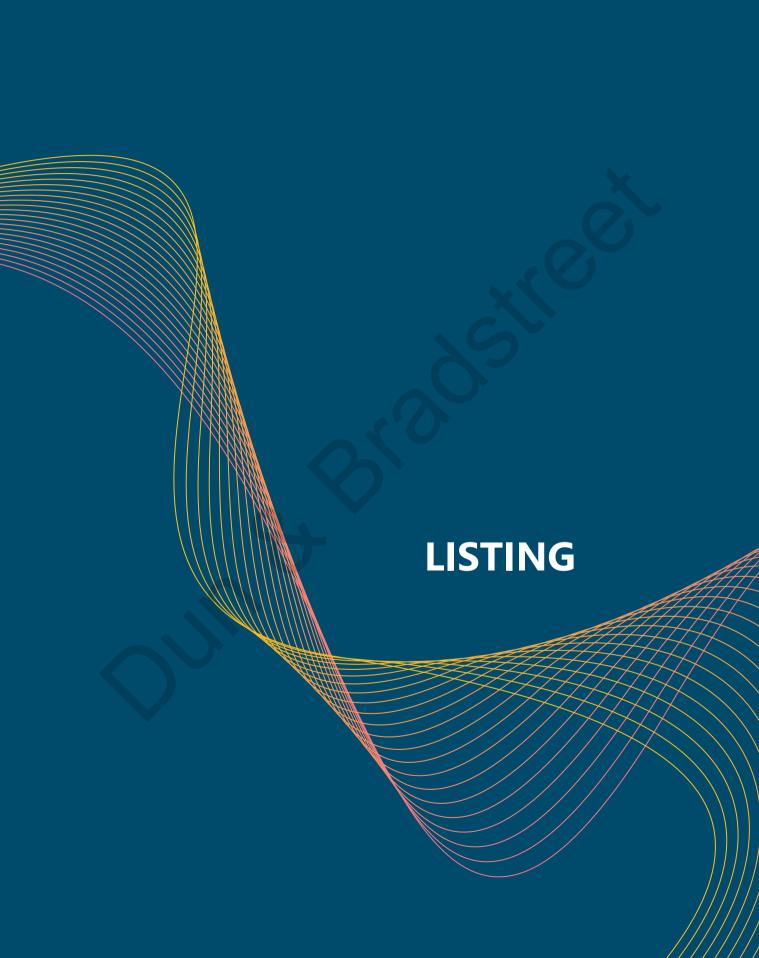

- Nirmal Parikh, AGM - Finance, Privi Organics India Ltd.

Make smart credit decisions faster, keep a watchful eye on accounts and monitor portfolio trends

#### **ECGC Ltd.**

#### **Empowering Exports**

ECGC, a premier Export Credit Agency (ECA) of Government of India (GOI) established in 1957, provides credit insurance covers to exporters against non-payment risks by the overseas buyers due to Commercial and Political reasons. It also provides insurance covers to banks against risks in export credit lending to the exporter borrowers. ECGC endeavors to support Indian Export Industry with its experience, expertise and underlying commitment to progress and advance of India's exports. ECGC promotes both Short Term (ST) exports (i.e. export realization within one year) and Medium and Long Term (MLT) exports (i.e. export realization extending over a period of more than one year).

The total exports supported by ECGC during the FY 2018-19 is around ₹ 6,60,000 crores. It is notable to mention that from the large number of exporters benefited by ECGC's covers; more than 92% are MSME exporters.

The major coverage has been to USA, UK, GERMANY and UAE. Major sectors covered were employment intensive sectors like Engineering Goods, Textiles and Allied products, Chemical and Pharma and Agro Products.

Further, ECGC provides cover on 239 countries including high risk markets.

The systemic role of ECGC in the context of Working Capital lending to exporters has never been more pertinent than in the present stress scenario in the banking industry. Under ST Export Credit Insurance for Banks (ECIB) lending risk in extending pre and post shipment advances are covered. The total claims paid during the year to both banks and exporters ₹ 1013 crores. The company's contribution in the last decade

by way of claim settlements of around ₹ 8300 crores has provided the much needed support to exporters and relief to banking system in ensuring adequate lending to exporters. Despite this huge stress, a profit of ₹ 314 crore before tax with a dividend of ₹ 72 crores to Government of India (GoI) has been concluded during FY 2017-18.

In all, there are 19 products for exporters, 11 Products for banks and 12 products for Medium and Long-term Exporters/Banks. Further, ECGC also provides Customized Covers to make it cost effective and administrative comfort for exporters and banks. It has also introduced Factoring facility to MSME Sector and cover in foreign currency to Special Economic Zone Exporters.

ECGC being one of the oldest ECAs in the world has been playing a crucial role in insuring the export receivables and lending to exports. The exemplary service rendered has been validated by the best ECA award won in 2017 against competition from older and larger ECAs. Further, Company has been awarded by Council for Fair Business Practices under Service Sector for practicing, promoting and committing to fair business practices and also received Best Performance in General Category from Ministry of Micro, Small & Medium Enterprises, Government of India for Exemplary Work under Public Procurement Policy for Promotion of SC/ST Entrepreneurs It has been receiving first or second price in "Indira Gandhi Award" (Now renamed to "Rajbhasha Kirti Puraskar") from since 20 years and winning first price in "Rajbhasha Puraskar" from Ministry of Commerce" from the last 7 years and received awards at various centers in India through Town Official Language Implementation Committee (TOLIC).

आसियान देशों में आपके निर्यात उतने ही स्थिर हो सकते हैं जितने कि सुदूर पूर्व में। Your exports to **ASEAN** countries can be as serene as the Far East.

ऐसे देशों का पता लगाएं जहां निर्यात की संभावनायें मौजूद हों। ईसीजीसी की निर्यात के अनुकूल ऋण जोखिम नीतियों का लाभ उठाएं। Shift your sights to countries with untapped potential. Benefit from ECGC's export-friendly credit risk policies.

- Trainings

#### ROOP

#### Roop Automotives Limited

#### The Zeal to make a difference, Die hard resilience and People over Profits

Roop Automotives Ltd (Roop Auto) was established in 1991-92 when 3 first generation entrepreneurs decided to indigenize an imported auto part for Maruti Suzuki. From an initial production of 60000 parts in first year, the company today manufactures more than 38 million parts which has been a result of our VISION: Aim for operational excellence and consistently enhance our technical capabilities and know how, hence becoming a supplier and employer of choice. Today, Roop Auto is the largest manufacturer of steering yokes in the world in its product category. We manufacture steering yokes, joints, Various types of sub-assemblies and Gear shafts.

Our present position as a strategic supplier for most of our customers is a testament to our hard work and innovation over the last 27 years.

We employ more than 2000 people across 3 manufacturing locations (Sohna and IMT Manesar in Haryana and Sriperumbudur in Tamil Nadu). The company plans to start production in its Gujarat plant in 2021-22.

Our excellence in global steering system market is a result of our stakeholders' belief in continual improvements and sheer hard work of our world class teams.

We are a focused producer of safety critical parts in high volumes. Exports constitute to more than 75% of the company's turnover. We supply to countries like USA, Mexico, Germany, Poland, France, Spain, Czech Republic, China and Australia. The company also has a very strong position in domestic market. More than 70% of cars on Indian Roads have a Roop Yoke in them.

#### **Business Mantras-**

- Customer Centric organisation
- Absolute and resolute focus on Quality
- Care for employee

- Always right the first time
- Process comes first

#### Our people:

Our greatest asset, and the key to our success, is our people.

Our top management team comprises of Mr. Mohit Oswal (Founder, Managing Director), Mr PK Salhotra (Founder, Director Technical) and Mr Gaurav Jain (Director HR, son of Founder Director Late Shri V K Jain). This team works as a motivating force for all the employees contributing to company's overall growth.

Our employees are a sound group of technically qualified individuals having been trained to work in a highly dynamic environment where ideas and energy flow coherently through the organisation leading to sense of dignity and pride.

Our Roop Auto family is a result of years of cooperation, smart thinking and belief in "Customer Elation and always take care of our people".

At Roop auto, we have put the people at the heart of our business strategy. Our employee centric policies and practices have set a benchmark in the Indian Auto component landscape.

After gaining manufacturing excellence of more than 25 years in Steering components, the company has now diversified into automotive gear shafts in its state of the art fully automated facility in IMT Manesar. With this new offering and the ever-expanding steering component domain, Roop Auto wants to continue maintaining a strong position in American markets, scale up business in European markets and very soon enter South Asian markets as well without losing focus on Domestic business.

#### Achievements:

- Best CSR Award by HR Association of India in 2018
- Best Auto comp company in Mid segment category by D&B in 2018 & 2019
- Best Employee Engagement Initiatives by D&B in 2019
- Chief Minister of Haryana felicitation for Skill India Program in Haryana in 2019

Towards society: Since our inception, we have believed in giving back to the society. Our CSR Arm "ROOP VK JAIN FOUNDATION" was launched in 2018 that focusses on Community development, Environment protection and Girl Child Education. Over the last few years, we have been taking care of 7 Govt schools covering more than 5000 students through our initiatives in Teacher and Headmaster leadership program, Workbook distribution for better learning, Computer and Science Lab. Our programs of women empowerment encourage entrepreneurship and defense against domestic violence

#### Manufacturing excellence:

We believe in the philosophy of the workplace where customer focus, problem-solving, teamwork, and leadership results in the ongoing improvement in an organization. Across all our production facilities, Idea/kaizen scheme have been instrumental in cost control and quality improvements leading to higher engagement.

We are an IATF certified company and our constant endeavor to be up to date with the latest developments led to establishment of Govt. approved R&D Centre in 2015-16.

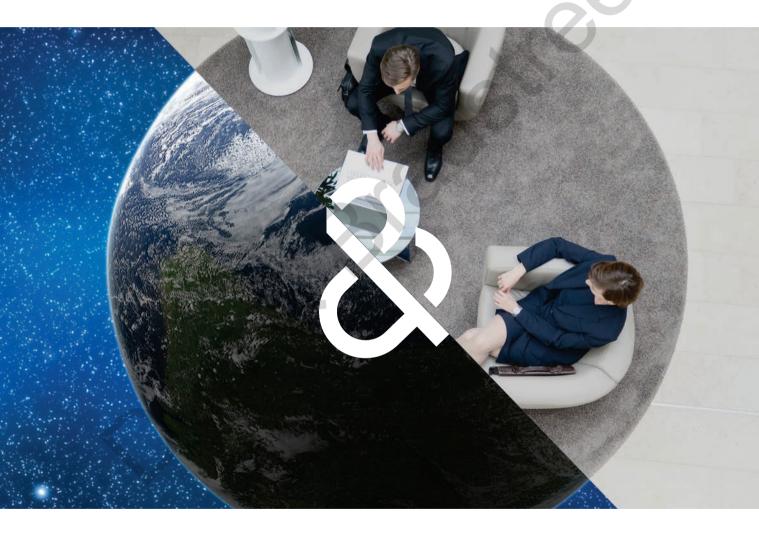

We at Roop Auto have the vision to create, the brains to implement and the loyalty of each other to achieve greater heights.

After all, we are only 27 years old. We have Miles to go...

- Received 'Green' rating in Vendor Quality System Assessment Report conducted by Maruti Suzuki India Ltd in March 2018

#### **About the Company**

Mohindra Fasteners Ltd (MFL) is engaged in the manufacturing of high tensile fasteners and other machine components. The company specializes in socket products and supplies value added and quality sensitive parts to customers across the world. The company caters to the automotive and industrial fasteners needs in India and abroad. It manufactures a wide range of industrial fasteners like bolts, studs, screws, nuts and special fasteners amongst others.

#### **Operations**

MFL operates through three integrated plants at Rohtak, Haryana. The company's wide range of products are categorized under three industry verticals comprising of Standard / Norm Parts, Parts by Drawing / Automotive Parts and Stainless Steel Parts. The domestic sales constitute approximately 40% of the total sales, while exports constitute nearly 60% of the total sales. The company's domestic sales constitute supply of high tensile fasteners to the two-wheeler manufacturers (direct supplies to Hero MotoCorp Ltd) and to a lot of Tier 1 vendors of Maruti Suzuki, Hyundai and Tata Motors Ltd. With the help of in-house hot forging, the company caters to the bigger and odd-size requirements of the customers.

   capacity to manufacture 520,000 sets p.a.

#### About the Company

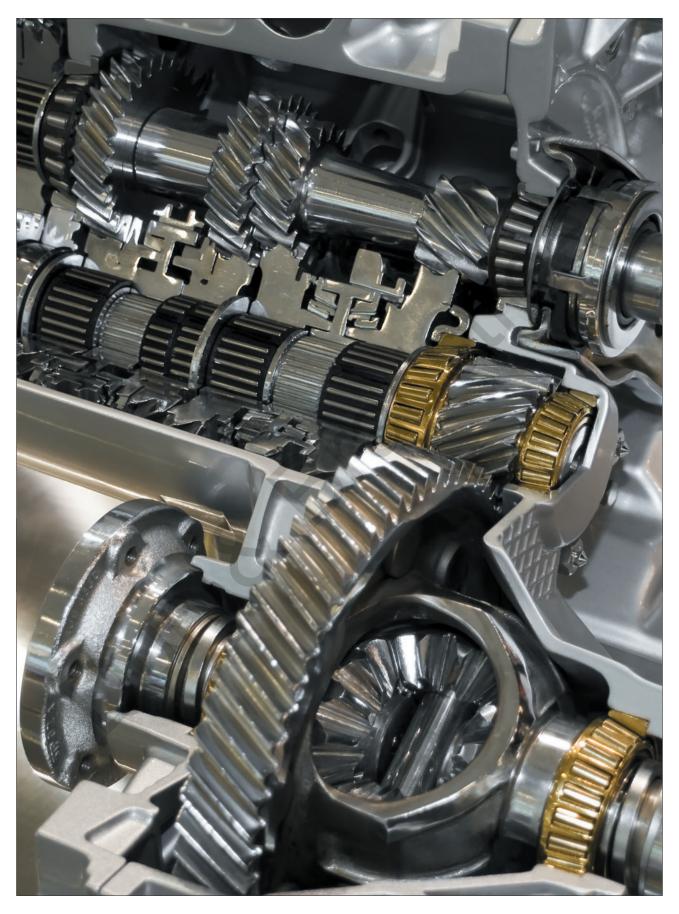

Roop Automotives Ltd (Roop Auto), incorporated in 1991-1992, is an OEM supplier of auto components such as steering yokes, automotive connecting rods, automotive housing, differential housings, connecting rods, proportionating valves, special bolts, engine connecting rods, automobile housing, PTO and gears among others. The company is a major supplier to all OEMs in steering system and has a strong presence in tier-II segment of the industry.

#### Operations

The product range of Roop Auto includes Steering Column Yokes, Steering Column Sub-Assemblies (Automotive), Commercial Steering Systems, Differential Cases and Gearbox Housings, Precision Turned and Machined Parts and PTO Adaptors and Sleeves. The company has designed and developed various innovative products such as DCCV Housing with single welding, replacing two-piece design; shaft with blue coating for adjustable (tilt & telescopic) steering column; cross with nylon nuggets; metal clip with GeoMat coating for collapsible steering column and nylon molding on steering shafts among others. In its constant effort to export to new geographical locations, Roop Auto has been successful in entering Poland, Czech Republic in Europe, Brazil in South America and the most recent, China in Asia. All these customers are OEM based and with the addition of these, the company exports to all continents of the world.

#### **Key Business Highlights**

- In FY19, created green field manufacturing facility at Lote, in Ratnagiri district, Maharashtra which doubled plant capacity & reduced field rejection value to 0.1% from 0.3%
- Introduced eight products in Indian & global markets
- Added 45 new customers including 25 in export segments
- Supports 70% product requirement of silicone based sulphur release agent in India
- Received Company of the Year 2018 – Silicones award by Zee Business

#### **Elkay Chemicals Private Limited**

#### About the company

Elkay Chemicals Pvt Ltd (Elkay Chemicals) is engaged in the manufacturing of silicone-based specialty chemicals & formulations. These specialty and performance chemicals are used as additives to enhance final product performance in diversified industrial segments. Elkay Chemicals caters to segments namely, agriculture adjuvants, water repellent construction products, petrochemical additives, rubber/tire mold release, textile finishing, pharmaceutical intermediates, medicament lubricants, personal care additives and chemical process additives (antifoams).

#### **Operations**

Elkay Chemicals is headquartered in Pune and has two plants located in Bhosari, Pune and Lote, Chiplun in Maharashtra. The company provides 80 high performance products and is a major exporter of silicone products & solutions. Elkay Chemicals has a capacity of more than 4000 MT/year of specialty silicone fluid and more than 1500 MT/year of specialty emulsions and formulations. The company has a branch office in Illinois, USA. Silicone International Products, engaged in manufacturing monomers, is the subsidiary of Elkay Chemicals.

Elkay Chemicals began its exports business in the year 1999 and presently exports half of its annual output. The company's silicone fluids and variety of silicone products have been recognized in the global markets. The number of export customers of the company have increased by 150% over a period of three years. Most product lines of the company recorded a substantial increase in exports with the exception of textile finishing agents.

The clientele of the company includes Bharat Petroleum, Biltech Building Elements, Bridgestone, Cipla, IOCL, Mankind Pharma, Sun Pharma, Piramal, Pidilite, Wallace Pharmaceuticals among others. Elkay Chemicals is accredited with ISO 9001: 2015 certification, REACH Registered and state approved FDA facility.

#### **Innovation Details**

Elkay Chemicals' corporate growth strategy focuses on identification of import substitute molecules or product formulation, execution of development study, creation of prototype product, molecule, field testing of the product, scale-up and commercialization of the product. The company's technical capabilities include polymerization, equilibration, filtration, distillation, emulsification, solvent extraction, hydrosilylation and evaporation.

Some of the innovation highlights include:

- Identification of silicone hydrophilic softener that would not only improve softness and bounce of fabric and garments but also absorb water. This state-of- the-art molecule is expected to change the feel of the garments and offer comfort to humans.
- Identification of Silicone Demulsifies molecule that would help reduce water content in crude oil as it is extracted from the field
- Undertook process innovation such as batch time process improvements by introducing new machinery like glass line reactors and fume silica charging device, silicone hydrosilation technology and silicone resin technology
- In 2019, under the green building norms for rain water harvesting, the company was able to collect water at the rate of 10 lit/min in moderate rain through a cost-effective technique

Some of the patents awarded to Elkay Chemicals are as follows:

- Process for conversion of Silicone intermediate streams to high grade Silicone monomers
- Unique method of Silicone emulsion stabilization for longer life
- Silicone resin for concrete water repellence and water control
- Hydrophilic softeners for state-of-the-art towel surface treatment for luxurious feel

### **Business Excellence Highlights**

- The company achieved a healthy revenue growth of 60% and profit growth of 400% in FY19 on back of increased focus on the overseas market
- The company's exports
   to Spain and Bangladesh
   increased from ₹ 60 mn and
   ₹ 90 mn respectively in FY18
   to ₹ 1.5 bn and ₹ 1.46 bn
   respectively in FY19.

### **About the Company**

CMI FPE Ltd (formerly Flat Product Equipments (India) Ltd) was incorporated in 1986. The company engages in the business of customized design, engineering and installation and manufacturing components of cold rolling mill complexes, processing lines, chemical equipment, industrial furnaces and auxiliary equipment for the world-wide steel industry. In addition to designing equipment, CMI FPE also offers customer support programs to assist in the start-up of the new unit, including complete and flexible customized training sessions, operations and maintenance of equipment as well as erection and commissioning. The company has global footprint across Asia, Africa, Middle East, Europe, North America, and South America.

### **Operations**

The company has two manufacturing units on the outskirts of Mumbai. These workshops are well-equipped with modern tools, machinery and assembly activities that conform to international quality and safety standards. The organization has carved a unique niche for itself owing to its comprehensive design and engineering solutions. Using cutting edge CAD/CAM software developed in close collaboration with its customers and engineers, every requirement can be specifically customized. The company is ISO 9001:2015 certified and is a preferred partner to supply innovative solutions for clean, reliable and efficient equipment worldwide.

HYT Engineering Co. Pvt. Ltd. started operations in 1977 with small lathes and drilling machines. A pioneer manufacturer of machines for Indian Railways, HYT has grown into a technology driven organization, having manufactured over 700 machines, adopting even international standards. Its products find application in Railways, Defense, PSU and Private sector companies with heavy engineering activities.

### **Product Range:**

☐ CNC Surface Wheel Lathe ☐ CNC Underfloor Wheel Lathe ☐ CNC Portal Wheel Lathe ☐ CNC Vertical Turning and Boring Machine ☐ Rail Based Loco Shunter ☐ Axle Journal Turning and Burnishing Lathe ☐ Multipurpose Armature Machine ☐ Automated Train Washing Plant ☐ Other special purpose machine ☐ Project

SAFOP S.R.L. opened its door in the year 1923, with the construction of small machine tools. Over the course of 9 decades, production activities and techniques have upgraded to manufacture premium quality products. With great attention to design and R&D, SAFOP has achieved expert specialization. SAFOP caters to several industries, including Railway, Energy, Steel, Oil, Paper, Shipyard, Aerospace and Heavy industries.

### **Product Range:**

☐ CNC Under floor Wheel Lathes ☐ CNC Portal Wheel Lathes ☐ CNC LEONARD Series Ultra Heavy Duty & Multipurpose Lathes ☐ CNC HT Series Medium Duty Lathes ☐ Ball Matic ☐ Drill Matic ☐ Special Machines ☐ Project

Together we aim to become a powerhouse for innovation and a hub for the exchange of ideas and to become a world leader in the development and supply of machine tools. Our products will be up to date and will form a benchmark for future technology, also making them maintenance free. We will build projects with newest technology and introduce automation in railway operations.

We are a company with a cause to help and support the communities regionally and world-wide.

Whole Time Director, HYT Engineering Co. Pvt. Ltd. Vice President, SAFOP S.R.L.

We aim to become world-class manufacturers producing quality machines with competitive prices, with regards to functionality and structural integrity, while maintaining a customer centric approach.

QBurst manages multiple projects around eCommerce, mobile and web technologies with support from multiple development centre across India. The company has been a research and development partner for one of the world's largest clothing retail brand; research and development partner for a globally respected German luxury automobile brand; development partner for United Nations specialized agencies and programs and product development partner for startups and young businesses across the world. SeeMyMachines, a cross-industry IoT platform of QBurst that automates processes such as asset management, condition monitoring and maintenance management, with integrated capabilities for inspection management and RTLS (Real-time Location System); was deployed at a leading hospital in South India. The IoT solution tracks specimen movement between transit points to ensure transparency and accountability. This was a first of a kind deployment at a hospital in Kerala.

KPL's infrastructure for FIBC, Woven Bags, PP and Multi Filament yarn and other products include Extrusion Tape Lines from Lohia and Starlinger Austria; Double Side Extrusion Coating Plant from Windmoller and Holscher, West Germany; Bulk Texturising machine from Airtex, USA among others. KPL's market presence in international countries contributes to about 70% of the total revenue. The company has market presence in approximately more than 40 countries.

P D Samudra, CEO & Managing Director

Mr. P. D. Samudra is Chief Executive Officer & Managing Director and Member of the Board at thyssenkrupp Industrial Solutions (India). He has completed 38 years with thyssenkrupp. An alumnus of IIT Mumbai (Chemical Engineering), Mr. Samudra earlier headed thyssenkrupp Industrial Solutions (India)'s Sales & Business Development Division. He has a long experience in the selling and execution of process technologies / plant engineering for Oil Refining, Petrochemicals, Polymers, Fertilizers and related projects. He was Past Chairman of the IIChe Western Region and PPMAI. He is also a recipient of several prestigious industry awards.

### thyssenkrupp Industrial Solutions India - An Indian engineering company success story

Amongst the leading engineering companies for the chemical process industry in India, the company (formerly Uhde India) is positioned in the Industrial Solutions Business Area of thyssenkrupp AG, Germany. It operates from its offices in Mumbai and Pune with a specialist workforce of 1,500.

Its track record of 750 plus successfully-completed projects (see box) in India and abroad in its core competencies covers the Who's Who of the Indian chemical industry. The company's ability to offer proprietary technologies and also work with other licensors' technologies, engineer and implement, flexibility in handling projects in EPC-LSTK, EPCM or PMC modes, commitment to quality, environment, health & safety make it one of the preferred engineering project partners in India.

### **Partnering**

Fully-compliant, the company's distinguishing feature is its ability to offer customers both technologies and engineering/ plant implementation excellence delivering standout plants characterized by cutting-edge technologies. superior yield, environmental considerations and longevity.

### Business and Implementation Philosophy

The company is project-driven, committed to the Indian and overseas markets, judiciously pursues business opportunities and adopts a concept to commissioning approach. Projects are implemented using highly-skilled resources, modern tools and dedicated project teams. It leverages its familiarity with international codes & standards, value-added engineering practices and global experience.

### Core Competencies Technologies, Plants & Projects for:

- Fertilisers
- Petrochemicals & Polymers
- Refinery Units
- Caustic Soda-Chlorine
- Metallurgy (Coke Ovens & Non-ferrous)
- Inorganic Chemicals
- Cryogenic Storages

### **Vision**

Maintaining quality, safety, innovation, sustainability and value-added plant engineering / implementation are high on its agenda. The company is committed to focusing further on EPC projects in the future.

### **Results**

The company's success lies in its successfully-implemented projects, the vision of its management, and its ability to adapt to dynamic business cycles. Consistently good financial results, credit ratings and industry awards speak for its operational prudence and performance. Customer satisfaction however is central to its mission of being continued to be recognized as the 'best EPC company' for the chemical industries.

### Some major project landmarks in a journey of excellence

- Over 70% market share for Caustic Soda-Chlorine plants in India
- A number of Oil Refinery projects across India
- Over 60 projects for Cryogenic Tank systems
- Largest number of DAP-NPK projects in India and abroad
- Several Petrochemical & Polymer projects eg LAB, HDPE, PVC, PP etc
- Projects for Alumina, Zinc Smelters, Iron Oxide etc

- It has set up a digital bidding cell, technology sharing cell and procurement hub for its global business, and exports engineering services to Germany, Hungary, Saudi Arabia and Iran.

### **About the Company**

thyssenkrupp Industrial Solutions India Pvt Ltd, established in 1977 as Uhde India, is part of the thyssenkrupp Industrial Solutions AG Group, Germany. thyssenkrupp is an engineering consultancy company providing the entire range of services involved in the design and construction of plants for the chemical, petrochemical, fertilizer, refinery and metallurgical industries, low temperature storage and industrial projects. The company provides Engineering, Procurement & Construction Management services (EPCM) and / EPC-LSTK (lump sum turnkey) plants. Since its inception, thyssenkrupp has executed over 650 major assignments for a variety of projects in its core competence areas for chemical majors in India and abroad.

### **Operations**

The company executes contracts mainly under four modes — Engineering Procurement Construction/ Lump Sum Turnkey, Engineering, Procurement, Construction Supervision Services, Project Management Consultancy and Front-end Engineering Design. It operates full-fledged modern engineering facilities in Mumbai and Pune with around 1,200 trained technical experts and an annual capacity of over 2 mn engineering hours. thyssenkrupp executes projects using a dedicated task force concept with multi-disciplinary specialists for mega-projects; and a production unit concept for smaller-sized projects, where team members are drawn from engineering pools. The company is ISO 9001:2015, ISO 14001: 2015 and BSOHSAS 18001:2007 accredited.

### Please describe in brief the journey of Group Abhinav.

India's Abhinav is oldest. alobal mobility pioneering company, established in 1994. Our services include immigration and visa consulting, application and relocation processing, advice for individuals, families and corporates. The group has 6 different verticals dedicated to distinct profiles - skilled workers and professionals, entrepreneurs, investors, start-ups, overseas studies and international recruitment.

With humble beginnings in a 100 square feet office, the organization today has 10 offices across all major cities in India, manned by a team of 330 trained and experienced executives. The company is a member of reputed associations such as PHD Chamber of Commerce and Industry, NASSCOM, Confederation of Indian Industry (CII) and ASSOCHAM.

In the last three years, the company has observed stellar growth of almost 25% - 35% annually. Significant expansion plans are in the pipeline. Within the next 12 months, 14 new offices will be fully operational and 200 new members will join the team.

These efforts are aimed towards creating a pan-India presence and providing clients a seamless experience backed by transparency, experience, trust and credibility – the values that have defined the brand thus far.

## What are the global mobility products that are offered by the company to Small and Medium-Sized Enterprises, their promotors and directors?

While it is easy for large corporates

to transfer their senior and midlevel executives across the world and plan global expansion, this is not the case for SMEs. Through our services, the promoters, owners and senior executives of such companies can be granted visa clearance, them enabling to efficiently relocate overseas. We also provide assistance for establishing branch offices and subsidiaries overseas, and facilitating intra-company transfers of senior executives, along with their partners and children.

### What are the steps the company has taken to improve the quality of services for its clients?

Since we thrive in a knowledge-driven industry, investment in human resources through rigorous training is essential. We have also developed sophisticated IT infrastructure to enhance customer support services and database management. We also prioritize the interest of internal stakeholders, since satisfied employees create satisfied customers.

### Why do Indians look for relocation and settlement options outside of India?

For SME owners, major reasons for considering immigration include the boundless possibilities for expanding their business beyond current frontiers or limitations, and the availability of funds at reasonable interest rates. In addition, relocating abroad offers various social security benefits and an enhanced quality of life.

### On a national basis, what is the company's standing in terms of competition?

We work for quality instead of quantity business, in compliance with applicable laws, values and

ethics. Irrespective, we have always been the industry leaders in our domain. The brand has generated considerable goodwill and a strong recall value in the fields of global mobility, overseas studies, immigration and visa consulting.

### What are the company's group websites?

We have different websites dedicated to each vertical.

### **Business Excellence Highlights**

- Jaipur Rugs factory-less
   weaving empire has become
   the source of world class
   production and positive
   transformation for the
   weaving community.
   Collaborated with renowned
   designers like Matteo Cibic,
   Gauri Khan, Kavi collection,
   Luli Sanchez, Arteams, Jenifer
   Adams to name a few.
- Developed tools and inhouse apps for smooth functioning of operations.

### **About the Company**

Jaipur Rugs Co Pvt Ltd, established in 2006, is a social business that connects rural craftsmanship with global markets. It is a family business based in Jaipur, offering an exclusive range of hand-knotted and hand-woven rugs made using 2,500 years old traditional art form. The company operates through a unique business model, which provides livelihood to the artisans at their doorstep and has also changed the standard practice of involving middlemen to work with artisanal communities. The company's business model has become a subject of study by various management schools and thought leaders around the world.

### **Operations**

Presently, the company has a network of over 40,000 artisans spread across 600 rural Indian villages in five states of India. It has an end-to-end business model and follows vertical integration, right from sourcing of wool to exporting finished handmade rugs. Reviving the dying art of carpet weaving, creating a sense of bonding and building community is at the core of the company's business philosophy. Jaipur Rugs has been working towards bridging the gap between the weaver at the grassroots and the urban consumers. The modern and eclectic collection of rugs made of the finest wool and silk is exported to more than 60 countries, with the company's US sales arm, Jaipur Living, Inc located in Georgia, Atlanta.

#### **Innovation Highlights**

- Undertook the development of silicone based sulphur release agent and now supports 70% of the said product requirement in India
- Introduced eight products in Indian & global markets
- Implemented ERP system such as SAP & Data
   Management System
- Added 45 new customers, including 25 in export segments

## **About the Company**

Elkay Chemicals Pvt Ltd (Elkay Chemicals) is engaged in the manufacturing of silicone based specialty chemicals & formulations. The company manufactures a broad array of silicone-based products that are customised to meet the diverse requirements of its customers across industries such as agriculture, construction, petrochemicals, personal care, textile, pharmaceuticals, rubber among others. The diverse product portfolio lowers business risk and the risk of product obsolescence or commoditization in any specific product line.

#### **Innovation Details**

Elkay Chemicals' corporate growth strategy is innovation centric. It involves identification of import substitute molecules or product formulation, execution of development study, creation of prototype product, molecule, field testing of the product, scale-up and finally commercialization of the product. The company identified silicone hydrophilic softener that would not only improve softness and bounce of fabric and garments but also absorb water. The company has also identified Silicone Demulsifies molecule that would help reduce water content in crude oil as it is extracted from the field. The company undertook batch time process improvements by introducing new machinery like glass line reactors and fume silica charging device, Silicone hydrosilation technology and Silicone resin technology. Several patents have been awarded to Elkay Chemicals.

|   | Best Woman Entrepreneur  | Chief Executive Officer | Veena Kohli |  |

#### **Business Excellence Highlights**

- Developed, manufactured and marketed reagents for more than 20 models of Hematology analyzers, in a span of 4 years
- Recognized as the most trusted brands at the Healthcare India Brand & Leadership Conclave in 2018
- Vanguard was awarded as the Best Healthcare Manufacturing Company in the IVD sector for the year 2017-18 by Medgate Today and Messe Dusseldorf, India

Veena Kohli, an alumnus of the All India Institute of Medical Sciences, New Delhi, is currently the Chief Executive Officer of Vanguard Diagnostics Pvt Ltd (Vanguard). She possesses more than 29 years of experience in the field of medical diagnostics, life sciences, chemicals and animal health care. During the course, she had the opportunity to develop rare skill and expertise encompassing the entire value chain of product & business.

She was Vice President and head of the Global Diagnostics Business Unit at Avantor Performance Materials, where she was responsible for business strategy formulation, product road map, driving business partnerships & technology and the global P&L. She grew the diagnostics business in India by 322% in three years through organic and inorganic endeavors. The business grew to be among the top five domestic diagnostics manufacturers in India. She was responsible for setting up two manufacturing plants in India for Diagnostics and Veterinary Pharmaceutical products.

Veena realized that 'Make in India' specially for the in vitro diagnostics sector, would receive an impetus only if some experienced professionals with domain knowledge, would come forward to serve as a manufacturing arm for the importing companies. With this, she and her three colleagues from Ranbaxy and Avantor formed Vanguard in 2015. She has received several awards and recognitions.

|   | Best Start-up Initiative   |           | Co-founder            | Manish Lunia |             |

#### xyz

- Flexiloans stands out from competition in three major aspects – technology, product and partnership.
- As of FY19, the company has a reach of 1,000+ cities and towns with a branchless presence and their average loan ticket size is ₹ 287,000.
- Flexiloans has custom built technology that allows it to be agile and foster innovation that exceeds any lender in the Indian fintech ecosystem.

## **About the Company**

Epimoney Pvt Ltd is an RBI registered non-banking financial company focused on bridging credit gap by the advanced use of technology and data. The company provides business loans, under the brand name, Flexiloans, to SMEs across India.

## Start-up Initiative

The company was founded by 4 ISB/IIT alumni with a combined financial service experience of 45+ years. The company started its business operations in 2016, with an idea to tap in to the opportunity in MSME lending space. The company is bridging the gap between demand for short term credit from the MSMEs and inability of traditional banks and NBFCs to meet this requirement due to rigid credit policies and their focus on high-ticket size products.

The company is trying to solve this very problem by digitizing the entire process and creating innovative and flexible lending products. Being a digital lender, the company is able to reach the farthest corners of the country and provide loans as small as ₹ 50,000 and disburse them within 48 hours of loan application. The company has over 100 partnerships with players such as Flipkart, Amazon, PayTM, Pinelabs, Mswipe, etc. for accessing over 2mn businesses. It is the biggest lender on the ecommerce ecosystems as well as on supply chain ecosystems. Besides, the company has over 20 proprietary data science assets and five patentable algorithms across the loan life cycle.

|   | Special Award Category  | Managem | ent Details         |  |

#### XVZ

- The company produces automotive components using sintering process considered to be eco-friendly.
- In FY19, the company developed cam-to-cam split for 2-litre using the sintered manufacturing technology.
- Starting with stainless steel HEGO sinter boss products, the company is now a leader in the manufacture of sintered synchro hub

#### **About the Company**

Sintercom India Ltd, established in 2007 as Maxtech Sintered Products Pvt Ltd engages in the manufacturing of automotive sintered components. The company specializes in medium to high density sintered components for automotive engine, powertrain, exhaust systems as well as sensor components. Its product portfolio includes drive-train gears, engine sprockets, pulleys, crankshaft bearing journals, transmission gears, synchro hubs, as well as ABS rings, Sensor Hego bosses and flanges.

#### Make in India Initiative

Sintercom provides high-volume, high-precision and low-cost components, tailored to the customers' specific requirements. The company operates an integrated manufacturing facility along with an engineering and development centre and a well-equipped in-house quality lab and is IATF 16949:2016 certified. The company is one of the first sintered player in India to develop camto-cam split gear for one of the reputed OEMs. These gears are currently imported from Europe to India as there are no sintered player manufacturing the same in India. The company has developed the said technology in 2019. The production of the product has just started after rigorous testing by the OEMs. The company is currently in the process of getting necessary approvals for export of this product from India to Europe.

## **NeoGrowth Credit Private Limited**

#### **Technology Excellence Highlights**

- Launched 2 new products -PayLater & Vendor Finance, which contributed to 20% of total disbursements
- Implemented Sun Infosystems for all finance and accounting operations and tracking
- Listed amongst the Top 75
   Global SME-Focused FinTech
   Startups by Medici in 2019
- Awarded 'Best Fintech SME-Connect' at India Banking Reforms Conclave & BFSI Awards in 2019

## **About the Company**

NeoGrowth Credit Pvt Ltd (NeoGrowth), a registered NBFC, is engaged in providing quick and easy access to credit to the under-served MSME segment. The company through its technology-enabled processing provides loans to the merchants against their future digital sales and unlocks credit that is tailored to the merchant's business requirement.

#### **Technology initiatives**

NeoGrowth pioneered a model that uses data from credit and debit card sales to determine the credit worthiness of small and medium retailers and provide loans against future sales. The business model is built on a digital platform with both disbursements and collections being entirely cashless supporting the government vision of moving towards a cashless economy. The loans come with features like the daily repayment model which is focused on customer centricity. This feature helps merchants to plan their cash flows better, especially during slow and slack seasons. These loans are processed much quicker than a typical loan, giving merchants access to required cash. The company has an inhouse custom built loan origination and management system called AdvanceSuite, designed for its unique loan product, NeoCash which is terminal based and repayment is automated through the terminals itself. The product design is tech and touch model keeping the customer at the core of the product, enabling faster processing of loans.

## Accurate Industrial Controls Private Limited

#### About the company

Accurate Industrial Controls Pvt Ltd (Accurate Industrial) is engaged in the manufacturing of power solutions to the Indian Defense. The company also offers complete integrated solutions to the defense sector along with manufacturing super-silent diesel generating sets for the telecom sector. The company is accredited with ISO 9001:2015 certification and follows military specifications such as CQAL 640A, JSS55555, MIL 461E among others.

#### **Operations**

Accurate Industrial has manufacturing facilities in Shivane and Hinjawadi (over 16000 sqm), Pune in Maharashtra. The clientele of the company includes DRDO, Indian Defense, Tata Motors, Bharat Electronics, Reliance, L&T, Bharat Forge, Emerson, Honeywell, Ashok Leyland among others. The company has been exporting for a period of nine years with over 30% of its revenue being generated from direct exports to US, UK, Europe, Australia, Gulf among others.

The company's core product portfolio consists of -

- Industrial Automation The company designs and manufactures PLC based industrial automation systems, distribution panels, M.C.C, P.C.C, starter panels, APFC panels, AMF panels, auto sync panels, instrumentation panels, local control stations and junction boxes for industrial applications.
- **Telecom Products** It offers customized solutions for camouflaging telecom towers and smart pole slim fit and is fully designed in-house.
- Industrial Refrigeration In collaboration with an UK based company ADANDE, the company provides industrial refrigerators offering superior food storage conditions, using less energy than the conventional refrigerators.
- Energy Solutions The company manufactures ultra-light & compact, customized DG sets
   power systems, designed to meet Indian Defense requirements with variable speed technology. The company also provides complete integrated solutions to the Indian Defense.
- IoT, Embedded & Power Electronics The products are designed and manufactured for, Industrial (ATM Manager, Free Cooling Unit), Power Conversion (SMPS, DC-DC Converter, Customized Invertors etc), Telecom (HPS Energy Conservation Solution, LVD Controller) and Medical (customized electrically-motorized operated beds) among others. Most of these products are IoT enabled.
- Renewable Energy Solutions Products for Power Conditioning, Power Conversion, Solar Grid-Tie Projects, Hybrid Solutions (Fuel cell, Wind & Solar)

In order to develop innovative products, Accurate Industrial has always been in constant collaboration with the Defence Research and Development Organization (DRDO) of the Ministry of Defense. The company demonstrated the use of Linear Motors in India and successfully implemented it in the Minefield Marking Equipment for the Indian Army. These systems were completely integrated by the company and 70 vehicles were supplied to the Indian Army.

#### Innovation highlights

The company has developed the following:

- Power solution (generating set) based on a rotary helicopter engine with high speed alternator. This concept is reported to be new concept in India and probably in the world.
   The set is reported to be modular and back-pack carriable/mule carriable.
- Novel concept of Hybrid Mobile Power Solution for the Indian Army, based on trailer and
  consisting of wind turbines, solar panels, two DG Sets and a fuel cell system for providing
  electric power on a continuous basis to far-off military bases of the Indian Army
- Novel power supply systems for Akash Missile Next Generation, with systems being ultracompact, lightweight, smart, failure proof & can function continuously.
- Developed inverter-based DG Sets for the telecom industry. The GenSets are fuel efficient and super silent. This set has been developed for a Japanese company with orders of over ₹1 bn under finalization. These products even have great export potential.

- One of the 1st Indian company to supply a transfer case system to China & Thailand
- One of the 1st Indian company to design, develop & supply a transfer case system to a global auto OEM (FORD)
- One of the 1st Indian
   Company to introduce state-of-the-art 6 speed manual transmission with integrated 4WD transfer case solution
- One of the 1st to introduce cutting-edge carbon-lined steel synchronizer full system solutions to OEMs in India

# **Divgi TorqTransfer Systems Private Limited**

#### About the company

Divgi TorqTransfer Systems Pvt Ltd (Divgi-TTS) was formed in 1964 under the leadership of Mr Ramrao Divgi and Mr Bhaskar Divgi. The company is engaged in manufacture of automotive drivetrain solutions and products. Divgi-TTS' product portfolio entails a range of transfer cases, torque couplers, automatic locking hubs, synchronizer systems and various transmission components. In 2016, the company bought BorgWarner equity in DivgiWarner and became Divgi TorqTransfer Systems Pvt Ltd.

The company has four facilities – 2 plants and 1 Centre of Excellence facility are located in Pune. 1 plant is located in Sirsi, Karnataka.

#### **Operations**

Divgi-TTS offers specialized and highly engineered solutions such as transfer cases, Torque Couplers & Auto-Locking Hubs (ALH), essential components for 4WD/ AWD vehicles and synchronisers for transmissions (gearboxes). Broadly, the company offers the following solutions:

**Torque Management Solutions** - Mechanical Shift Transfer Case, Electric Shift-On-the-Fly Transfer Case, Torque on Demand Transfer Case, Auto Locking Hub, NexTrac Interactive Torque Coupler and Double-Offset Transfer Case

*Transmission Solutions* – Synchronizers, Electric Vehicle Transmission, Dual Clutch Transmission and 6-speed Manual Transmission

The turnkey solutions offered by the company are used across automotive industries; utility vehicles, agriculture, commercial, industrial and construction equipment from its three production units located at Bhosari in Pune, Shivare in Pune and Sirsi in Karnataka. Divgi-TTS' clientele includes Tata Motors, Mahindra and Mahindra, Ford, Toyota, Force Motors, TAFE, Ashok Leyland among others and customers in Russia, Korea, China, Thailand, UK and USA.

The company has strengthened its development programs and investments on Dual-Clutch Transmissions and Electric Vehicle Transmissions along with adding high performance manual transmissions to its current products portfolio. Additionally, Divgi-TTS has been investing significantly in global R&D initiatives and expanding its manufacturing capacities to include design and development of key constituent technologies and services such as dual clutch, hydraulic control unit, transmission control unit, rig test designing and execution and calibration services to suit OEM customer requirements.

During FY19, the company dispatched first batch of transfer cases to UAZ Russia, started batch production of Nextrac coupler to Mahindra and started bonding facility for synchronizer parts at its Sirsi plant. The company also started production of Final Drive Gear (FDG) for a pioneering US-based electric vehicle manufacturer after receiving necessary approvals from Sona BLW and launched production for Toyota. During FY19, the company received Environment Management System (EMS) certification ISO14001:2015 from DQS Holding Gmbh.

#### **Association with BorgWarner**

Divgi-TTS has partnered with BorgWarner, located in Michigan, USA, under a technology license to design, develop and manufacture the portfolio of BorgWarner products for supporting its customers. With the company's in-house strength in design, development, testing & manufacturing and the technological expertise of BorgWarner in powertrain products, Divgi-TTS has built solutions applicable to a diverse application base; from light-duty mini-vans and trucks to medium-duty compact sedans and SUVs to heavy-duty commercial vehicles and agricultural tractors.

## Background

EAPL had its humble beginning in the year 1985. It was the brainchild of Late Shri Madhav Kamat who instituted this venture with espousing support from Mr. Christian Kruger of Switzerland.

By launching A1D1 – X, EAPL has established itself as a stronghold for in-house manufacturing of standard electronic instruments. As opposed to heavy material instruments, EAPL designs and develops a multitude of compact versions that ensure efficient and optimum level functioning of process control.

#### **Business Profile**

EAPL has always focused on manufacturing quality products at an affordable cost. The company has always sought to invent devices of high viability matched with sales at low prices; ensuing from critically controlled and standardized quality-oriented manufacturing methods and thereby assuring no compromise in the caliber of the product. Additionally, the company has been approved by CSA and UL for complying with regulated safety norms.

The products aren't specifically targeted at a particular industry. Instead, they function to the purpose of universal application. EAPL, thereby, has garnered a consumer base in both small and large scale industries in over 50 cities throughout India, as well as in a few GCC countries.

#### **Product Portfolio**

- 1) Electronic timers caters to various electrical applications through different functional features for varied time ranges and voltages in analog and digital formats.
- 2) Programmable Annunciators generally used in industries, utilities to annunciate visual and audio faults and its status at any given time.
- 3) Energy meters to monitor different parameters in an electrical system

- 5) Protection Relays to protect the equipment / system from specified power un-healthiness in the system
- 6) Digital Time switches to switch OFF any equipment, appliances, with reference to real time.

#### **Product feature highlights**

- 1) Designed as per DIN standard, 2) Compact enclosures, 3) Wide voltage/time ranges,
- 4) Unique features

#### **Business Operations**

Head quartered in Bangalore, EAPL is spread over a vast expanse of around 22,000 sq. feet with infrastructure capable of manufacturing more than 500,00 units annually.

EAPL is one of the earliest establishments in Bangalore to be certified under ISO 9001:2008 by **UL** (Underwriters Laboratory, USA) and has currently upgraded to ISO 9001:2015. The organization has also adopted the SAP B1 as a part of enterprise resource management and fact-based decision making. At present, the production units are equipped with the latest SMT technology. The Quality Control department compliments these efforts by executing timely quality checks ranging from raw material to different stages of manufacturing and concluding with the final product. (IS5834/IEC guidelines)

The organization also has its very own tool room and plastic injection moulding facility which uses UL graded material and consistently abides by quality and safety protocol. Moreover, the inhouse EMI/EMC lab strives to strengthen the validation process in assuring finesse in the quality of products.

The company's vision for the future is to acquaint itself with emerging technologies and develop new products in accordance with the requirements and expectations of its customers.

#### **Key Business Highlights**

- . It fulfils 95% of Indian Railways' requirement for CNC surface wheel lathes & CNC underfloor wheel lathe
- Has developed over 86 different types of machine and has supplied more than 700 machines to railways
- Accredited with ISO 9001:2015 certification.
- Implementation of Industry 4.0 in HYT's products and services.

## **HYT Engineering Company Private Limited**

#### About the company

HYT Industrial corporation established in 1977 were merged in HYT Engineering Co. Pvt. Ltd. (HECPL) in the year 1989. HYT Engineering Co Pyt. Ltd is the pioneer manufacturer of various machines for Indian Railways for 42 years. HYT, manufactures high precision special purpose CNC machines required for Railways Rolling Stock Maintenance. Products of HYT find application in diversified use namely with Indian Railways, Defence, PSU and Private Sector companies engaged in Heavy Engineering Activities. HYT has also supplied good number of machines to various metros in India as well as globally. HYT is also a global partner in the supply of these machinery and has contributed to its various customers worldwide which include large multinational corporations such as Alstom, GE, SMH Rail, Malaysia, Naledi Rail, South Africa, Sri Lanka Railways, Bangkok Metro, etc. HYT is highly known for its design excellence, innovation and customer-centric attitude. HYT has an Ultra-Modern Facility of 16,000 square metres for design, manufacturing and testing

HYT believes in providing turnkey solutions from design, manufacturing to after-sales maintenance. The company plans to be a global player by executing railway projects and supplying machine tools worldwide. The company uses environmentally best practices in manufacturing and engages in various CSR activities such as providing healthcare and education to the masses.

Under the Make in India initiative, company has manufactured & supplied Rail cum Road Vehicles (Shunter) hot spring coiling machine & end tapering machine for railway spring manufacturing to the Indian Railway.

#### **Operations**

HYT has 3 major segments:

- 1. Manufacturing
  - The company has developed and manufactured the following machines:
  - CNC Surface (Above floor) Wheel Lathe
- CNC Underfloor (Pit) Wheel Lathe
- CNC Portal Wheel Lathe
- CNC Vertical Turning & Boring machine
- Axle Journal Turning & Burnishing Lathe
- Multipurpose Armature machine
- Automated Train Washing Plant
- Rail cum Road Vehicle (Shunter)
- Special purpose machines & equipment
- 2. EPC turnkey & Infrastructure projects.

HYT undertakes various projects on a turnkey basis like:

- Wheel Repair/Maintenance Shop

- Rolling Stock Manufacturing Plant
- Fully Automatic Wheel & Axle assembly line.
- Railways/Metro Maintenance Depots/Shops Spring Manufacturing Plant.
- 3. Service & AMC, Reconditioning & One-time repair of machine supplied

#### Innovation highlights:

- Successfully implemented predictive maintenance and production data management in live with industry 4.0 on machines which will predict upcoming maintenance requirements of the machines helping in controlling & reducing breakdown time of the machines and will upload production data to designated e-mail id/s/ERP system of customer.
- Developed and successfully implemented a CNC software to identify the minimum material removal for re-profiling, of a worn-out wheel set.
- Developed and successfully implemented a software on SQL platform to upload production and quality data of wheel set assembly to customer database.
- Developed and successfully implemented wheel set handling system for surface wheel lathe machine.
- Developed and successfully implemented CNC wheel boring machine to complete rough boring of railway wheel disc in 1 minute.
- Developed and successfully implemented integrated wheel set assembly to assemble railway wheel set in 4 minutes.
