The Story of India's Real Growth Engine

When we speak of India's rise on the global stage – our 4 trillion-dollar economy, the spectacular growth of its digital landscape, its manufacturing revival, a booming innovation ecosystem – we often forget who's laying the foundation beneath it all. Not the Top 500s. Not just the unicorns. But **India's 6 crore plus MSMEs**. Quietly, consistently, courageously.

They are the tea shop that digitized during COVID, the woman artisan from a Tier-3 town selling handmade textiles on a global e-commerce platform, the green tech startup powering smart agriculture, the metalworking unit in Ludhiana exporting to Europe, the cloud kitchen in Coimbatore, the AI-enabled logistics firm in Guwahati. This is not just an ecosystem. **This is India's economic heart.**

MSMEs: The Economic Foundation of Bharat

And, this is not just a story of individual success; it is a powerful force driving India's economy transformation. Let the data tell you just how wide and deep this transformation runs:

- MSMEs contribute a robust **30% to India's GDP**, power **46% of India's exports**, and **employ over 27 crore people** – a workforce larger than the population of the world's fifth-largest country.
- **Exports have tripled** – from INR 4 lakh crore in 2020-21 to over INR 12 lakh crore in 2024-25
- **Women now lead nearly 40%** of registered MSMEs, a twofold rise in just four years.
- **Financial resilience is on the rise:** MSME NPAs have fallen sharply from **11% to 4%**, signaling stronger balance sheets and healthier businesses.
- **Digital transformation is accelerating:** 68% of MSMEs report business expansion after adopting digital tools. ~18% have accessed credit digitally, and over 90% accept digital payments, showcasing readiness for India's digital financial future.

Together, these numbers paint a powerful picture: **MSMEs are the true backbone of Bharat's innovation, employment, and inclusive growth.**

Charting the Next Growth Phase – A New Roadmap

If India were a house, MSMEs are not just part of the structure. They are the **bricks, the mortar, the architects, and the workers**. But here's the truth: this powerhouse runs on uneven fuel. Imagine what they could achieve if fully equipped – with the right tools, policies, capital, and technology. Imagine the India we could build together.

And we've already taken a right step in that direction: **The 2025 Union Budget doubled the investment and turnover limits for MSMEs**, enabling them to scale without losing government benefits – **lifting the ceiling on ambition and unlocking a new era of growth**. So, what does the next chapter of growth look like?

There will be five strategic imperatives - a new growth blueprint:

1. From Fragmentation to Formalization

India's informal economy is shrinking – but still millions of MSMEs remain unregistered, limiting access to credit, markets, and support. We must accelerate efforts to:

- Incentivize Udyam registration; Offer simplified regulatory handholding
- Create hyperlocal MSME support centers for first-time entrepreneurs

2. From Capital Starved to Capital Ready

While credit has expanded to INR 28 lakh crore, many micro and rural entrepreneurs still remain underserved. Let's fix the flow of capital by:

- Digitizing credit access through real-time underwriting and GST analytics
- Strengthening alternate lending ecosystems – fintechs, NBFCs, and peer-to-peer platforms
- Expanding credit guarantee coverage to include high-growth service sectors

We don't just need loans – we need smart, timely, and targeted financing.

3. From Digital Adoption to Digital Leadership

MSMEs are no longer digital laggards – but to win globally, they must become digital leaders. While 90% accept digital payments and 43% are active in e-commerce, only 18% have accessed credit digitally. We must go further by:

- Embedding AI/ML in MSME workflows
- Building public digital infrastructure tailored for MSMEs
- Promoting cybersecurity and digital literacy, especially in rural areas

4. From Women's Participation to Women's Power

India cannot grow with half its talent held back. The rise in women-owned MSMEs to 2.2 crore is commendable – but this is just the beginning. **The Government's Yashasvini campaign** which aims to empower 1 lakh women entrepreneurs in small towns, is a good start. Let's scale that vision:

- Create women-first incubation hubs
- Offer shared manufacturing spaces
- Provide zero-collateral loans for rural women founders

Because when a woman builds a business, she lifts up generations.

5. From Local Champions to Global Brands

Why should global shelves only feature products from Europe, Japan, or America? From pharma in Baddi, to garments in Tirupur, to auto parts in Rajkot – Indian MSMEs can become world-class brands. Let's enable that by:

- Setting up design & brand acceleration labs
- Negotiating FTAs with built-in MSME support
- Creating export-onboarding toolkits in regional languages

Our MSMEs must think global – because their potential already is.

India's future will not be built in corporate boardrooms alone. It will be crafted in small workshops, stitched in homegrown boutiques, coded in Tier-2 co-working spaces, and powered by grassroots dreamers.

Let us back them. Let us fund them. Let us train them. **And let us ensure they don't just survive – but soar.** Together, we can make **Udyami Bharat the heartbeat of Samridh Bharat.**

Neehar Pathare
MD, CEO & CIO
63SATS Cybertech

On behalf of 63SATS Cybertech, I would like to express our sincere congratulations to Dun & Bradstreet for their "Business Enterprises of Tomorrow 2025" event and the unveiling of the 2025 editions of "Leading SMEs of India" and "Leading Mid-Corporates of India." This initiative highlights the vital role these organizations play in shaping the future of our national economy.

The theme, "Building Mighty Enterprises: Navigating the Next Frontiers of Growth," resonates deeply with the foundational vision of 63SATS Cybertech. Guided by the strategic foresight of our Founder, Mentor, and Teacher, Mr. Jignesh Shah, 63SATS Cybertech stands committed as a steadfast partner in this journey. As enterprises harness technology to fuel innovation and scale, they must also navigate a complex and dynamic cyber threat landscape. In today's hyperconnected world, the pursuit of building a mighty enterprise is intrinsically tied to fortifying digital assets and cultivating strong cyber resilience. Meaningful growth, after all, rests on a secure and resilient foundation.

At 63SATS Cybertech, a forward-thinking subsidiary of 63 Moons Technologies Ltd., our mission is clear: to engage organizations to explore the complexities of the advanced age successfully. We are steadfastly dedicated to delivering top-tier, universally accessible cybersecurity solutions. Our goal is to enable and maintain the potential of

every organization, ranging from small, medium, and large enterprises to government bodies, to realize and maintain their complete potential, secure in their operations. Our methodology hinges on proactive defense. The Threat Intelligence Monitoring & Response Command Centre (TiM&RC) is central to this as it is fundamentally transforming our approach from passive observation to active, real-time threat neutralization. Furthermore, we are dedicated to simplifying the complexities of cybersecurity. We provide a complete suite of services to achieve this goal. We offer tailored technical solutions, comprehensive security assessments—including ransomware simulations and Red Team exercises—and strategic direction in Governance, Risk, and Compliance.

As we become more aware of the businesses that will exist in the future, it is of the utmost importance to realize that the advancement of these businesses will be inextricably linked to their ability to both predict and respond to new cyber threats. We enable businesses to not only endure but to thrive with assurance, cultivating a safe digital environment where innovation can prosper without apprehension. We are privileged to take part in this esteemed event and eagerly anticipate collaborating with India's foremost companies to create a secure and prosperous future for everyone.

Prashant Muddu

Managing Director & CEO
Jocata

When I started Jocata in 2010, I had just left a stable job at Deloitte in New York City to return to India and start a technology company, becoming the first entrepreneur in my family. During my trips back to India, conversations with bankers and well-wishers kept circling back to the same idea: the need for a data-led, technology-first approach to banking that made intuitive sense.

But while the instinct was right, the reality was far more complex. It took us some time to win our first major client. What kept us going was conviction and clarity. From those early days of gut calls and long nights to today, being a 650+ strong company working with 50+ financial institutions across India, ASEAN, and the Middle East, the journey has been anything but linear.

From building an industry-first AI-led MSME behavioral score (SWARA) to developing Sumpoorn – India's First MSME Economic Activity Index with Small Industries Development Bank of India (SIDBI), enabling a dynamic insight into the sector and helping assess over 1,50,000 MSMEs for our clients, it's been deeply rewarding to watch the sector evolve from the ground up.

I've always believed that a key part of building a business is trusting your instinct and then working diligently to prove it right. While much has changed with the rise of India Stack and the growing digital confidence of MSMEs, the fundamental challenge

persists. Since COVID, more than 75,000 MSMEs have shut down. The closures have been rising every year; a stark reminder of how fragile growth can be.

Even among those surviving, many are struggling to grow. In FY25, 40% of the micro businesses saw revenues stagnate or decline. Only 14% of MSMEs retained more than 80% of their customers. Just 9% of MSMEs retained over 80% of their suppliers.

The issue isn't always funding or credit access. It's often a "Know Your Business, Know Your Ecosystem" problem. Do you know which customers are quietly declining? Which suppliers are hurting your margins? Is your HSN categorization, correct? Are your consultants filing returns on time? These details matter and knowing them continuously is crucial.

As the ecosystem becomes digital and interconnected, every data point becomes a signal that is increasingly going to be interpreted not by people but by algorithms: lenders, partners, buyers, suppliers, advisors. When the lens is purely machine-driven, MSMEs are bound to get misread. But here's the truth: in today's data-driven world, instincts, no matter how sharp, can leave you behind or lead you astray.

That's why we built MSME Saathi – to reflect your business story back to you, using the data you already have, but rarely get to see as clear, actionable insight. MSME Saathi helps you look outwards too. Your suppliers, buyers, and broader ecosystem play a critical role in your stability and growth. The initiative helps you see not just what's working, but what's quietly slipping. It's a mirror, but it's also a guide.

Your business is not just a balance sheet. It's a voice. A signal in the data that can unlock credit, build trust, and even shape impactful policy. The real opportunity lies in blending that intuitive understanding of the business with intelligence drawn from the data, so that we don't just scale businesses, we build engines of transformation for the entire ecosystem.

Neehar Pathare

Managing Director, CEO & CIO
63SATS Cybertech

enterprises of all sizes. Could you elaborate on how CSF has helped MSMEs mitigate critical risks and improve resilience in today's volatile digital landscape?

The Cyber Security Force (CSF) isn't just a service—it's a movement. For MSMEs, we've curated a stack of lightweight, automated, and continuous protection protocols through CSF. This includes guided risk assessments, managed detection, and regular patching—all delivered in a subscription model that doesn't strain budgets. CSF has enabled small businesses to confidently onboard digital tools like CRMs, ERPs, and payment gateways without fearing breaches. We've also conducted joint cyber drills and simulations to increase preparedness. CSF translates elite enterprise-grade cybersecurity into an everyday, accessible utility for the MSME sector.

MSMEs often struggle with limited digital literacy and awareness about cybersecurity. What role does 63SATS play in simplifying cybersecurity for non-tech-savvy business owners and their teams?

At 63SATS, we speak the language of business owners, not just cybersecurity experts. We break down complex issues into simple steps—how to stay safe online, what to avoid, and where risks can hide.

Our team explains things in plain terms, using real-life examples that are easy to relate to. We guide teams on what matters most without overwhelming them. The idea is to make cybersecurity feel like a normal part of doing business, not something separate or scary. For us, simplicity builds confidence—and that's how we help MSMEs take control of their digital safety.

Partnerships with fintechs, digital platforms, and government programs have become critical in reaching the MSME base. How do you see ecosystem collaborations amplifying the cybersecurity mission for this segment?

Cybersecurity is no longer a solo sport—it thrives in ecosystems. By partnering with fintechs, NBFCs, and government programs like Startup India and Digital MSME, we've integrated security at transaction points. These touchpoints allow us to embed our tools directly into invoicing, payroll, and POS systems, giving MSMEs frictionless protection. We also co-design campaigns with digital platforms to educate users at the point of need. When the ecosystem is aligned, cybersecurity becomes proactive rather than reactive. Collaboration is our multiplier—and we use it to scale security where it's needed most.

As India's MSMEs rapidly digitize, cyber threats have emerged as a key barrier to their growth. How is 63SATS uniquely positioned to empower these businesses with affordable and scalable cybersecurity solutions?

At 63SATS, we understand that MSMEs are the lifeblood of India's economy, yet highly vulnerable in the digital shift. Our approach is grounded in affordability without compromise. We offer modular, scalable security solutions tailored for varying maturity levels—from basic endpoint protection to advanced threat intelligence. With pre-configured, ready-to-deploy services, we eliminate complexity and reduce cost. Our platform is built to grow with the business—no overengineering. Backed by the 63 moons legacy, we bring proven cybersecurity frameworks to the underserved, ensuring that digital growth isn't stunted by fear but enabled by confidence.

With the Cyber Security Force (CSF) initiative, you cater to

As MSMEs become more reliant on digital systems, how can they start embedding a “security-first” mindset into their business DNA—even before scaling significantly?

A “security-first” mindset should begin the moment a business goes digital—even if it’s just using email or online payments. At 63SATS, we guide MSMEs to treat cybersecurity like accounting—essential, not optional. We help them set simple defaults: secure passwords, role-based access, and regular data backups. Our easy-start kits and checklists make cyber hygiene part of their routine, not a burden. The goal isn’t perfection—it’s awareness and discipline. When security becomes a habit from day one, scaling becomes safer and smarter. We believe MSMEs don’t need to be experts—they just need to start right, and we’re here to make that easy.

How do you see cybersecurity evolving in the next 3-5 years for India’s small and mid-sized enterprises, and what proactive steps should they take today to stay ahead?

Over the next 3-5 years, MSMEs will see cyberattacks shift from broad-based to hyper-targeted. AI will be used both by defenders and attackers. Regulatory compliance will tighten. MSMEs must act now by investing in cyber hygiene basics: zero-trust access, endpoint visibility, and employee awareness. Waiting until breach costs escalate is not an option. At 63SATS, we’re helping clients build digital immunity—early. We foresee MSMEs needing managed cybersecurity as a utility,

not an add-on. Those who prepare today will have the competitive edge tomorrow, as digital trust becomes a currency.

Innovation is core to 63SATS’ approach. Could you shed light on any indigenous IP or proprietary tech stacks developed by your team that have helped elevate the cybersecurity posture of Indian businesses?

At 63SATS, we believe innovation must solve real, on-ground challenges—not just look good on paper. Our team has built solutions from scratch, keeping Indian business realities in mind: unpredictable connectivity, limited tech teams, and budget constraints. We’ve simplified threat detection, made response faster, and reduced dependence on large IT setups. What makes our work unique is how invisible it feels—security that works quietly in the background without disrupting business. Everything is built in-house, designed with agility, and constantly updated. For us, innovation isn’t about creating the most complex system—it’s about building what truly works for India.

As part of the 63 moons ecosystem with a legacy of creating unicorns, what’s your broader vision for 63SATS in shaping India’s journey towards building digital trust and potentially enabling the next wave of decacorns?

Being part of 63 moons gives us the blueprint for scale and impact. Our broader vision is to build India’s most trusted cyber defense network

for digital businesses—MSME to MNC. We’re not just solving today’s problems; we’re enabling the next wave of India-first tech players to scale securely. We envision 63SATS as the cyber backbone for upcoming decacorns—providing resilience as they go global. Just like 63 moons revolutionized trading, we aim to redefine digital trust. For us, cybersecurity isn’t protection—it’s permission to grow without fear. ■

MSME SAATHI

Businesses of Bharat now, powered by AI insights

About Jocata

Jocata, a subsidiary of BillDesk, is a technology company driving AI-powered digital lending transformation for 50+ large financial institutions across India, ASEAN, and the Middle East. With deep expertise in the MSME credit ecosystem and over a decade of experience working closely with lenders, Jocata is leveraging data-led insights to promote financial inclusion and build a more intelligent, inclusive ecosystem for India's MSMEs.

The Challenge: India's Growth Engine Needs Fuel

India's MSME sector, crucial for job creation and economic growth remains significantly underserved. A persistent lack of visibility into MSME business performance, coupled with poor credit accessibility, hinders their growth. The challenge is not just limited to funding; it spans access to talent, technology, and markets.

While most MSMEs regularly file GST returns, the data remains largely underutilized. Business owners and lenders often fail to extract actionable insights from this rich data source. The result: an ecosystem where financial decisions are still made on instinct, in a world increasingly shaped by algorithms.

The lack of reliable and holistic data also complicates policymaking, making it difficult for public institutions to provide targeted support. While, Digital Public Infrastructure (DPI), behavioural scoring for credit access, and increased digital adoption among MSMEs are accelerating change - placing data at the core of a fast-evolving ecosystem.

But growth today isn't just about speed, it's about clarity.

MSMEs operate in a highly volatile environment and various internal factors and external events can impact them disproportionately. A major issue is what we call a "Know Your Business, Know Your Market" gap. MSMEs often miss early signs due to a lack of real-time, relevant insights. For example:

- A food manufacturer with ₹250+ crore turnover consolidated suppliers for efficiency. But during COVID-related lockdowns, supply chain disruptions hit hard—something a dynamic heatmap of supplier geographies using GST data could have predicted.
- A B2B firm growing erratically was denied favourable credit terms. Lenders noticed irregular GST compliance among the firm's key clients, interpreting it as a potential liquidity risk - an insight not visible from the business's surface numbers.
- An electronics manufacturer grew annual sales from ₹3.9 crore to ₹11.77 crore in FY25. But 80% of this came from just one customer, while five long-standing customers brought in zero revenue - an opportunity lost of ₹11.6 crores. What seemed like growth was actually a concentration risk in disguise, something data could have revealed early.

Businesses in India have always run on instincts and they still should but when backed by insights, they become powerful drivers of resilient growth

Our Solution: MSME Saathi - Your Business Mirror

To bridge this insight gap, we introduced MSME Saathi, an AI-powered business growth companion built not just to inform, but to empower. It begins with the Business Reflection Report, a diagnostic tool generated using consent-led GST data. This report offers a clear, structured view of business performance through a powerful scoring system and helps MSMEs reflect on critical questions like:

- Who are my most valuable customers?
- Is my business concentrated? Is my value chain robust?
- Is my CA filing my GST in a timely manner?
- Are my top buyers compliant in their GST filings?
- Am I eligible for credit? And if so, on what terms?

Beyond internal insights, MSME Saathi provides sector and region-level intelligence. For example, how your pricing compares in one geography versus another, or whether your industry is showing signs of stress. These signals allow MSMEs to negotiate better, plan smarter, and anticipate change. And when it comes to credit, Saathi connects MSMEs with India's top banks and NBFCs to facilitate access to right-fit financial products tailored to their repayment capacity and growth potential.

MSMEs can digitally generate their Business Reflection Report to assess opportunities and risks, free of cost leveraging your consent-led GST data.

Impact & Ecosystem Achievements

MSME Saathi is not a standalone initiative; it's a part of a much larger effort at Jocata. At the heart of it is a belief that MSME growth isn't about solving for one business at a time, it's about building infrastructure that uplifts the entire sector. Over the years, our work with lenders revealed that traditional underwriting models fail to serve the diverse needs of MSMEs.

To bridge that gap, we built SWARA - an industry-first AI/ML-powered MSME behavioural scoring engine. Built on consent-led GST and Banking Transaction data, it empowers banks and NBFCs with 2-minute 'Go-No-Go' credit decisions, reducing the time-to-credit from 2-5 days to under 6 hours. By assessing business behaviour as a proxy for risk, it allows lenders to look beyond financial history and into business potential. To date, we've enabled over ₹43,000 crores in disbursals through our partner network.

But solving credit access is just one piece of the puzzle. At a systemic level, MSMEs also need visibility that informs policy and unlocks opportunity. That's why we built Jocata Sumpoorn - India's first MSME Economic Activity Index in collaboration with Small Industries Development Bank of India (SIDBI). Built on anonymized GST data from over 1,50,000+ MSMEs across 99+ industries, Sumpoorn tracks real-time economic activity and provides data-led insights for targeted policy interventions. It was also showcased at the United Nations as a powerful example of public-private partnership and now serves as a blueprint for global economies seeking to develop a similar index.

MSME Saathi has already begun to demonstrate tangible value with insights on revenue drivers, customer loyalty, supplier stability, credit readiness, counterparty quality and market benchmarking. As adoption grows, Saathi is well-positioned to become a powerful decision-support system for MSMEs across India enabling them not just to grow, but to grow with clarity.

MSME Saathi: Your Inner Circle for Growth

- **Revenue Drivers**
- **Customer Loyalty**
- **Supplier Stability**
- **Credit Readiness**
- **Counterparty Quality**
- **Market Benchmarking**

Kickstart your journey towards excellence: www.msmesaathi.in

Prashant Hansraj Thaman

Managing Director
Circlips Technologie

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

CIRCLIPS GROUP was established in 1967 at a time when India heavily relied on imports for precision components. We identified a gap and an opportunity to manufacture these parts domestically, contributing to the country's industrial independence. Since then, the company has consistently evolved by embracing new technologies and implementing innovative processes. From manually operated machines to advanced CNC systems and implementing SAP Business One to streamline production, our journey has been marked by a drive to modernise and scale. We have also diversified vertically, expanding our product range to serve a broader spectrum of industries, including automotive and electrical parts. This adaptability has been central to our sustained growth and relevance across decades. We boast of the most versatile range of

products under one roof, which we manufacture.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

CIRCLIPS GROUP firmly adheres to the 'Atmanirbhar Bharat' vision by manufacturing precise components that were previously entirely imported. Through in-house R&D and tool development, we have successfully localised numerous precision parts. These parts are now being supplied to major Indian industries, including OEMs and Tier 1 suppliers. This not only fortifies the domestic supply chain but also contributes to India's foreign exchange savings. By exporting our products to international markets, we proudly represent India's manufacturing capabilities on the global stage. Our objective is to ensure that Indian industries no longer need to seek quality components abroad; they can readily find them right here, manufactured in India.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra has always

been: adapt, innovate, and deliver. As a MSME, we have consistently invested in modern technologies to maintain our competitive edge. This includes upgrading machinery, digitising operations, and enhancing quality assurance systems. This forward-thinking approach enables us to meet the evolving demands of our customers, improve efficiency, and sustain our competitiveness in a rapidly changing market. Simultaneously, we remain steadfast in our core values of integrity, quality, and long-term relationships, which have earned us the trust of both domestic and international clients. ■

Johnson Verghese

Managing Director
Fossil India Group

What are some key milestones that demonstrate your company's adaptability in recent years?

Fossil continues to evolve with consumer trends and cultural shifts. In 2025, we announced Nick Jonas as our global brand ambassador. In 2024, we deepened our Michael Kors partnership with a limited-edition Anushka Sharma watch for India. Our focus styles for Mother's Day and Valentine's Day this year saw strong performance, resonating deeply with our audience.

Our adaptability is reflected in successful limited-edition collaborations with iconic franchises like Minecraft, DC (featuring Superman and Batman), Disney (including Mickey Mouse), Star Wars, Harry Potter, and Space Jam, blending storytelling with design to reach diverse audiences. In 2025, Fossil expanded into gaming and youth culture with a bold Minecraft collection. The brand's innovation was further recognized when the

FOSSIL

Raquel Watch Ring won **"Fashion Jewelry of the Year" award at the INHORGENTA AWARD 2025**. Looking ahead, we remain committed to strategic partnerships and design-led innovation that keep Fossil stylish, collectible, and culturally relevant.

What strategies has your company employed to access new markets, both domestically and internationally, to fuel expansion?

To access new markets and fuel expansion, Fossil has adopted a dual strategy focused on strengthening its retail footprint and digital community building.

In India, we've accelerated store expansion through franchise-led POS formats, with a focus on high-potential Tier 2 and Tier 3 cities. This helps us tap into evolving demand beyond metros and grow our presence in underpenetrated markets.

Simultaneously, we're leveraging digital media to connect with style-conscious, digitally native consumers. Our campaigns around cultural moments like Mother's Day and Father's Day are amplified through hyper-localised social content, influencer partnerships, and curated experiences that resonate deeply with audiences.

We will continue scaling this omnichannel approach to strengthen our brand presence and connect with evolving consumers worldwide.

What is your company's outlook for the next 3-5 years?

Over the next 3-5 years, Fossil aims to strengthen its global presence through innovative collections that blend timeless design with contemporary style. We're excited to collaborate with global icon Nick Jonas on a major campaign that will bring a fresh, fashion-forward energy to the brand and broaden our appeal.

Our focus will remain on curating trend-led collections, hosting cultural events, and building stronger partnerships with retailers and influencers to deepen market reach. In India, we're committed to expanding our footprint, especially in tier 2 and 3 cities, through new store openings.

Fossil has consistently adapted to the evolving fashion and lifestyle landscape - introducing shaped silhouettes and unconventional timepieces that resonate with the style-conscious consumer – and will continue to do so with the same forward-thinking approach. ■

Dr. Shreeram Iyer

Founder, Chairman and CEO
Prisma AI

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Prisma AI began its journey as Prisma GmbH in Germany in 1982, initiated by a team of ex-IBM engineers focused on image matching, processing and text recognition. Over the decades, it transformed from a niche recognition firm into a global leader in Visual Artificial Intelligence. A pivotal moment came in 2008 with the creation of our proprietary AI platform, Gryphos—one of the first to execute multiple vision models simultaneously. Post-2013, after the acquisition by Prisma Global Limited, the company rapidly expanded its footprint across Europe, Asia, and North America. Our operations today span predictive behavioral analysis, sentiment analysis, OCR, facial recognition, and smart infrastructure solutions. This journey has been driven by a steadfast focus on real-world applications of computer vision, adaptability across sectors, and deep technological innovation.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbhar Bharat' vision?

Prisma AI's expansion in India in 2019 was rooted in the belief that homegrown, cutting-edge AI solutions could empower public and private sectors alike. Our technology—developed entirely in-house—powers security, surveillance, and smart infrastructure systems for Indian organizations without reliance on foreign platforms. By localizing our solutions, we reduce import dependency while upskilling Indian engineers in high-demand fields like computer vision and AI. We also collaborate with Indian institutions to integrate visual AI into public infrastructure, supporting the national vision of a technologically self-reliant India.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

Our 3-5 year roadmap includes deepening our AI capabilities through advancements in behavioral prediction and real-time vision analytics, while expanding into untapped MSME markets in India, Southeast Asia, and Africa. We aim to democratize access to high-end AI tools for small businesses by offering modular, scalable products

that reduce integration friction. By making AI more accessible and affordable, we empower MSMEs to digitize operations and improve efficiency—positioning them to compete globally creating an ecosystem with AI enabled computer vision.

What would you consider to be your company's success mantra in navigating the challenges and opportunities in the MSME sector?

Our mantra is simple: Build with vision, scale with empathy. We design AI that understands human behavior, not just data, and we scale solutions that adapt to MSME constraints—limited budgets, technical capacity, or infrastructure. We prioritize partnerships, not just transactions, enabling MSMEs to co-create solutions with us. Flexibility, trust, and localized innovation are the cornerstones of our approach, helping us stay resilient and impactful even in volatile environments. ■

Girish Suresh Vaze

Managing Director
Aquila Organics Pvt Ltd.

to long-term resilience and environmental responsibility?

Sustainability is not just a buzzword for us but an actual path that we follow. Our sustainability initiatives are multipronged and include measures to reduce our own waste as well as steps to help the environment. To reduce our waste, we have gone in for heterogenous and recyclable catalysts in our production methodology and also developed continuous reaction and distillation plants to significantly improve efficiency of operations and reduce our emissions. Our steam is generated using biowaste which brings down SO_x and NO_x (air pollution emissions) by up to 90%. Our initiatives towards helping the environment, include tree plantation, water harvesting and setting up of solar power generation. To certify and maintain our commitment to sustainability practices, we are working towards getting the EcoVadis certification.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

In terms of perfumery ingredients, we are moving up the value chain by changing our product mix from commodities to more high value molecules which are also import substitutes. This will not only save but also earn Forex for the country. The

international community is actively looking for new manufacturers which are not dependent on Chinese supply chains, and we seek to fill this gap.

By leveraging outstanding service and offering excellent products which are cost effective, we are able to make inroads into international perfumery markets hitherto dominated by a few MNCs. The Indian consumer landscape is rapidly changing and growing. We intend to be dominant players in this market as well.

The world is a changed place especially after Covid. There is a greater international interest now in Indian products and offerings. There is a significant opportunity for exports, and our stated goal is to leverage the international opportunities and become global leaders in our domain. This dovetails very well with the governments thrust on Atmanirbhar Bharat. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

The Company started operations in 2012 with a very small setup. Over the years we have consistently built up our resources, both in manpower and in machinery. We have maintained a growth rate of 25-30% on average year on year and this has been achieved by building and nurturing talent where possible and hiring from outside where needed. We have also kept a close watch on the market conditions and adapted to changing market needs. We have increased and diversified our product mix to not only mitigate risk but also to enable us to take opportunities as they arise. We started manufacture of ingredients in 2012, then started making industrial fragrances in 2017 and have recently started exploring flavors.

What sustainability practices has your company adopted, and how are these initiatives contributing

Hetal Mukund Joshi

Managing Director
Sunrise Naturals Private Limited

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

By sourcing fruits like mango and guava from Indian farmers and processing them domestically, we create value within India and reduce dependence on imports. Our exports—certified by FSSC 22000 (Food Safety Management), USFDA, BRCGS (Global Food Safety Initiative), SGF (Germany) IRMA certification, Kosher, TUV SUD, Rain Forest Alliance (RFA), Fair Trade, and Organic certifications—showcase India's quality capabilities on the world stage. We enable Indian fruit to reach global juice and dairy brands in processed form, supporting both rural income and India's agri-export ambitions. Our investments in sustainable and ethical sourcing align closely with the government's 'Atmanirbhar Bharat' vision.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra is quality, consistency, and collaboration.

We build long-term partnerships—with clients, farmers, and service providers—based on trust and responsiveness. We stay agile in the face of global disruptions, from fluctuating shipping costs to raw material challenges. Above all, we deliver value through dependable supply, strict quality standards, and the ability to adapt. This approach has helped us become a trusted supplier to leading juice and dairy processors in highly competitive global markets. ■

What are some key milestones that demonstrate your company's adaptability in recent years?

A defining milestone was our conversion to a private limited company in 2009, which enabled structured growth and increased market confidence. Sunrise Naturals is recognized as a **Three Star Export House** by the Government of India. We have successfully completed "**Farm Sustainability Assessment**" in 2025. More recently, we expanded into the U.S. market and deepened relationships with juice, dairy, and food manufacturers globally. During the pandemic, we ensured uninterrupted production and shipments—despite labour shortages—providing critical support to clients depending on our fruit pulps. In response to the Red Sea disruption, we adjusted our supply chains swiftly, avoiding delivery delays and reinforcing our commitment to reliability.

India's MSMEs Key Facts

The Powerhouse of Employment and Enterprise

India's Micro, Small, and Medium Enterprises (MSMEs) are the backbone of the Indian economy. As of June 2025, over **6.5 crore MSMEs** are registered on the **Udyam Portal**. These enterprises employ more than **28 crore people**, making the sector the second-largest employer after agriculture.

“MSMEs have significant potential for growth. Key priorities include adopting technology to drive efficiency, investing in research and development to build intellectual property, and expanding beyond the local ecosystem by exploring export opportunities.”

– Col. Suhail Zaidi (Retd), Director General, MAIT

Globally Competitive and Export-Driven

MSMEs are key players in India's global trade. In FY 2023-24, they contributed **30.1% to GDP** and accounted for **46% of India's exports**. Exports from MSMEs have tripled in four years, rising from **INR 3.95 lakh crore** in 2020-21 to **INR 12.39 lakh crore** in 2024-25. A new credit guarantee scheme now backs loans up to INR 100 crore per MSME, enabling modernization and global expansion.

“India is targeting \$2 trillion in exports. MSMEs must seize new global trade opportunities, including e-commerce retail exports and markets opening due to geopolitical shifts.”

– Dr. Ajay Sahai, Director General & CEO, FIEO

“We are helping MSMEs enter export markets by reimbursing membership fees for export promotion councils, supporting insurance and certification, and offering capacity-building programs under our international cooperation scheme.”

– Smt. Mercy Epao, Joint Secretary, Ministry of MSME

Women and Inclusion: A Rising Force

Over the past four years, **women-owned MSMEs have surged to 2.2 crore**, now representing nearly **40% of all registered MSMEs**. The **Yashasvini Campaign**, launched in June 2024, aims to empower **1 lakh women entrepreneurs** in smaller cities through skilling and capacity-building.

“ We are working closely with the Ministry of Rural Development and Women Entrepreneurship Platform to formalize SHG members and ensure gender parity in the MSME ecosystem. ”

– Smt. Mercy Epao, Joint Secretary, Ministry of MSME

Rural and Grassroots Impact

The **PM Vishwakarma scheme** has empowered **24.77 lakh artisans and craftspeople** across 18 traditional trades. The **Khadi and Village Industries** sector has seen a dramatic rise in sales—from **INR 33,000 crore in 2014-15** to **INR 1.6 lakh crore in 2023-24**—driving inclusive growth and rural prosperity.

“ We were given a five-year target to reach 30 lakh artisans under PM Vishwakarma. In less than two years, we’ve already reached nearly 30 lakh. The second phase is now on the horizon. ”

– Smt. Mercy Epao, Joint Secretary, Ministry of MSME

Financial Resilience and Credit Expansion

The financial health of the MSME sector has significantly improved. **Non-performing assets (NPAs)** have dropped from **INR 1.87 lakh crore in 2020** to **INR 1.25 lakh crore in 2024**, with the NPA ratio falling from **11% to 4%**. This reflects better credit discipline and risk management. Meanwhile, **outstanding MSME credit** has surged to **INR 28 lakh crore**, up from **INR 17 lakh crore** in 2020, unlocking vital capital for growth.

The **2025 Union Budget** further boosted the sector by **doubling investment and turnover thresholds**, allowing enterprises to scale without losing access to government benefits.

“ We’ve launched the SRI Fund with a INR 50,000 crore corpus to support equity and growth funding. The CGTMSE guarantee limit has also been raised from INR 5 crore to INR10 crore. ”

– Smt. Mercy Epao, Joint Secretary, Ministry of MSME

“ The productivity gap between MSMEs and large corporates is often due to long procurement cycles. The government's push for electronic bank guarantees and digital procurement systems is helping MSMEs reduce delays and improve efficiency. ”

– Mr. Debajyoti Ray Chaudhuri, MD & CEO, National E-Governance Services Ltd.

Tech Leap: Digital Transformation in Action

Technology is rapidly reshaping the MSME landscape. According to a SIDBI survey, 68% of MSMEs reported business growth after adopting digital tools. Over 90% now accept digital payments, and 18% have accessed credit digitally, signaling a strong shift toward digital finance and operations.

“ We are promoting digitalization through ONDC onboarding, cluster development programs, and skilling via 65+ technology centers. MSMEs have even contributed critical parts to missions like Chandrayaan and Tejas. ”

– Smt. Mercy Epao, Joint Secretary, Ministry of MSME

“ Tech is one of the most important things for organizations that want to scale, but for MSMEs it is often one of the last things on their mind. This initiative is a great first step towards raising awareness and exposing MSMEs to secure technology adoption. ”

– Mr. Sundeep Holani, Co-Founder and AI Leader, Channelplay Limited

“ MSMEs should adopt technology. There is no other option. Even labor-intensive exporters must infuse tech to ensure quality and consistency. Digitization will not only streamline processes but also reduce costs. ”

– Dr. Ajay Sahai, Director General & CEO, FIEO

 @Dun&BradstreetIndia

Niral Dave

Managing Director & CEO
Akshar Group

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Our company was established 35 years ago as a trading firm. Recognizing the need to adapt to a changing market landscape, we strategically transitioned into project-based operations and also diversified into manufacturing segment (MV, LV Panels and CSS manufacturing) - a pivotal move that significantly accelerated our growth. This evolution enabled us to build technical capabilities, diversify our portfolio, and deliver large-scale, complex projects.

Today, Akshar Group has established itself in leadership position and is a trusted partner for all Electrical Infrastructure projects for the industry. Akshar specializes in power evacuation switchyards right up to 400kV GIS / AIS and also complete Plant Electrical solutions for all sectors!

Revenues for the year 2025-2026 for the EPC division are estimated to cross INR 600 Crores and the group

will achieve a top line of 1000 Crores ! Our sustained growth is the result of a clear strategic vision, total in-house competency, strength in execution and a steadfast commitment to quality and long-term client partnerships.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

As an Electrical EPC (Engineering, Procurement, and Construction) company, we contribute significantly to India's vision of 'Atmanirbhara Bharat' by focusing on strengthening the nation's infrastructure and energy sectors. We cater largely to building up the fundamental electrical infrastructure for PORTS, LOGISTICS, POWER - both Thermal and Renewable, DEFENCE equipment plants to name a few !

Our projects prioritize the use of domestic materials and technology, reducing reliance on foreign imports and supporting local industries. Through our work on power generation, distribution, and infrastructure projects, we enhance India's energy security and sustainability, boosting its position as a key player in the global energy market.

In addition to our EPC capabilities, we are also engaged in the manufacturing of Electrical panels

(MV, LV and CRP panels) and containerized sub-stations (CSS), entirely designed, developed, and commissioned in India with technology from global giants like SCHNEIDER, HITACHI, LK ! Our end-to-end manufacturing process—right from design to commissioning—is fully localized, underscoring our commitment to self-reliance.

What are your company's key strategic priorities for driving sustainable growth for your customers and stakeholders?

Akshar has a rare combination of various verticals under one roof ! From Design engineering to World class Manufacturing facility.... from Authorised partners to Global giants for better supply chain reliability to having amazing strength in execution.....from testing & commissioning expertise for on-site commissioning to reliable O&M operations for clients !

As an EPC Electrical Project company, our main goal is to deliver safe, reliable, and cost-effective solutions. We focus on high-quality work, energy-efficient designs, and the use of modern software technologies to make projects more efficient and reduce environmental impact.

With the 3rd generation coming into the business...there is a long term visibility and vision for the organisation to grow bigger and better ! ■

Anand V Bhat

Founder & CMD
BNB Security and Automation
Solutions Private Limited

Technology integration for efficiency, operations and engagement

BNB treats technology as an enabler across the value chain; from lead generation to life-cycle support. Our field engineers use a mobile CRM that geo-tags every visit and feeds a predictive maintenance engine, reducing downtime across nearly 150+ AMCs. For customer engagement we moved all acceptance tests to a BIM-augmented-reality walkthrough, shrinking sign-off cycles from weeks to days. Internally, RPA bots now reconcile purchase orders and inventory, releasing 4,000 man-hours a year for value-added design. Together these measures have improved our gross margin while pushing up Net Promoter Score, a strong endorsement in a project-driven industry.

Our 'success mantra' for MSME resilience

BNB's mantra is **"Listen Early, Act Fast, Scale Wisely."** We listen early by embedding presales engineers alongside customers, uncovering unspoken needs that later translate to bundled security-plus-analytics deals. We act fast through an eight-touch sales cadence and a 90-day lead-to-PO benchmark that keeps cash-flows healthy - vital for any MSME. Finally, we scale wisely; each new region is launched only after a local spare parts inventory and

certified engineers pool are ready, ensuring SLA integrity from day one. This disciplined approach has allowed us to double turnover every three years, self-fund expansion and still maintain healthy financial ratios. In a sector like MSME, often impacted by credit constraints and regulatory change, our blend of customer centricity, operational speed and prudent scaling has proven a durable formula for growth. ■

Key milestones that demonstrate BNB's adaptability

Over the past 10 years BNB has transformed from a largely-south based ELV (Extra-Low-Voltage) Systems Integrator into a pan-India, multi-solution partner by aligning every milestone to a clear market inflection. In FY 2021, when supply-chains were fractured, we aggregated critical spare inventories closer to client projects & operations, optimized BoQs & delivered on all projects & AMC promises. In FY 22 we set up an in-house Control Room, enabling remote commissioning during lockdowns and lifting service revenue by a significant margin. FY 2023 saw us pivot to non-PRC hardware in response to new MoHA advisories, winning marquee airport & PSU projects. Last year we opened an office for customer online tech-support while holding head-office costs relatively flat. These steps helped revenue climb upto 180Cr and staff strength to 450 on-roll (plus 500 off-roll) without compromising profit margins or safety KPIs.

Kaushik Shah

Chairman & Managing Director
Sushen Medicamentos Pvt. Ltd.

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Sushen Medicamentos was founded by Late Mr. Deepak Kulabkar and myself as a bold entrepreneurial venture, grounded in deep pharmaceutical expertise. What began as a niche consultancy helping global pharmaceutical firms set up state-of-the-art facilities has now transformed into a multi-faceted organization. Our initial success built trust across international partners, opening doors to research and development. From enabling the expansion plans of global companies to innovating in-house, we evolved into a company that not only supports, but shapes, the future of pharma.

Our most defining transformation was entering niche Drug Research & Manufacturing a strategic step that positioned Sushen as a one-stop solution for pharmaceutical management. This evolution reflects

our commitment to innovation, quality, and global impact.

How has your company fostered innovation to expand its reach and drive growth, and what role has globalization played in this evolution?

At Sushen, innovation is deeply embedded in our culture but it's our people who drive it. We believe that every team member contributes to our growth story. Whether in Engineering, quality control, R&D, or manufacturing, our team has consistently pushed boundaries.

Globalization has acted as a catalyst in this journey. Our commitment to international quality standards has made us a trusted partner for companies across continents. It's not just about delivering services globally, it's about exporting trust, consistency, and care globally.

Today, our systems are built to global standards, our products cater to global markets, and our mindset remains globally ambitious.

Innovation and globalization together have unlocked our next chapter of growth.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra is simple: Purpose + People = Progress.

We've built Sushen with a clear purpose, to elevate India's pharmaceutical quality standards on the global map. But it's the unwavering passion and agility of our people that help us live that purpose daily.

As an MSME, challenges are inevitable but with a focused mission and a strong team culture, we turn those challenges into stepping stones.

At Sushen, we're just getting started and the future holds immense promise. ■

The New India Assurance Co. Ltd

All Products

Head Office: New India Assurance Building, 87, M. G. Road, Fort, Mumbai - 400 001 INDIA

Pramit Brahmbhatt

Managing Director
Sahaj Solar Limited

Sahaj Solar actively supports the 'Atmanirbhar Bharat' vision by manufacturing over 70% of our components in-house, including solar PV modules, mounting structures, and electrical equipment. Our strategic location in Gujarat, India's solar manufacturing hub, enables us to deliver high-quality, cost-efficient solutions. By participating in government-led programs such as PM-KUSUM and Jal Jeevan Mission, we support rural electrification and agricultural sustainability. Additionally, by showcasing Indianbuilt solutions in global markets, we are reinforcing India's leadership in the global renewable energy space.

How has your company evolved since inception, and what key transformations drove your growth?

Since our inception in 2010, Sahaj Solar Limited has evolved from a focused solar PV module manufacturer into a vertically integrated renewable energy company with operations spanning module manufacturing, EPC execution, and sustainable energy solutions. Key transformations include the commissioning of our advanced production facility in Gujarat, forward integration through our subsidiaries under the Veracity group of companies, and our expansion into international markets including Uganda, Kenya, and Zambia. A defining milestone was our public listing on the NSE in 2024, enhancing our financial transparency and unlocking new growth opportunities.

How does your company support India's global economic role under the 'Atmanirbhar Bharat' vision?

What sustainability practices has your company adopted for long-term resilience and environmental responsibility?

We are committed to sustainability across operations. We've deployed over 40,000 solar water pumps, replacing fossil fuel systems and conserving energy in agriculture. Our proprietary anti-soiling nanocoating on solar modules reduces water usage and cleaning frequency, especially in arid regions. We enhance energy efficiency by using renewable power and lean production methods to reduce waste. These practices ensure environmental responsibility and operational resilience.

What is your growth strategy for the next 3-5 years, and how

does it align with the MSME landscape?

Over the next 3-5 years, our growth strategy focuses on expanding our solar module manufacturing capacity from 100 MW to 1.5 GW, with a milestone of reaching 750 MW by December 2025. We are also enhancing our presence in both utility-scale and rooftop EPC segments, supported by the adoption of advanced technologies such as TOPCon modules to improve efficiency and output.

To optimize energy generation, we have implemented an "Anti-Soiling Coating" on our solar panels, which has resulted in a 3%-4% increase in performance. We are advancing both forward and horizontal integration through our subsidiaries engaged in manufacturing distribution panels, transformers, and compact sub-stations. In addition, we are actively developing BESS for load balancing at the distribution level.

Globally, we are strengthening our footprint with a 20 MW project underway in Uganda and planned expansions in Kenya and Zambia. Having emerged from the MSME ecosystem, we are committed to empowering MSMEs through strategic supply chain collaborations, knowledge exchange, and innovation-led partnerships. This inclusive approach drives our growth while contributing to the broader advancement of the renewable energy sector. ■

Satyen Mamtora

Managing Director
Transformers and Rectifiers (India)
Limited (TARIL)

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Founded in 1981, **Transformer & Rectifier (India) Limited (TARIL)** has grown from a modest transformer manufacturer into one of India's leading power equipment companies, serving sectors ranging from power generation and transmission to steel, railways, cement, and renewables.

Over the decades, our evolution has shaped by strategic investments in capacity, technology, and process efficiency. We currently operate three world-class manufacturing facilities in Gujarat, with a **total installed capacity of approx.. 40,000 MVA per annum**, and are on track to scale up to **75,000 MVA by FY27**.

Our plan to establish **backward integration for all major transformer components**, including core laminations, CTC conductors, Transformer tanks, OIP and RIP Bushing, RIF Bushing, Bushing CTs

taril

and insulation components. This initiative will allow us to enhance quality control, reduce supply chain dependency, and improve cost efficiency—directly supporting our goal of reaching \$1 Billion in next three years.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

TARIL is strongly aligned with India's '**Atmanirbhar Bharat**' vision.

By developing and manufacturing transformers upto 1,200 kV itself comes under the vision of Atmanirbhar...

By developing in-house capabilities across design, engineering, and testing—and now actively building **backward integration for critical components**—we are reducing reliance on imports and promoting self-reliant manufacturing.

Our transformers power core infrastructure across India, including projects for **PGCIL, NTPC, Indian Railways, state electricity boards**, and major private players. We also export to over **40 countries**, contributing to India's positioning as a global hub for high-quality power equipment.

What is your company's growth strategy for the next 3-5 years,

and how does it align with the evolving MSME landscape?

Our 3-5 year growth strategy is centered around backward integration, operational excellence, and inclusive development—with a strong emphasis on strengthening the MSME ecosystem that supports our industry.

We are integrating key components of our manufacturing process, such as core laminations, CTC conductors, transformer tanks, RIP & RIF bushings, insulation components, and tap changers. This enables tighter control over quality, shorter lead times, better cost efficiency, and improved responsiveness—especially for high-volume utility and export orders.

At the same time, we remain committed to nurturing MSME partners who form an integral part of our value chain. By fostering long-term relationships, offering technical training, and aligning them with our quality and sustainability standards, we are helping vendors scale with us.

This collaborative approach ensures operational reliability and contributes to India's broader industrial growth—empowering MSMEs to evolve with the changing market.

Our strategy is about building a resilient, future-ready ecosystem where large enterprises and MSMEs thrive together. ■

M J Madhusudan

Managing Director
BEKO Technologies India Pvt. Ltd.

air systems, resulting in **substantial energy savings** and **reduced carbon emissions**, helping customers improve both operational efficiency and environmental sustainability.

Our commitment to deliver under pressure was demonstrated during the COVID-19 crisis, when we received **special permission from the Government of India to keep our plant operational**. We supported the pharmaceutical sector with timely deliveries of essential air treatment systems, playing a crucial role in maintaining drug manufacturing continuity at a national level. Over the years, our growth has been rooted in a strong foundation of **German engineering, Indian agility, and a relentless focus on customer success**.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

Empowering Atmanirbharta through innovation and reliability

Beko India, plays a key role in aligning our global compressed air expertise with India's manufacturing capabilities and their demands. By developing and producing advanced air purification solutions within India, we have substituted imports from Germany to develop local manufacturing meeting international standards.

Our Hyderabad-based manufacturing facility stands as a symbol of Atmanirbhar Bharat delivering globally competitive, energy-efficient air treatment systems that serve the domestic market and support international demands.

In addition, our high-pressure systems, used in defence applications such as naval operations, further reflect our role in strengthening India's strategic independence. Through innovation, reliability, and a clear focus on sustainability, we continue to contribute meaningfully to India's journey toward becoming a global economic and industrial powerhouse.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra lies in combining global technology with local agility. We bring world-class innovation to the Indian MSME landscape while staying deeply connected to the unique needs of our customers.

Our focus has help turn challenges into opportunities. By staying adaptable, investing in people maintaining uncompromised quality, we've built long-term trust in all sectors. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

From a Strategic Foundation to Sustainable Growth: Our evolution
Established over 20 years ago as a **100% subsidiary of BEKO TECHNOLOGIES GmbH, Germany**, our company was founded with a clear vision: to bring world-class compressed air purification technology to the Indian market through localized manufacturing.

We have operated with the technological backing and global standards of BEKO TECHNOLOGIES Germany, allowing us to deliver high-performance, energy-efficient air treatment solutions critical to a wide range of industries – from pharmaceuticals, food processing to automotive and defence. One of the key milestones in our journey was setting up a robust manufacturing facility in **Hyderabad**, enabling us to meet domestic demand with agility and precision. Our products are designed to optimize compressed

Tapan Gosaliya

Director

Amnex Infotechnologies Pvt. Ltd.

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Amnex began in 2008 when India's tech focus was largely on software, but we recognized early that real-world problems required a fusion of cutting-edge technologies like AI, IoT, and blockchain with domain expertise. We pivoted from pure software development to mastering niche areas like geospatial intelligence, automation, and quantum computing, treating each as a puzzle piece in solving larger challenges. This shift wasn't just technological but cultural, blending innovation with execution. Today, we operate with the agility of a startup and the maturity of an enterprise, leveraging our talent and tech prowess to address real-world problems at national and global scale.

How does your company contribute to strengthening India's position as a global

AMNEX

economic force, particularly in alignment with the 'Atmanirbharta' vision?

Under PM Narendra Modi's leadership, India has taken huge strides towards holistic growth – Digital Public Infrastructure (DPI), social sectors, and digital transformation, with UPI, Aadhaar, and DigiYatra as shining examples. Amnex actively supports India's 'Atmanirbhar Bharat' mission by advancing Digital Public Infrastructure (DPI) the backbone of the nation's growth. In India, where 60% of population depends on farming, our AgriStack solutions use predictive analytics and IoT to optimize irrigation, boost yields, and empower farmers. In urban mobility, our multimodal transit app streamlines daily commutes for 12.5 million Mumbaikars, while smart traffic systems reduce congestion and save time. By aligning with these initiatives, we're driving efficiency, transparency, and self-reliance at a huge scale, cementing India's global tech leadership.

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

Amnex bridges IT and OT (Operational Technology) with Industry 4.0 tools like AI and IoT to transform sectors. Smart traffic

systems ease urban congestion, precision farming boosts agricultural output, and port optimization tools enhance supply chain efficiency—all powered by real-time analytics and automation. For customer engagement, we prioritize citizen-centric solutions: farmers receive AI-driven advisories, commuters access seamless transit apps, and citizens benefit from transparent e-governance platforms. By delivering the right information at the right time through accessible digital channels, we foster inclusivity, efficiency, and trust across industries. ■

Jayesh Joshi

Head - Corporate Finance
Veer Plastics

in alignment with the 'Atmanirbharta' vision?

At Veer Plastics, our vision aligns closely with Atmanirbharta. We manufacture globally competitive products entirely within India, exporting majorly. By indigenously developing high-performance materials for roofing and infrastructure, we reduce dependency on imports and empower Indian manufacturing on a global stage. We also invest in R&D to co-create solutions with customers across sectors, enhancing India's reputation as a hub for engineering and innovation. Our focus on skill development and decentralized manufacturing contributes to regional job creation and sustainable growth.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra lies in being "Pioneering Quality, Driven by Innovation." We stay agile, customer-focused, and relentlessly curious. We treat every challenge as an opportunity to improve, whether in product development, global expansion, or digital transformation. Empowering teams, listening to customers, and investing in future-ready technologies has helped us stay ahead, no matter the market dynamics. ■

What are some key milestones that demonstrate your company's adaptability in recent years?

Veer Plastics has consistently evolved to meet emerging demands and global standards. In recent years, we expanded our portfolio from woven packaging to advanced building envelope solutions, including self-adhered roof underlayments, house wraps, and flashing tapes for the North American market.

We've also grown our renewable energy capacity by doubling our wind power generation to 4.2 MW, reinforcing both operational sustainability and self-reliance. Our agility in pivoting product lines, expanding into exports, and embracing innovation showcases our commitment to long-term growth.

How does your company contribute to strengthening India's position as a global economic force, particularly

What sustainability practices has your company adopted, and how are these initiatives contributing to long-term resilience and environmental responsibility?

Our company has adopted sustainable practices including the use of eco-friendly raw materials, waste reduction, and recyclable packaging. We've made green investments in energy-efficient systems and renewable power sources across our facilities. These initiatives strengthen our environmental responsibility while enhancing long-term resilience and compliance.

Gurunath Kanathur

Co-Founder
Pierian Services

Chetan Venugopal

Co-Founder
Pierian Services

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

Our 3-5-year growth strategy is built on three pillars: sector-focused expertise and technology-driven service expansion are at the core of the Organic growth, and an expanded global presence through acquisitions – our sector-focus will be centred on the evolving needs of MSMEs. As MSMEs grapple with financial visibility, compliance, and digital adoption, we offer integrated solutions that combine finance, advisory, and digital enablement into a unified value proposition.

By embedding automation, AI, and analytics into our offerings, we intend helping clients streamline operations and make data-driven decisions. We're also deepening our presence in high-impact MSME sectors like ecommerce, manufacturing, healthcare, and services, delivering tailored, industry-specific value. To support scale and cost efficiency, we're enhancing our hybrid global

delivery model—further amplified by our joint venture with a global accounting leader. At its core, our strategy is to empower MSMEs to succeed in a digital-first world through the right mix of technology, domain insight, and operational excellence.

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

Technology has been integral to our evolution, enabling us to enhance efficiency, accuracy, and client engagement. We've implemented cloud-based platforms and workflow automation to streamline operations, reduce manual effort, and deliver consistent, high-quality services. Advanced data visualization and reporting tools now empower clients with real-time, actionable insights, reinforcing our shift from transactional support to strategic advisory. We've also integrated AI and machine learning to automate processes like invoicing and

reconciliations, allowing our teams to focus on higher-value work.

To improve transparency and collaboration, we introduced client portals and dashboards offering real-time visibility into financials and project status. Our acquisition of a digital services firm further accelerated this transformation, helping us embed technology into core offerings—especially for MSMEs and mid-market enterprises. By continuously adopting emerging technologies, we are creating a proactive, insight-driven service experience that supports long-term growth and adaptability.

What are some key initiatives that your organisation has taken to ensure business continuity, adaptability & growth?

Pierian thrives in today's fast-paced, digitally disruptive environment by combining deep expertise, agile execution, and scalable delivery. We go beyond standard solutions by deeply understanding each client's unique context, challenges, and

goals—enabling us to deliver precise, transformative outcomes.

To address challenges like high-volume transactions, compliance, and talent shortfalls, we build tailored Centres of Excellence (CoEs) and fit-for-purpose workflows. For a last-mile delivery platform, we streamlined financial operations for 75,000+ monthly buyers using automation and real-time visibility, ensuring faster, error-free disbursements.

For a leading e-commerce seller ecosystem, we established a 650+ FTE finance center, embedding automation and analytics across P2P, O2C, R2R, and FP&A—resulting in 60% cost savings and dynamic dashboards for real-time insights.

We partnered with a top 10 global professional services joint venture to build finance and compliance teams, enhancing data integrity through automation. In education, we implemented a Student Management System that reduced turnaround time by 20%.

Our success stems from delivering what is truly needed, not just what is asked for. Fixing inefficiencies

is a strategic approach, focusing on understanding context, designing forward, and delivering transformative results with clarity and conviction.

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Our Evolution: From Specialists to Strategic Partners

Since inception, Pierian has evolved from a specialized finance and accounting (F&A) service provider into a comprehensive, AI-enabled global business process management (BPM) partner. Initially, we supported global enterprises setting up operations in India with regulatory, compliance, F&A, and HR services.

As our clients scaled, so did we—expanding into data analytics, business intelligence, risk advisory, and technology-enabled solutions, while retaining F&A as our core. This marked our shift from transactional support to strategic partnership.

A key transformation has been our focus on digitally transforming finance functions. By integrating

data science, intelligent automation, and enterprise technologies, we've reimaged traditional processes—enhancing operational efficiency and delivering deeper, actionable insights.

Our sector expertise spans e-commerce, manufacturing, technology, education, and healthcare. While SMEs remain our core clientele, we also deliver tech-enabled BPM at scale for multinational corporations.

A major milestone was our joint venture with a leading global public audit firm, strengthening our assurance, tax, and consulting capabilities. We also established a Finance Centre of Excellence (CoE), supporting global clients across Procure-to-Pay (P2P), Order-to-Cash (O2C), Record-to-Report (R2R), Financial Planning & Analysis (FP&A), and Compliance.

Today, with a global presence across India, the UK, Middle East, Singapore, and Australia, Pierian delivers localized expertise with global standards—driving sustainable growth and transformation. ■

Venu Gopalakrishnan
Founder and Global CEO
Litmus7

Evolution of your company and its adaptability in the recent years?

I founded Litmus7 with a few uncompromising values, be unique in whatever we do, stay purpose-driven, never break a commitment, avoid mediocrity, and always be a leader in our knowledge space. These principles made it clear to us from day one that Litmus7 should constantly innovate to stay unique

Today, Litmus7 is ranked #1 in credibility for driving business results for retail partners. As we gained deeper insights into consumer behaviour and retail challenges, we foresaw a shift from product merchandising to consumer wish merchandising, a future where retailers converge and collaborate to fulfill consumer wishes

This called for reimagining consumer-retailer interactions. Retailers will soon compete in building and tuning self-thinking and deciding systems. That's why we developed **Retail Enterprise Neural**

Architecture, an AI architecture that persists business knowledge and can act on its own.

How do you stay competitive in the changing IT services landscape and how do you see your business expanding domestically and internationally?

A retail partner needs three qualities, a) Credible Retail engineering experience. b) Ability to identify opportunities that can enhance traffic, conversion, ACV, Loyalty and Experience. c) Build business experience that enhances consumer trust and differentiates itself from competition. We excel in all three areas.

Nearly two decades of designing and managing high-performing retail platforms with zero client attrition, gives us a unique edge in building retailer's digital aspirations with precision.

We employ our team with an objective to add value beyond contracts, and our Value-Added-Management division eliminates most of the retailer's blind spots.

Those who understand their industry well can lead the change. We invested deeply in retail-focused innovations. Our **Enterprise Neural Architecture (ENA)** now enables retailers to retain knowledge about the outcomes of their business decisions and actions across

operations, systems, consumer behaviour, and partnerships creating a truly intelligent and self-thinking enterprise.

We're now at the forefront of creating intelligent businesses, which is expected to drive our future growth aspirations.

What is your company's growth strategy for the next 3 to 5 years?

We excel in managing and scaling transactional systems with AI, but the future is in making them intelligent, capable of making accountable, autonomous decisions for businesses and consumers.

Our three-phase roadmap is clear:

1. **ENA** to make IT support intelligent ensuring 100% uptime, self-healing and smart decision-delivering 30% cost reduction.
2. **Omniscient Omnichannel Intelligence** to boost prediction, conversion, ACV, loyalty, and retention.
3. **Self-thinking and acting brain** for retail businesses and their functions.

While we stabilize and scale transactional retail systems, we're also leading the shift toward embedding an enterprise neural layer that helps retailers own their proprietary business knowledge and act intelligently across systems and partners. ■

D L Narasimha

Chairman and Managing Director
Technogreen Aircon

to sustainability, governance, and innovation continues to drive Technogreen forward.

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

At Technogreen, technology is at the heart of our efficiency and customer engagement. We've implemented a robust ERP system across our Order-to-Cash and Purchase-to-Payment cycles, streamlining workflows and driving profitability. Our Service ERP enables preventive maintenance, escalation tracking, and proactive resolution—enhancing reliability and client satisfaction. SOP-led automation ensures standardization and faster delivery. In partnership with Seven Star Aircon Ancillaries, we are developing 'Made in India' HVAC innovations such as Digital Thermofuser Diffusers and Wi-Fi-enabled DDC Controllers for real-time energy management. During the pandemic, we swiftly adopted MERV filters, UV lights, and enhanced airflow for healthier environments. Sustainability is a core pillar—we promote energy-efficient systems, OPEX-based retrofits, and eco-friendly replacements. With 30% workforce growth, emerging leaders from Tier 2/3 cities, 50% repeat business, 90% AMC retention, and 80% YoY client growth, our tech-led model delivers scalable, future-ready solutions.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

Our 3-5 year strategy at Technogreen focuses on delivering sustainable, client-centric HVAC solutions tailored to the evolving needs of MSMEs. Anchored on five pillars—expansion, innovation, operational excellence, talent development, and sustainability—we're extending our footprint beyond six cities into Bhubaneswar and Tirupati, tapping Tier 2/3 markets. Our offerings span General Contractors, IDEACs, and our proprietary Design & Build model across sectors like Hospitality, Retail, Healthcare, and Manufacturing. We're enhancing delivery through ANTMYERP, predictive analytics, and HVAC-as-a-Service to enable affordable OPEX models. In partnership with Seven Star Aircon Ancillaries, we co-develop indigenous innovations like Digital Thermofuser Diffusers and Wi-Fi DDC controllers. Our SOP-led, tech-enabled execution ensures quality and timeliness. We're growing our workforce by 30% and grooming future leaders under our Educate-Enable-Empower framework. Technogreen blends innovation, accessibility, and inclusive growth to empower MSMEs with efficient, future-ready HVAC solutions. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Technogreen Airconditioning Pvt. Ltd. (TGAPL) began with a clear vision—to redefine HVAC delivery through quality, reliability, and customer centricity. From our early days in Bangalore and Hyderabad with just over 100 employees and a turnover of INR 50 CR, we focused on delivering end-to-end solutions backed by our QCT 'S' model—Quality, Cost, Timeliness, and Safety. Over time, we expanded into Chennai, Coimbatore, Pune, and Mumbai, scaling to 250+ employees and revenues beyond INR 200 CR, sustaining over 30% CAGR. Strategic alliances with Seven Star Aircon Ancillaries and Acube Engineering strengthened our manufacturing and regional footprint. Embracing digital tools and investing in talent through CREDTECH, ISHRAE, and on-site training enhanced both agility and safety. With over 1,000 projects, 175+ global clients, and 10M+ sq. ft. delivered, our commitment

Nehal Shah

Wholetime Director
Allied Digital Services Limited

What strategies has your company employed to access new markets, both domestically and internationally, to fuel expansion?

Allied Digital's expansion strategy has been multifaceted. Domestically, we have leveraged government-led digital initiatives like Smart Cities and the Make in India campaign to penetrate public sector and industrial markets. Internationally, we adopted a hub-and-spoke model with 20 offices across 70+ countries including the US, UK, UAE, and Australia. Strategic acquisitions and partnerships with global cloud and cybersecurity providers have accelerated our presence. The recent launch of subsidiaries in the Middle East and our expansion into Europe reflect our intent to localize services while maintaining global delivery standards. Our unique blend of global vision and localized execution backed by strong compliance, multilingual service desks, and proprietary platforms has been central to our global growth.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Allied Digital's success mantra in the MSME sector lies in our "3S Philosophy": Strategic Resourcing, Streamlined Processes, and Smart Technology. This approach enables

scalability and cost efficiency critical for MSMEs. By fostering deep partnerships, understanding grassroots challenges, and tailoring scalable solutions, we enable MSMEs to embrace digital transformation confidently, bridging the gap between ambition and execution. Furthermore, our commitment to ethical governance, an inclusive workplace culture, and long-standing customer relationships (some over 15 years) creates a foundation of trust that MSMEs deeply value. Our ability to bundle innovation, compliance, and customer-centricity has made us a preferred partner for digital empowerment across scales. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Since our inception in 1984, Allied Digital has evolved from a mainframe computer support provider to a global leader in digital transformation. The company's journey is defined by its seven strategic versions, each marking a critical growth phase from profit-centric beginnings and geographic expansion to adopting disruptive technologies. In the last decade, a major turning point was our early entry into the Smart Cities domain in 2015, where we became a pioneer in Digital Engineering Services (DES). The rebranding of ADiTaaS to Digital Desk, an AI-powered ITSM platform, and the introduction of solutions like FinoAllied, further signaled a shift toward AI-first strategies. The latest phase - Version 7 focuses on 10x growth through global market expansion, product diversification, R&D enhancement, and sustainable innovation.

D Shanmugasundaram

Managing Director
S&T Group

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Established in 1996 as a trading firm catering to South Indian MSMEs with accessories and conventional machines, S&T Group has evolved into a leading manufacturer of advanced industrial machinery. In 2015, we began in-house manufacturing under our STM brand, launching a wide range of CNC Vertical Machining Centres (VMCs), Injection Moulding Machines, Wire EDMs, and Laser Cutting Machines. With over 30,000 installations worldwide, our machines are trusted across India, Bangladesh, Dubai, Bahrain, Kuwait, and now entering Europe and the USA.

Backed by MSME-focused innovation, global technology partnerships, and a dynamic, youthful workforce, S&T Group is today recognized as a reliable name in precision engineering—delivering smart, efficient solutions aligned with Industry 4.0.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbhar Bharat' vision?

S&T Group is committed to the vision of Atmanirbhar Bharat, aligning our growth with India's goal of becoming a self-reliant manufacturing powerhouse. Since 2015, we have been producing advanced machines—CNC VMCs, Injection Moulding Machines, Wire EDMs, and Laser Cutting Machines—within India, reducing import dependency and equipping MSMEs with affordable, high-precision technology.

A major milestone is our upcoming technology transfer partnership with Averex, Taiwan, to manufacture Horizontal Machining Centres (HMCs) domestically. This initiative will enhance India's precision engineering capabilities and position it strongly on the global stage.

Our impact goes beyond machinery, also into MSME Empowerment, Job Creation & Skills Development, and Strategic Sector Support for industries such as defence, aerospace, automotive, and healthcare. Through these efforts, S&T Group contributes meaningfully to India's journey toward global manufacturing leadership.

What are your company's key strategic priorities for driving

sustainable growth for your customers and stakeholders?

At S&T Group, sustainability means creating shared value for customers, employees, and communities through innovation, efficiency, and responsible growth.

Innovation & Technology: We develop energy-efficient, smart manufacturing solutions aligned with Industry 4.0, integrated with systems like SAP, CRM, and Power BI.

Customer-Centricity: Our tailored solutions, strong after-sales support, and technical training have earned us mandates from leading Japanese OEMs for servicing their machines in India.

Operational Excellence: We adopt sustainable practices and global quality standards to ensure reliability, cost-effectiveness, and long-term competitiveness.

Market Expansion: We're expanding our presence across India, including North, East, and Northeast regions, and extending exports.

People & Culture: We foster a vibrant workplace culture built on inclusion, with women in leadership roles and a strong focus on professional development.

Together, these strategic priorities drive our commitment to sustainable manufacturing, customer success, and inclusive industrial growth, both in India and globally. ■

Dr K Anand Kumar

Managing Director
Indian Immunologicals Limited

What are some key milestones that demonstrate your company's adaptability in recent years?

- Achieving the INR 1000cr mark with PBT of about 40% consistently for the past two years is a significant achievement for IIL.
- Capacity enhancement of facilities e.g., Anti-rabies filling capacity augmentation, new viral antigen facility development, automation of filling lines etc.,
- Manufacturing of India's first indigenously produced Hepatitis-A vaccine
- Standardization of eCommerce business, building digital assets etc., are the major growth enabling milestones.

How has your company fostered innovation to expand its reach and drive growth, and what role has globalization played in this evolution?

Purposed only for Foot & Mouth Disease Vaccine, today's IIL is a ONE

HEALTH vaccine company catering to both animals and humans. We have capabilities to manufacture a variety of vaccines. Besides being the largest manufacturers of FMD and Anti-rabies vaccines, we are the only manufacturers of vaccines against Theileriosis and canine vaccines in India. We also focus on vaccines for neglected diseases e.g., Porcine Cysticercosis, Kyasanor Forest Disease etc., IIL's response during pandemics and epidemic outbreaks has always been very quick. Case examples are the augmentation of COVAXIN drug substance manufacturing (for COVID19) and repurposing of Goat Pox vaccine for Lumpy Skin Disease.

Our uniquely designed virtual marketing officers have facilitated "NO CONTACT" promotion of our products during COVID19 pandemic. Today, our eMOz (e-Marketing Officers) are ready to scale up and pose a challenge for the Marketing Executives in terms of their selling capabilities.

Role of Globalization: Globalization has facilitated the cross-border exchange of science and technology. IIL has several national and international collaborations with scientific institutions and knowledge centers. Our coworking with Griffith University, Australia, for COVID vaccines, development of vaccines for Measles-Rubella with the support of Polyvac, Vietnam, indigenous

manufacturing of Hepatitis-A vaccine etc., are the lead examples for the impact of globalization on vaccine development.

What are your company's key strategic priorities for driving sustainable growth for your customers and stakeholders?

IIL focuses on embracing the research, development and manufacturing technologies for development of vaccines for more species. We are currently working towards launch of Infectious Bovine Rhinotracheitis vaccine in the next 2 months. Fish vaccines are expected to be launched within a span of 12-18 months. We are working on Mastitis vaccine, yet another disease of substantial economic importance for our country. Poultry vaccines and feline vaccine segments are on our agenda. ■

Abiali Saiffee Jani

Director
Jani Sales Pvt. Ltd.

domestic and international demand.

Jani Sales is today one of India's largest producers of M G paper for packaging and Virgin Tissue products.

What strategies has your company implemented to embrace transformation and stay competitive in the market?

Jani Sales Pvt. Ltd. has embraced transformation through in-house manufacturing, sustainable product development, technological upgrades, and global market expansion—ensuring agility, innovation, and continued competitiveness in a rapidly evolving industry.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

Jani Sales Pvt. Ltd. contributes to strengthening India's global economic position by promoting self-reliance through domestic manufacturing, reducing import dependence, expanding exports, and delivering sustainable, high-quality products—aligning strongly with the 'Atmanirbharta' vision of a self-sufficient and globally competitive India.

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

Jani Sales Pvt. Ltd. has integrated technology through automation in manufacturing, real-time production monitoring, ERP systems for streamlined operations, and digital communication tools to enhance customer engagement and service efficiency.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

Jani Sales Pvt. Ltd.'s growth strategy for the next 3-5 years includes expanding manufacturing capacity, very soon launching Paper Machine 3 to meet the growing local and global demand for tissue and related products, diversifying sustainable offerings, and boosting exports. This aligns with the evolving MSME landscape by promoting innovation, self-reliance, and global competitiveness in support of India's economic progress. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Jani Sales Pvt. Ltd. has come a long way since its inception in 1979 as a trading company for paper and paper board products. Over the decades, we have transformed into a fully integrated paper manufacturing and packaging solutions provider with a strong presence across India and global markets.

What are some key milestones that demonstrate your company's adaptability in recent years?

- **2020 - Launch of Paper Manufacturing Plant:**
Marked our transition from trading to full-scale manufacturing, enhancing product control and supply capabilities.
- **2024 - Addition of Second Paper Machine:**
Expanded our capacity and product range to meet growing

Aniruddha Parmar

Deputy Managing Director
Spectrum PharmaTECH

Think... Challenge... Explore... Create... Exceed...

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Founded in 1995, Spectrum began as a pharmaceutical project consultancy and has grown into a global Design-Build firm. With over **500 projects delivered across 30+ countries** in pharmaceuticals, biotech, nutraceuticals, cosmetics, and F&B, we now offer complete turnkey solutions—managing projects from concept to commissioning with speed, compliance, and cost control.

A major milestone was expanding beyond India, forming joint ventures in Thailand and Sri Lanka, and establishing a marketing presence in Egypt, Algeria, and Bangladesh. Recently, we've ventured into solar cell line manufacturing projects, delivering projects for clients like Waaree, Rayzon, Satvik, Inox, and INA Solar.

Our design philosophy focuses on energy efficiency, sustainability, and global regulatory compliance (US FDA, MHRA, WHO-GMP). Whether

a complex pharma facility or a clean energy plant, our solutions are future-ready, efficient, and audit-compliant.

Led by a domain-expert leadership team and an innovation-driven culture, Spectrum remains a **trusted global partner** for building high-performance, compliant infrastructure across emerging and regulated industries.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

Spectrum Pharmatech plays a pivotal role in advancing India's **self-reliance** by enabling world-class manufacturing across pharmaceuticals, biopharma, nutraceuticals, food, and clean energy sectors.

Through fully integrated Design & Build services, we help reduce reliance on imported expertise—delivering globally compliant facilities from within India.

Our recent projects in solar cell and module manufacturing support the national clean energy agenda, with large-scale domestic production for clients like Waaree and Rayzon.

By **blending global standards with local execution**, we contribute to capital investment, job creation, and

long-term industrial resilience—key pillars of **Atmanirbhar Bharat**.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra in engaging with the MSME sector is simple yet powerful: **"Simplify complexity, scale with compliance."**

MSMEs often face constraints—limited budgets, fast turnaround and evolving regulatory pressures. Spectrum's approach has been to **demystify project execution** by offering **modular, scalable, and cost-efficient solutions** without compromising on quality or compliance. Our **Design & Build model** further streamlines this by offering single-window accountability—ideal for MSMEs with lean teams and high expectations.

Finally, our mantra is rooted in **adaptability**—staying ahead of industry shifts through digital innovation, sustainability practices, and a people-first mindset. Whether it's helping a startup pharma unit achieve WHO-GMP status or enabling a clean-tech MSME to go to market faster, **we tailor success, not just deliver projects**.

That's how we turn challenges into opportunities—and MSMEs into global contenders. ■

Vinod Patel
Managing Director
Almonard

What strategies has your company employed to access new markets, to fuel expansion?

At Almonard, we've always believed that **expansion is a double-edged sword**. While it's a natural business aspiration, it can easily lead to a **distraction of focus and a dilution of core competence**. That's why we've consciously chosen to stay sharply focused on what we know we do best – building cooling solutions for India.

When it comes to geographic markets, **over 90% of our business is still rooted in India**, and we believe that's a conscious strength. What is happening in India right now is a convergence that occurs once in a generation. That said, we do export to the **Middle East and Africa** regularly, and will increase the same every year.

Our approach to expansion has always been pull-based, not push-driven. We don't enter markets to create artificial demand. We earn our space by staying true to our promise: to deliver robust, long-lasting, high-performance fans. Our customers' growth creates the pull – and we rise to meet it. No growth is worth compromising the trust and expectations built over decades.

What is your company's growth strategy for the next 3-5 years?

At Almonard, we believe that the foundation of growth lies in staying

deeply connected to what our customers truly need – especially MSMEs, who form the backbone of India's industrial economy. From a cooling solutions provider, MSMEs demand premium-quality products that last long, timely delivery, complete solutions for ventilation, circulation, displacement, and air filtration and after-sales service that makes the entire experience hassle-free,

That's exactly what our growth strategy is.

We are committed to producing **peak-performance products through continuous process innovation**. To meet rising demand and improve delivery speed, we are now **increasing production volumes through new factories**. Equally important is our evolution into a **360-degree air solutions provider**. We no longer just sell fans – we provide complete systems that clean, move, and regulate air in workshops, factories, and warehouses.

Our **pan-India service network** of trained technicians ensures that every customer – from metro cities to tier-3 towns – receives responsive and professional support.

We're building for tomorrow – because **air is getting hotter, India is growing faster, and we're ready for the future.** ■

How has your company evolved since its inception?

Almonard was born out of a simple but powerful idea – to build an engineering marvel capable of withstanding the sweltering heat inside India's manufacturing units. That core ethos – to engineer products that combine **durability, quality, and performance** – has remained the bedrock of our journey over the past five decades.

At Almonard, we believe that anything worth doing is worth doing for decades. That's why our fans are known to last not just years, but generations – a value deeply appreciated by our industrial and institutional customers across India.

From a core set of industrial fans, we diversified into residential and commercial fans, exhaust and ventilation systems, air circulators, and pollution control systems. Today, we have over **180 SKUs**, covering every corner of the air movement and filtration segment.

Rafal Gajdamowicz

Chief Executive Officer
Mavrix Knowledge Services

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Azure Knowledge began 25 years ago with a mission to deliver accurate, actionable insights through reliable data collection. Since then, we've grown from a small regional provider into a global leader in data collection.

Our evolution was driven by five key pillars:

1. **Technology-Driven Operations:** Early adoption of automation and AI improved efficiency and data quality.
2. **Client-Centric Approach:** We built flexible, tailored service models around client needs.
3. **Agility & Innovation:** We embraced new methodologies—from CATI/CAPI to mobile and mixed-mode research.
4. **Global Presence:** With teams across continents, we deliver in over 85 countries.
5. **24/7 Project Delivery:** Our follow-the-sun model ensures speed and seamless execution.

(formerly known as Azure Knowledge Services)

These foundations have enabled us to serve diverse sectors—technology, healthcare, finance, and social research—and support complex, global programs for leading organizations.

What strategies has your company employed to access new markets, both domestically and internationally, to fuel expansion?

Our market expansion has been guided by the principle of reaching respondents where they are. To access new markets, we employed several key strategies:

1. **Geographic Expansion:** We established teams across India, the U.S., Canada, Europe, and Africa, combining local expertise with global scale.
2. **Hybrid Service Models:** Scalable, tech-enabled models allowed us to serve both large global trackers and niche local studies.
3. **Partnership Ecosystems:** Strategic partnerships helped us scale quickly into new regions and hard-to-reach segments, including B2B and healthcare.
4. **Cultural Competency:** Multilingual, culturally attuned teams enhanced respondent engagement across diverse geographies.
5. **Sector Diversification:** Expanding into tech, public policy, fintech, and edtech opened doors in varied markets and ensured resilience.

Today, with operations in 85+ countries and teams across four continents, we deliver globally with local precision and innovation.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

Over the next 3-5 years, our growth strategy centers on becoming a next-gen data collection powerhouse, with a strong alignment to MSME needs. Our focus is on:

1. **AI-Enabled Data Collection:** Integrating AI across the data lifecycle to boost speed, accuracy, scalability, and cost-efficiency—vital for MSMEs seeking smart, affordable insights.
2. **Platform-Led Services:** Launching proprietary platforms offering real-time dashboards, self-service tools, and seamless client integration for greater transparency and control.
3. **Data-as-a-Service (DaaS):** Delivering pre-profiled, validated data on demand to lower insight access barriers for MSMEs.

We're also strengthening our global footprint through a new headquarters in Canada and ongoing investment in delivery teams across India, the U.S., and Europe—ensuring innovation, agility, and local-market relevance. ■

Rashtriya Metal Industries Limited

ESTABLISHED IN 1946 IN MUMBAI INDIA, WE ARE HEADQUARTERED IN MUMBAI WITH A MODERN FACTORY LOCATED IN SARIGAM IN THE STATE OF GUJARAT.

OUR COMPANY IS A MAJOR PRODUCER OF COLD ROLLED STRIPS IN A WIDE RANGE OF COPPER AND BRASS. WE ARE AN ISO 9001, 14001, 45001, 50001 AND ITAF 16949 CERTIFIED COMPANY.

Continuous casting technology (We have 8 casters) gives us the capability of producing long continuous unwelded coils of precise chemical composition. Computer-controlled direct reading spectrometer aids in monitoring the chemistry of the melt. Surface imperfections of the cast strips such as oxides etc. are then removed with the off-line milling machines.

Our European Origin Rolling mills can roll down the strips to a thickness as thin as 0.03 mm. Our

automatic gauge control system ensures minimal strip thickness variation.

Our annealing and Pickling equipment is capable to meet the explicit metallurgical requirement of the customers. Our world-class DAP (Degreasing, Annealing and Pickling) line provides uniform characteristics

Our slitting equipment - Heavy, medium and foil slitting lines having loop splitter provides closer widths, bow-free, burr-free and camber-free products.

Our dedicated Electroplating line has the capability to coat Tin Matte and Tin Bright, copper and Nickel on Brass material with a reflow process as per customer requirements.

We have a dedicated Press Shop which houses cupping presses and allied infrastructure to manufacture Case Cups and Bullet Jacket Cups for Small Arms Ammunition. We produce brass cups in various

calibres viz. 9mm, 10mm, 5.56mm, 0.338, 7.62mm, 44mg, 12.7mm (0.5 cal), and other customized calibres.

INDUSTRIES WE CATER

1. AUTOMOBILES - STRIPS FOR STAMPING COMPONENTS, WIRE HARNESS ETC
2. ELECTRICAL - COPPER TAPES FOR CABLE WRAP, SHEETS FOR TRANSFORMERS, SWITCH GEARS ETC
3. HOROLOGICAL - WATCH CASES, DIALS
4. LOCKS - BEASS STRIPS FOR LOCKS, LEVERS AND KEYS
5. COINAGE - STRIPS FOR COIN BALANKS, MEDALS AND COIN BLANKS FOR MINTING
6. DEFENSE - LEADING PRODUCER OF BRASS STRIPS AND CUPS -CASE CUPS AND BULLET JACKET CUPS IN VARIOUS CALIBERS WHICH ARE SUPPLIED TO SMALL ARM AMMUNITION COMPANIES WORLD WIDE.

POWERING TOMORROW'S INFRASTRUCTURE

With over five decades of innovation, **ASHIDA** continues to lead the way in advanced power protection system. From intelligent electronic devices (IEDs) to comprehensive control and relay panel systems, our solutions are built for resilience, accuracy, and real-world performance.

Each product reflects our commitment to quality and adaptability — designed to meet the demands of modern transmission and distribution networks.

Vinod Sood
MD & Co-founder
Hughes Systique

- **Global Recognition for Excellence:** HSC is among the first few companies worldwide to be appraised at CMMI 3.0 Maturity Level 5, a testament to our operational excellence.

What strategies has your company employed to access new markets, both domestically and internationally, to fuel expansion?

Our growth strategy is deeply rooted in innovation and the exceptional calibre of our technical talent. Complementing this, we've adopted a multi-pronged approach to fuel expansion:

- **Strategic Global Presence:** Establishing formal offices in key geographies, like Dubai, UAE, strengthened our local relevance. We will also be scaling our footprint within India.
- **Infrastructure Investment:** We've added a 40,000 sq. ft. facility to our Gurugram campus, reinforcing our commitment to operational excellence.
- **Industry Engagement:** By actively participating in conferences & shows globally, we expand our network and initiate meaningful conversations with OEMs, deep tech innovators, and startups.
- **Accelerated Solutions Portfolio:** We've developed a suite of ready-to-deploy solutions and accelerators across multiple domains. These offerings empower our clients to significantly reduce time-to-market while maintaining high standards of quality and

innovation. At the core of this portfolio is Artificial Intelligence.

Our strategy is intentional, adaptive, and anchored in customer success.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success stems from a simple yet powerful mantra: agility, innovation, operational excellence, and people-centricity.

As a mid-sized enterprise and a member of the Hughes Group, we operate at a unique intersection. We combine the nimbleness of an MSME with the process maturity of a global organization. This allows us to adapt swiftly to our clients' evolving needs without compromising on quality.

Our people are our greatest strength. We've built a culture that emphasizes:

- **Continuous Learning:** Empowering our teams through certifications, advanced training programs, and hands-on exposure to cutting-edge technologies.
- **Tech-Forward Thinking:** Actively exploring emerging domains to stay ahead of the curve and bring innovative solutions to market.
- **Client-Centric Execution:** Remaining deeply attuned to our customers' goals, challenges, and aspirations—ensuring that our solutions are not just relevant, but transformative. ■

What are some key milestones that demonstrate company's adaptability in recent years?

Adaptability is embedded in our DNA—we anticipate, respond and shape it. Since inception, several strategic milestones underscore our commitment to staying ahead of the curve:

- **AI-First Transformation:** Recognizing AI's transformative potential early on, we established a technocrat-led Center of Excellence for Applied AI and ML in 2018. It enabled us to evolve into an AI-first organization, with 70% of our workforce trained in AI and 5% of our annual budget dedicated to R&D.
- **Trust-Centric Innovation:** We've made data security, privacy, and IP protection foundational to our product and service strategy—ensuring cutting-edge, responsible innovations.
- **Strategic Diversification:** We've expanded into high-impact domains like Quantum Computing, Non-Terrestrial Networks, AI/ML in Wireless, Defence Tech, Security, & Edge Computing, while entering new geographies: Middle East.

Govind Vasanadu

Managing Director
Lotus Roofings Limited

Innovation and customer-centricity are at our core as we have launched new climate control products. We've expanded our portfolio to include allied products such as High-Pressure Laminates (HPL) and self-drilling screws. Our "48-hour Pan India delivery" model has become a hallmark of our brand promise. Now we are foraying into PUF / PIR/ ROCKWOOL Sandwich panels for Roofing, cladding and cold room applications to provide solutions to counter global warming and rising temperature.

But what truly fuels our growth is our robust dealership network of over 1,000 partners—many of whom have stood by the Lotus brand for over a decade. Their unwavering trust has helped us embed our brand deeper into the Indian market, strengthening our reputation as a reliable and future-ready roofing solutions provider.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

Our commitment to the Atmanirbhara Bharat vision is deeply ingrained in our operations. By shifting from importing polycarbonate sheets to full-scale domestic production, we've not only reduced dependency on foreign products but also contributed to India's self-reliance

and foreign exchange savings.

We've built an agile supply chain with strategic stocking points across India, enabling us to meet customer needs promptly. Every Lotus product sold under our Make in India banner reaffirms our belief that Indian manufacturing can lead in quality, innovation, and global competitiveness.

What would you consider to be your company's 'success mantra' in navigating the challenges and opportunities in the MSME sector?

Our success mantra lies in long-term partnerships, dependable service, and continuous brand building. We support our 1,000+ strong dealership network with a diverse product mix, technical guidance, marketing support, and flexible credit options ranging from 30 to 40 days—ensuring mutual growth. Brand Lotus stands for trust, speed, and excellence. We've consistently invested in branding through product quality, consistent delivery, and digital engagement—ensuring that Lotus is not just a name, but a brand that resonates across rooftops of India. ■

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Lotus Roofings Limited was established in 1984 with a visionary mission: to offer a safe and sustainable alternative to hazardous asbestos roofing. We pioneered the use of PVC roofing sheets in India and gradually expanded into producing PVC pipes under the "LOTUS" brand—laying the foundation for a trusted name in quality roofing solutions.

Our journey took a pivotal turn in 2010 when we entered the polycarbonate roofing segment through trading. By 2018, we launched our own state-of-the-art production unit to deliver unmatched quality and aesthetic diversity, by producing UV resistant sheets and panels. Today, we have scaled our capacity from 2,400 MT to over 12,000 MT per annum, becoming India's largest manufacturer of polycarbonate sheets.

A pure-play IT services and consulting partner enabling business-aligned, technology-led digital interventions for global mid-market organizations—across data, applications, and quality assurance.

Psiog Leaders, balancing Passion with Profession

Navneet Singh Bindra

Senior Vice President
Ingram Micro India

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Ingram Micro has witnessed numerous changes in the landscape of technology distribution, and we have taken various strategic, far-sighted actions to stay relevant in the age of stiff competition. We have evolved from a traditional tech distributor to platform company, and the launch of Ingram Micro Xvantage was one of the most pivotal milestones in our journey of more than four decades. The Xvantage allowed us to digitize our entire process of technology acquisition and disposition, and it ensures a seamless, intuitive experience for our partners to interact and transact with us.

Additionally, we have also started offering a comprehensive range of Value-Added Services, Professional Services, Cloud Services, IT Asset Lifecycle Management and Disposition Services, Financial Solutions, and Verticalized Solutions

for healthcare, hospitality, etc. These services have enabled us to align perfectly with the evolving needs of customers.

What strategies has your company implemented to embrace transformation and stay competitive in the market?

Our digital transformation approach has always been focused on enhancing the experience of all stakeholders of tech distribution. That's why we embraced digital transformation with the core intention of bringing about a digital shift in the distribution landscape. Our 'Digital Twin', Ingram Micro Xvantage, ensures that all our partners (irrespective of their digital maturity, nature of business, or locations) join the digital bandwagon and get ready for the new digital era of doing business.

Xvantage allows our partners to learn, partner, build, manage and buy technology-led products, solutions and services in the most convenient manner - through the click of a button. With the Xvantage Mobile App, partners can now easily search for the products,

generate a quote, place an order, track shipment, and perform similar tasks on the go. They can even explore all our services/solutions and talk to experts through Xvantage conveniently.

What are your company's key strategic priorities for driving sustainable growth for your customers and stakeholders?

While we are all geared up to bring about a radical transformation in the technology distribution landscape, we are always mindful of the impacts of our strategies on people and our planet. As a values-driven organization, we are wholeheartedly committed to achieving continuous improvements on the Environment, Social and Governance areas. That's why we have strengthened our Service Stack to ensure end-to-end lifecycle solutions for our customers, including technology acquisition, implementation, optimization and even asset disposition services. Our sustainable, environment-friendly distribution practices and day-to-day operations at our warehouses and offices ensure long-term value for all stakeholders. ■

“ Our digital transformation approach has always been focused on enhancing the experience of all stakeholders of tech distribution. That's why we embraced digital transformation with the core intention of bringing about a digital shift in the distribution landscape. Our 'Digital Twin', Ingram Micro Xvantage, ensures that all our partners join the digital bandwagon and get ready for the new digital era of doing business. ”

Dun & Bradstreet Knowledge Platforms and Learning Solutions

Dun & Bradstreet India has been tracking the Indian economy for more than two decades. Through our knowledge platforms and publications, we place the success stories of Indian Companies on a global platform. Our platforms are designed to help you position your brand in front of potential customers, investors, suppliers, government bodies, regulators and other stakeholders. We also provide a suite of professional training, educational courses and innovative knowledge forums & conferences.

Jose K Mathew

Managing Director
Bioingredia Natural Pvt Ltd.

prototyping, we went from ideas to customer samples faster than ever.

- But none of this sticks without the right team. We empowered people—through training, clear metrics, and a culture that rewards agility. That's how we moved from being a supplier to a true innovation partner.

than offering standard products, we develop tailored solutions that meet specific requirements - whether that's regulatory compliance, application needs or sensory profiles. Our upcoming Innovation Centre will expand these capabilities with dedicated space for joint development work

What are some key milestones that demonstrate your company's adaptability in recent years?

You know, adaptability has been at the heart of our journey. A few moments really stand out:

- First, we set a clear direction for innovation—organizing our development around two focused platforms. SENSES drives the creation of ingredients for flavor, aroma, and natural color. CARE centers on actives that promote wellness and natural preservation. Together, they bring structure to our pipeline, clarity to our teams, and sharper relevance to every product we build.
- Then came the digital shift—tools like real-time tracking and ERP systems turned guesswork into precision, especially in cost and quality control.
- On the ground, we got closer to farmers—building regional hubs to make our supply chain as resilient as our formulations.
- And perhaps most exciting? Speeding up R&D. With rapid

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

At Bioingredia, we combine technical expertise with smart technology to deliver consistent, high-quality botanical ingredients. Here's how we approach it:

- Our ERP and CRM systems handle the heavy lifting of coordination - they streamline everything from sourcing to delivery so we can focus on quality. For daily operations, BioFlo keeps teams aligned on tasks while BioLens monitors production metrics in real-time, ensuring we maintain standards for yield, potency and consistency.
- We specialize in extraction techniques that matter - multi-stage processing, crystallization and aroma preservation. This allows us to produce superior turmeric, ginger and pepper extracts that perform.
- What makes us different is how we work with customers. Rather

What are your company's key strategic priorities for driving sustainable growth for your customers and stakeholders?

We focus on three priorities:

- First, building globally relevant ingredients from Indian botanicals—seen in our 2025 launches: natural vanilla, cinnamon, cocoa, cardamom, and chlorophyll for flavor and color applications; and rosemary, gingerol 40%, and ethanol-extracted curcumin and piperine for wellness and preservation. Each of these launches is part of a structured, multi-year pipeline—strategically aligned to serve evolving customer needs in flavor, wellness, and natural color.
- Second, enabling co-creation with customers and transparency with farm partners.
- Third, scaling sustainably—through our Biosphere initiative covering Miyawaki forests, solarisation, and zero-waste operations. ■

Palaram
Managing Director

Nitesh Kumar
Chief Executive Officer

What are some key milestones that demonstrate your company's adaptability in recent years?

- Scaling up production capacity to 96,000 MT annually, with projections to reach 120,000 MT
- Secured NPCIL manufacturing approval, validating quality standards.
- Featured as one of the "Top 10 Manufacturers of Earthing Equipment" by Industry Outlook.
- Awarded Three Star Export House status under Foreign Trade Policy 2023.
- Recognized by EEPC INDIA at the 52nd & 53rd Export Excellence Regional Awards.
- Received Business Sphere Award from the Ministry of State for outstanding manufacturing of steel, solar structures, and telecom towers.
- Successfully entering and executing projects in over 12 international markets, including USA, Africa, and the Middle East.

What sustainability practices has your company adopted, and how are these initiatives contributing to long term resilience and environmental responsibility?

- Continuous focus on energy-efficient machinery and eco-compliant operations, aligning with ISO 14001:2015 EMS standards.
- Usage of LPG-based galvanizing systems, which are more environmentally friendly than conventional fuel-based methods.
- Committed to reducing carbon emissions.
- Implements waste management, recycling scrap, and hazardous waste disposal.
- Installed rainwater harvesting systems and reuses process water.
- Planning to install a 6 MW solar energy plant for energy conservation.
- We are proud to be a registered member of the Indian Green Building Council (IGBC), reflecting our commitment to sustainable development and environmentally responsible practices in all aspects of our operations.

What is your company's growth strategy for the next 3-5 years, And how does it align with the evolving msme landscapes?

- Install a new cold rolling mill for Z-sections, purlins, square pipes, and unistrut for sustainable energy structures like solar.
- Streamline processes to reduce costs and respond swiftly to market demands.
- Prioritize eco-friendly practices and resource optimization to position as a responsible MSME leader.
- Align with digital and green trends to capitalize on new opportunities and strengthen competitiveness.
- Enhance research & development to create innovative products for emerging markets.
- Aligning with MSME initiatives by focusing on sustainable manufacturing, Make in India, and export-oriented growth, which positions the company strongly within the evolving Indian MSME ecosystem.
- Utilized digitally controlled galvanizing baths with optimized zinc usage to ensure quality and sustainability. ■

Jayant Jain
Managing Director
Guru Rajendra

Motor, Royal Enfield, Stellantis, Tata Steel, AMNS, and others, while also exporting to Japan (Toyota, Honda, Nissan, Mitsui) and beyond.

Our transformation from trading to manufacturing, and into specialized alloys, has been pivotal in becoming one of India's leading aluminium alloy producers.

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

We started our journey in 2005 with international trading of non-ferrous metal scrap, focusing on aluminium from 2006. That same year, we began manufacturing aluminium deoxidizers (Deox) through job work and soon set up our own facility in 2007.

By 2009, we had scaled production to 300 MT/month. A major turning point came in 2010 when we ventured into manufacturing aluminium alloy ingots. This strategic shift accelerated our growth and positioned us as a key supplier to various sectors.

Today, we operate two plants with 12 furnaces and a combined capacity of 5,500 MT/month. Our product range includes diverse aluminium alloys for automotive, electrical, and industrial applications. We supply leading OEMs and Tier-1 firms like TVS

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

Technology plays a central role in our operations. We've adopted advanced systems like Density Separation, Eddy Current Separation, and automation for efficient scrap processing and consistent quality.

We also leverage digital tools for production tracking, inventory control, and customer communication, ensuring timely deliveries and better coordination. Our tech-led approach enhances productivity and allows us to offer high-quality products at competitive prices.

By aligning with global standards, we've ensured our facilities remain future-ready and customer-focused.

What would you consider to be your company's 'success mantra' in navigating the challenges

and opportunities in the MSME sector?

Our success rests on four core values: Honesty, Reliability, Commitment, and Dedication. These principles guide every decision and relationship we build. Despite the volatility in the metal industry, we have remained consistent in quality and ethics. This has helped us earn long-term trust and establish a presence in over 65 countries. We believe sustainable success in MSME lies in staying true to your values while adapting to change with resilience and vision. ■

Senses Electronics Pvt. Ltd.

India's First Interactive Flat Panel Manufacturer, Trusted by 9,000+ Institutions

THE MISSION

To build India's most trusted digital classroom ecosystem – engineered, manufactured, and supported entirely in India – with a focus on scale, simplicity, and long-term impact.

THE BREAKTHROUGH

Established in 2013, Senses Electronics became the first company in India to locally manufacture Interactive Flat Panels (IFPs) and develop a proprietary teaching software tailored specifically for the Indian education system.

To date, the company has digitized over 100,000 classrooms and serves 9,000+ institutions, including IITs, NITs, BITS Pilani, Manipal, EuroSchool, SVKM's NMIMS, and several government and private education boards across the country.

WHAT SETS SENSES APART

- **Pioneering Innovation:** First in India to offer both hardware and fully localized software under one ecosystem.
- **Made in India:** Fully in-house manufacturing enables faster delivery, better quality control, and regional support.
- **SenseBoard + SensesAI:** A proprietary whiteboard suite with over 140 features, including AI-powered content

generation, 3D libraries, subject-specific tools, text recognition, and integrated note sharing via WhatsApp or email.

- **Dual OS Panels:** Android + Windows compatibility with EDLA-certified editions (SenseEdge) for enterprise-grade performance.
- **Training & Certification:** Dedicated in-house training teams conduct structured onboarding programs across India at no cost, with certifications for all participating educators.
- **After-Sales Excellence:** Hassle-free warranty replacements, lifetime free support, and consistent customer success follow-ups.
- **High Retention, High Expansion:** A majority of institutions remain long-term partners, with multiple clients expanding deployments campus-wide over time.

ZERO OBSOLESCENCE, PROVEN LONGEVITY

Senses provides **free software updates every few months**, ensuring institutions stay ahead without recurring costs. Many early clients still run Senses panels installed **over a decade ago**, a direct result of the brand's commitment to long-term lifecycle value.

CLIENT STORY: SRI BALAJI UNIVERSITY, PUNE

The university adopted Senses' complete digital stack – including SenseTalk for communication, and utility tools like SenseWatch, SenseCapture, and SenseConnect. Centralized IT control now enables real-time campus coordination, improving operational efficiency and academic delivery.

THE RESULT

- 100,000+ smart classrooms live
- Trusted by 9,000+ institutions
- National training + support infrastructure
- 96% customer satisfaction
- High retention and repeat client base

CONCLUSION

Senses Electronics isn't just selling technology – it's building India's digital education backbone. As the original innovators in this space, Senses continues to lead with purpose, performance, and a customer-first approach that scales.

Ajay Anand

CMD
Faze Three

Vishnu Anand

President
Faze Three

Key milestones showing adaptability in recent years?

Faze3 has done almost 3X revenue of 2019 in 2025, with focus on expanding capacities while diversifying its product portfolio to meet evolving global demand. Investments over INR 277 Crores (since FY 2019) fully funded through internal accruals. We have added multiple products / lines effectively covering most categories in home textiles, except sheets and towels.

- Revenue grown from **INR 225 Cr to INR 701.04 Cr** (FY15 to FY25)
- EBITDA grown from INR 25 Cr to INR 98 Cr (peak in 2022/23)
- Net **debt-free** with **zero long-term debt since FY2018**
- Credit rating **reaffirmed at A (Stable)/A-CARE Ratings (Aug'24)**
- Delivered a robust **5-year CAGR of 18% in Revenue, 20% in EBITDA, 18% in EPS**
- Q4 FY-2025 Revenue run rate crosses **INR 200 Cr for the quarter**

The expanded capacity has potential to cater to Revenue levels of at least 2x of FY 2025.

Strategies to embrace transformation & stay competitive?

A key strategic focus has been on enhancing our share across segment of home textile category across Top 10 customers, who are Top 10 large retailers in USA/EUR/UK. To support this, FTL continues to develop new product lines, staying relevant to evolving consumer preferences and industry trends.

FTL has invested in a dedicated design studio in Mumbai & New York, while investing in market weeks in EU/UK also. We have reinforced our positioning as a forward-looking, design-led company committed to innovation and international standards.

Growth strategy for next 3-5 years & MSME alignment?

We intend to double our Revenue / Volumes every 4yrs broadly over very long term. We have done this around 3yr avg over last 6 years cycle (2019-2025). This requires being in growth mode in terms of new business,

products, new infra/machinery, new people, etc. China plus One has opened huge opportunity for manufacturers given the latest tariff / trade war.

Most of the Top 10 retailers have committed to incremental sourcing from India over Asian peers. This opportunity is significant in the polyester / MMF fiber (dominated by China). Our growth strategy is centered around new & existing product categories catered to replace Chinese products apart from our existing strength in design and innovation.

FTL prioritizes local sourcing of materials near manufacturing units, fostering robust partnerships with MSMEs & domestic suppliers. Almost 95% of materials are sourced locally. Faze3 is ready to tap a larger opportunity that arises due to disruption of tariffs / trade deals with China. This should play out in 2026 entirely as we get incremental clarity on trade picture though 2025. ■

Note: The views and insights shared in this interview reflect the perspective of the company's top management.

Ashok Nair

Managing Director
RPG Life Sciences Ltd.

What are some key milestones that demonstrate your company's adaptability in recent years?

RPG Life Sciences, a company with over five decades of experience in the pharmaceutical industry, has undergone a significant transformation over the past few years. Originally starting as a joint venture with GD Searle, the company was retitled as RPG Life Sciences after Searle exited India in 1993. The company inherited iconic brands, R&D, manufacturing, regulatory infrastructure, processes, and equity, making it one of the few mid-size pharma companies well-represented in all three segments: Domestic Formulations, International Formulations, and APIs

Backed by a well-conceptualized transformation agenda, diligently executed by a team of 1300 members, RPG Lifesciences has emerged as a benchmark mid-size company. The company's revenue growth has consistently outpaced the market, with all three segments experiencing healthy double-digit

growth. Profitability and profits have grown manifold, and the company has become debt-free, generating healthy positive cashflows. The success is reflected in the company's market cap, which has leapfrogged significantly, outpacing the growth of the BSE Healthcare index

How has your company integrated technology to enhance efficiency, streamline operations, and improve customer engagement?

The company has outlined a year-wise technology adoption plan for various business processes, from frontend to backend. In sales and marketing, the company launched RPGserv, a digital platform for comprehensive doctor engagement, integrating physical and digital capabilities to provide "Anytime, Anywhere Doctor Support" across therapies. Generative AI is being deployed for customer-customized marketing. In the backend, several digital interventions are planned and in various stages of implementation, including e-QMS, e-DMS, e-LMS, e-LIMS, e-APQR in Quality; e-BMR, e-PPR, e-IPQC, e-CAPS, and so on. These initiatives aim to improve efficiencies, optimize costs, and enhance quality as the company moves to the next leg of growth.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving MSME landscape?

The overall strategy of the company is to achieve sustainable and profitable growth in both Domestic and International markets. The company has significant potential and latent strengths to become a major pharmaceutical player. This is due to its geographical spread (India, regulated, and ROW markets), segment spread (API and Formulations), therapy spread (acute and chronic), powerful iconic brands, front-end capabilities (marketing and sales in both mass and specialty segments), and back-end infrastructure and capabilities (API and Formulations plants, R&D, regulatory, project management, and quality orientation to support exports to highly regulated markets).

The company has devised a diligent transformation strategy focused around six pillars and is currently engaged in implementing in building high-growth therapies/ product portfolios in the domestic market and stepwise build-up of international formulations and API business through new products, new customers, and new markets.

India's pharmaceutical industry is a structural growth story driven by a wide range of demographic, economic, geographic, and infrastructural factors that are likely to sustain over the years. The company's overall strategy is to capitalize on the opportunities in India. ■

Leading IT Solutions Provider Transforms Global Innovation Strategy with World-Class India Collaboration Hub

Trigent's GCC Expertise and Engineering Excellence Powered the Company's Strategic Expansion

“ Trigent architected a global innovation engine for our client: designed for scale, seamless collaboration, and sustained progress. With our proven GCC playbook and deep engineering expertise, we accelerated product development while embedding agility, quality, and long-term scalability into every layer of the operation. ”

– Nagendra Rao, President, Trigent Software

ABOUT THE CLIENT

The client is a global leader in IT management and security solutions, providing comprehensive Remote Monitoring and Management (RMM) tools, Cove Data Recovery solutions, and innovative SaaS-native services to businesses worldwide. With a commitment to empowering IT professionals and managed service providers, the company delivers cutting-edge technology solutions that enhance operational efficiency and drive digital transformation across industries.

CLIENT MISSION: EXPANDING HORIZONS

The global tech solutions company set out to launch its India Collaboration Hub in Bengaluru in 2024, envisioned as a strategic center to strengthen global capabilities and power its innovation agenda. They wanted to:

- Build a world-class engineering and innovation center to accelerate product development
- Enhance its Remote Monitoring and Management (RMM) solutions through local expertise
- Scale SaaS-native services while maintaining seamless integration with global operations
- Establish a high-performing team to drive sustained innovation and operational efficiency
- Create a strategic presence in India's thriving tech ecosystem to tap into specialized talent

THE TRANSFORMATION ENGINE: TRIGENT'S COMPREHENSIVE APPROACH

As the client's trusted GCC partner, Trigent leveraged its deep expertise in software engineering, digital innovation, and Global Capability Center (GCC) operations to deliver a comprehensive solution:

- **Agile-First, Innovation-Led Approach:** Designed a resilient, future-ready GCC, embedding agility at its core
- **POD-Based Delivery Model:** Implemented modular, scalable teams for rapid setup, efficient management, flexible resource allocation, and focused domain expertise
- **GCC-in-a-Box Platform:** Delivered pre-defined governance models, performance KPIs, and setup accelerators for faster time-to-value
- **Proven BOT Model Expertise:** Executed end-to-end delivery from build to seamless transfer with sustained operational maturity

MISSION ACCOMPLISHED

Thanks to the strategic partnership with Trigent, the client unlocked the following:

- **Built a high-caliber team in India by tapping into deep local talent pools** – attracting specialists across engineering, support, and operations through focused hiring.
- **Established a state-of-the-art delivery center** designed for rapid scale, resilience, and hybrid collaboration – ensuring business continuity and a best-in-class work environment.
- **Expanded global footprint with a strong operational base in India**, offering proximity to emerging talent and cost-effective scalability in one of the world's top tech ecosystems.
- **Enabled seamless collaboration between India and global teams**, facilitating real-time engagement, shared accountability, and continuous service delivery across time zones.
- **Achieved low attrition and high employee engagement** through local leadership, career development programs, and a culture of ownership – ensuring long-term knowledge retention.
- **Elevated operational excellence** through clearly defined governance, real-time metrics, and local leadership accountability – ensuring alignment with global KPIs and quality standards.

Together, we've built a foundation for a resilient, innovation-driven global operation.

WESTERN INDIA CASHEW COMPANY

India's No. 1 Roasted Nut Exporter | Innovators Since 1932

WENDERS, officially known as **Western India Cashew Company Pvt. Ltd.**, is a legacy-rich, 93-year-old snack food company based in **Kollam, Kerala**. Since its founding in **1932**, WENDERS has been a pioneer in India's cashew export industry, earning global recognition for quality and innovation.

Today, WENDERS is India's **No. 1 exporter of roasted nuts**, contributing over **90% of the country's roasted cashew exports**. The company supplies **premium roasted snacks and nut-based food ingredients** to leading global food brands and retailers.

WENDERS operates **BRC, Kosher, Halal, and HACCP certified** facilities across **Kerala, Tamil Nadu, and Vietnam**. In 2025, it opened a **100,000 sq. ft. factory in Karunagappally, Kollam**, inaugurated by the **Hon. Minister for Industries, Government of Kerala**. This state-of-the-art facility features **fully air-conditioned production lines, dedicated R&D and testing labs**, and the capacity to produce **55 tons of roasted nuts per day**—a significant expansion from its earlier 30,000 sq. ft. unit.

Leadership & Expertise

WENDERS is led by third-generation entrepreneurs:

- **Hari Krishnan R Nair**, President & Director, IIM Calcutta MBA and a B.Com (Gold Medal) from the Sathya Sai Institute of Higher Learning is a global expert in tree nuts who served as Chairman of the Cashew Export Promotion Council of India and played a pivotal role in finalizing the UN-ECE Standard for Cashew Kernels (2009-13) as Rapporteur. He has also held prominent positions in other industry organizations – Chairman of the Global Cashew Council set up by the INC and of CII (Kerala), Board Member of Indo American Chamber of Commerce (IACC) and Federation of Indian Export Organizations (FIEO) and of TiE Kerala.
- **Ganesh R Nair**, who holds an MBA from UCLA and an MS from MIT, and worked with Johnson and Johnson for 12 years in the USA and Europe, drives innovation and strategic growth.

Since 1993, they have driven WENDERS' modernization, innovation, and new product development.

Their combined leadership has positioned WENDERS as a trusted partner to global food and retail brands.

PUREHEART, WENDERS' consumer brand, has become a **leading nut snacks brand in Kerala**, and now ranks among the **Top 20 Nut Mixes on Amazon India**. It has expanded its national footprint through **Flipkart, Blinkit**, and the company's own **D2C platform** - www.pureheart.com.

Looking Ahead

With continuous investment in capacity, quality systems, and digital channels, WENDERS is well-positioned to support global food companies looking to expand in India's fast-growing market.

Did You Know?

"Karma nuts" roasted cashew snacks served at international festivals like the Oscars and Grammys are proudly exported from Kollam, Kerala, by none other than WENDERS.

Dr. Bondada Raghavendra Rao

Chairman & Managing Director
Bondada Group

How has your company evolved since its inception, and what key transformations have been pivotal to your growth?

Bondada Engineering began its journey in 2012 as a Telecom EPC and O&M company with INR 7 crore in revenue. Over time, we have transformed into a diversified infrastructure company with a turnover of INR 1,571 crore in FY 2025, achieving a CAGR of 56%. Today, we operate across telecom, renewable energy, railways, eco-friendly building materials, industrial LED lighting, and BLDC motors.

Three key transformations have been pivotal to our growth. First, our strategic entry into solar EPC and O&M aligned us with India's clean energy goals. Second, securing the INR 1,156 crore BSNL 4G saturation project demonstrated our execution capabilities in large-scale infrastructure. Third, our public listing on the BSE SME platform in 2023 enhanced transparency, brand value, and shareholder confidence.

These milestones strengthened our ability to secure large orders, helping us build a robust order book of INR 14,000 crore today.

How does your company contribute to strengthening India's position as a global economic force, particularly in alignment with the 'Atmanirbharta' vision?

Bondada Engineering strongly supports the **Atmanirbhar Bharat** mission by delivering indigenous infrastructure and technology solutions. As India targets 500 GW of non-fossil fuel energy by 2030, we aim to build 10 GW of renewable energy assets to contribute meaningfully to national clean energy goals.

Our projects help drive industrial growth and India's long-term economic resilience. We are also enabling the country's digital transformation through telecom infrastructure that expands 4G and 5G connectivity in rural and underserved regions.

Additionally, we manufacture indigenous products like solar module mounting structures, BLDC motors, and energy-efficient LED lighting systems. These initiatives reduce import dependence, empower local suppliers, generate rural employment, and strengthen domestic value chains.

What is your company's growth strategy for the next 3-5 years, and how does it align with the evolving business landscape?

Our strategy focuses on scaling renewable energy and achieving \$1 billion in revenue by 2030. We are building a 10 GW renewable portfolio, spanning solar, Battery Energy Storage Systems (BESS), Pumped Storage, and Green Hydrogen.

A recent 2 GW land allocation under Andhra Pradesh's Clean Energy Policy will expand our IPP portfolio and asset base. We are also growing in the railway sector, building telecom infrastructure for the Kavach safety system – leveraging our expertise to further support India's infrastructure ambitions.

Our roadmap reflects our commitment to sustainable growth and long-term shareholder value. ■

METHODOLOGY

Listing of **'Leading SMEs of India 2025'** and **'Leading Mid-Corporates of India 2025'** is a Dun & Bradstreet initiative that recognizes and honors India's leading Small and Medium Enterprises (SMEs) and Mid-corporate enterprises. This edition of the report provides listing of **13,000+ SME** and **1,500+ Mid-Corporate** companies across multiple industry segments to acknowledge and highlight their major achievements. Apart from this, Dun & Bradstreet also felicitated leading SMEs and Mid-corporates across industry and theme awards – Business Excellence Awards 2025.

Eligibility Criteria

SMEs are defined as companies with FY24 standalone annual turnover between INR 10 Crore – 500 Crore. Mid-corporates are defined as companies with FY24 standalone annual turnover between INR 501 Crore – 1,500 Crore. The companies that are purely into trading activity are not eligible.

Shortlisting Process

- Dun & Bradstreet has reached out to SMEs and Mid-corporates across the country through multiple channels such as email campaign, online medium, industry associations and councils, Dun & Bradstreet's internal database, etc.
- Dun & Bradstreet has also used the financial information available on secondary sources such as Ministry of Corporate Affairs, exchange websites, and other reliable Government websites.

- Through this process, we have sought financial details of SMEs and Mid-corporates for FY24, FY23, and FY22 through annual reports, audited statements, etc. In addition to the financial information, companies were requested to provide qualitative information in the form of presentations, certifications, client testimonials and other documents to 'Make their Own Case' for excellence.
- Dun & Bradstreet used a proprietary model (employing a combination of quantitative and qualitative parameters) to analyze various details available and have 'listed' leading SMEs and Mid-corporates of India, together with analysis of companies for 'business excellence awards' for industry & theme-based categories.

Selection of Business Excellence Award Winners

The shortlisted companies were duly evaluated by an eminent panel of industry and experts at a jury meeting. The final award winners were selected by the jury panel on the basis of multiple factors including quantitative and qualitative and were agreed upon by mutual consensus.

This report and the awards are tributes to the SMEs and Mid-corporates sector acknowledging the resilient performance in today's volatile economic environment. This, we believe, will encourage other emerging SMEs and Mid-corporates to showcase their contribution through their active participation in our future editions. We would be pleased to receive your invaluable feedback and suggestions, which we can incorporate in the next edition.

DEFINITIONS & CALCULATIONS

DEFINITIONS

Branded Content: The information and views published under Branded Content have been curated by organization featured in the article. The facts and opinions expressed here do not reflect the views of Dun & Bradstreet

Experts' View: The facts, views and opinions expressed in the interviews are those of the contributors and the organization they represent. Dun & Bradstreet has not verified the veracity of the statements made therein

CALCULATIONS

Sr No	Particulars	Formulae / Explanation
1	Total Income	Refers to the total revenue including other income as per annual report / MCA financials in the company's standalone financial statements
2	Net Profit/Loss	Refers to the profit/loss after tax as per annual report/MCA financials in the company's standalone financial statements
3	Net Worth	Refers to sum of equity share capital and reserves & surplus in the company's standalone financial statements
4	Net Profit Margin (%)	$(\text{Net Profit} / \text{Total Income}) * 100$
5	Return on Net Worth (%)	$(\text{Net Profit} / \text{Net Worth}) * 100$

D&B ESG Intelligence

D&B ESG Intelligence delivers data and analytics built from the Dun & Bradstreet Data Cloud and established sustainability standards to help companies quantify and assess the impact of their business partners' sustainability rankings to their companies' performance. This true and trusted source of ESG data enables compliance and procurement teams to generate insights that help strengthen their ESG goals and policies, and streamline ESG assessment processes.

Dun & Bradstreet Knowledge Platforms and Learning Solutions

Dun & Bradstreet India has been tracking the Indian economy for more than two decades. Through our knowledge platforms and publications, we place the success stories of Indian Companies on a global platform. Our platforms are designed to help you position your brand in front of potential customers, investors, suppliers, government bodies, regulators and other stakeholders. We also provide a suite of professional training, educational courses and innovative knowledge forums & conferences.

**SOLUTIONS**

- Awards & Publications
- Conferences - Online & On-ground
- Training and Certification
